PREFACE

Article 30(2) of the Broadcasting Act, Chapter 350 of the Laws of Malta, requires the Broadcasting Authority to make and transmit to the Prime Minister a report that includes the results of independent audience research which ascertains:

- (a) the state of listenership or viewership of broadcasting services provided in Malta;
- (b) the state of public opinion concerning programmes included in broadcasting services provided in Malta;
- (c) any effects of such programmes on the attitudes or behaviour of those who watch them; and
- (d) the types of programmes that members of the public would like to be included in broadcasting services provided in Malta.

In order to give effect to the above, the Broadcasting Authority has commissioned the National Statistics Office to compile data through telephone interviews during the period October 2011-2012 that is representative of the whole population. This report contains the analysis of these interviews for the fourth quarter of the 2011/2012 broadcasting season; i.e. for **1st July to 30th September 2012**.

Part One of the report details the analysis of the data collected and includes the questionnaire used; the classification of localities in the Maltese Islands by district as found in this particular work; a list of nationwide radio and television stations and community radio stations licensed by the Broadcasting Authority during this period; as well as calculations by half-hour slots for radio and television audiences rounded up to the nearest thousand.

The calculation of absolute numbers for each period depends on the latest demographic data published annually by the N.S.O. which in themselves are calculated on the latest Population Census [2005] adjusted with total live births, deaths, marriages, data on separations, registered annulments, divorces obtained abroad and figures on migration [N.S.O. PR 122/2009; Methodological Notes]. For this reason, only an estimate of absolute numbers of radio and television audiences can be made. The National Statistics Office is providing the Broadcasting Authority with two different weights for each respondent: a calibration weight to represent the required sample, and a grossing-up weight representing the targeted population (i.e. the number of persons aged 12 or more residing in private dwellings) amounting to **372,447** and which was estimated from the Demographic Review 2010.

Part Two of the report details the grossed-up tables and figures for the second quarter of this broadcasting season; i.e. for April to June 2012 representing the estimated targeted population of those aged 12 years and over.

Part Three of the report details the raw sample data – both as actually collected as well as weighted data to represent the targeted sample for this quarter. As expected, the total quarterly responses by each demographic factor were not proportional to the selected sample. For this reason a calibration-weight

was given to each respondent, depending on their demographic characteristics, so that results would be better representative of the whole sample quarter.

It is important to note that in the calculation of the calibrated data, as well as that of grossed-up data, the totals may not tally due to the rounding-off of numbers to the nearest whole integer.

During this assessment period:

During this assessment period the London 2012 Olympics were held between 27th July and 12th August which were broadcast on TVM2.

PART ONE – REPORT

1. METHODOLOGY AND SAMPLE COLLECTION

Data was collected continuously by means of telephone interviewing conducted by National Statistics Office interviewers during the period **1st July to 30th September 2012**. NSO interviewers are instructed to make interviews between 04:00pm – 08:00pm on weekdays and between 09:00am – 1:00pm on weekends, and are instructed to call-back individuals up to 3 times before interviewing the next person in their list. This is mainly to avoid any bias that could be introduced among gender and age.

As in previous audience assessments, the National Statistics Office selected the sample, administered the survey and collected the data that was passed on to the Broadcasting Authority for analysis. The net sample size over a one year is to consist of around 7300 units (over four quarters covering 365 days) resulting in the desired target average of 20 daily interviewes. The National Statistics Office allowing for a 50% response rate selected a stratified random sample based on gender, age, and district population distribution.

For the period July-September 2012, 1839 individuals [51.93% of contacted persons] accepted to participate in the survey. On average, the response rate was evenly spread out during the whole period while this rate was 1.47% lower than that of the previous assessment period of April-June 2012. Table 1.1 below gives a breakdown of the responses achieved.

The target population for this survey consisted of Maltese residents aged 12 years and over, living within private households. The respondents' households were selected using systematic random sampling from a database containing all individuals maintained and **known only to the N.S.O.** – only N.S.O. Officials know each respondents' personal data and such data is **not** forwarded to the Broadcasting Authority. Each individual has an equal and independent chance of being chosen. All the data collected was also subject to a series of quality checks by vetters from the N.S.O. while the data entry programme has a number of in-built validation rules in order to limit the errors of data inputting. Those respondents who are deceased or live in an institution were classified as 'ineligible'.

TABLE 1.1: SURVEY RESPONSE RATE BY QUARTER [JUL/SEP 2011-2012]

	1820	100%	1842	100%	1820	100%	1820	100%	1820	100%

Totals may not tally due to weighting and rounding off

1.1 The Accuracy of the Results

Two important statistical tools measure how well the sample represents the population: the survey’s margin of error and the confidence level used. The margin of error is the amount of error inherent in the results due to sampling and depends on the size of the sample – a lower margin of error requires a larger sample size. A common choice as an accepted margin of error is that of **±5%**. The confidence level is the amount of uncertainty that can be tolerated. Typical choices are 90%, 95% and 99% confidence – a higher confidence level requires a larger sample size.

For this period of July-September 2012, with a response rate of 51.93%, a population size of 372,447 [aged 12 years and over], and a 95% confidence level, the sample of 1839 interviewees has a margin of error of **± 2.28%**.

1.2 Comparison to Previous Assessments and Absolute Data

All the tables and charts for each assessment period have similar methodology in formulation. For comparative purposes, data is always presented as percentages rather than in absolute figures. However due to repeated requests for calculations to be extrapolated over the whole population, for the past assessments calculations have been made for the absolute value of 1% in each table. *Of note is that in the extrapolation of such absolute data differences arise due to rounding-off of percentages in the tables while totals may not tally.*

2. SAMPLE PROFILE

As in previous assessments, the demographics included gender, age and location of households by geographic district. The demographic location of respondents are based on the same distribution of local towns and villages between six districts as grouped in the 2009 Demographic Review; while the ages of respondents are grouped according to categories as used in previous assessments.

The minimum and the maximum age of respondents for this quarter under review and for the previous quarter assessment periods, as well as the 'range' of respondents are listed below:

Respondents' Age:	Minimum	Maximum	Range
July – September 2010	12	92	80 years
October – December 2010	12	101	89 years
January – March 2011	12	99	87 years
April – June 2011	12	95	83 years
July – September 2011	12	99	87 years
October – December 2011	12	94	82 years
January – March 2012	12	92	80 years
April – June 2012	12	99	87 years
July – September 2012	12	96	84 years

Tables and Figure 2.1 below give the profile of the sample by age group, by gender and district. Further details about sample distribution are given in Tables 1.1 to 1.3 in Part Two and Part Three of this report.

TABLE 2.1: POPULATION PROFILE BY AGE: BY GENDER AND BY DISTRICT [JUL/SEP 2012]

AGE GROUP	TOTAL	GENDER		DISTRICT

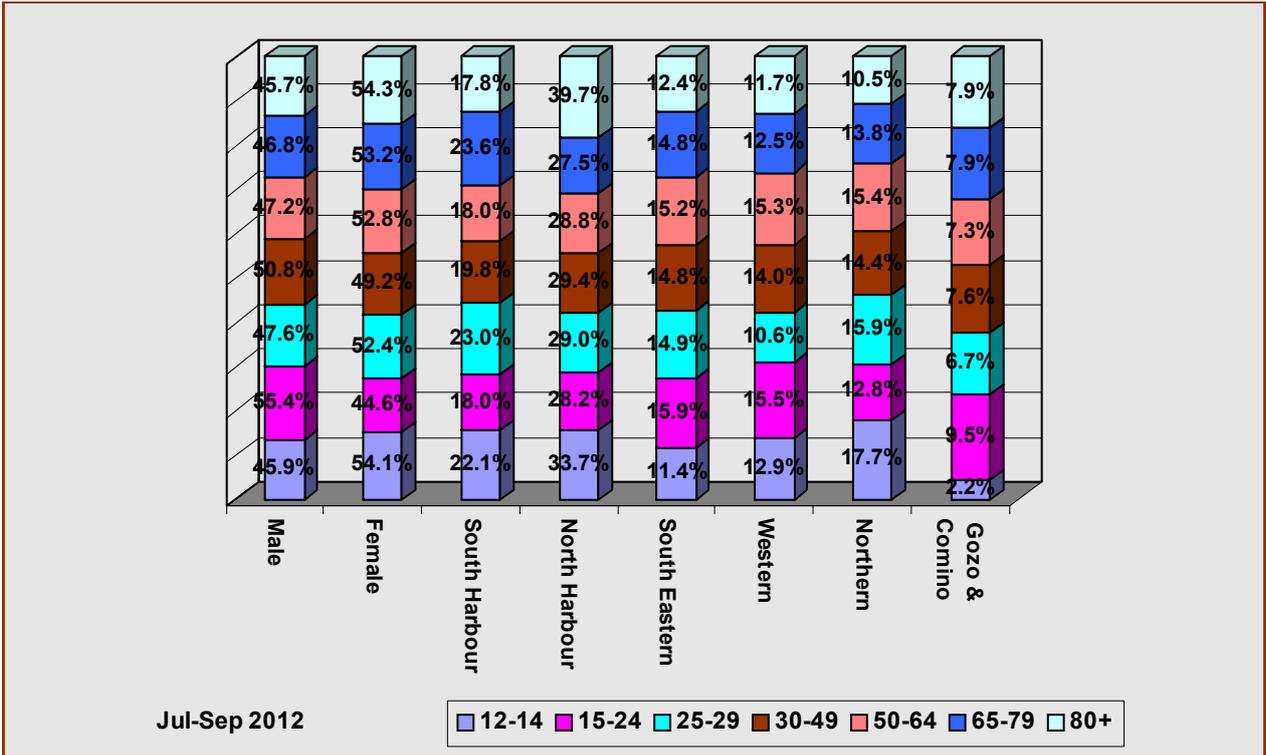

FIGURE 2.1: POPULATION PROFILE BY AGE: BY GENDER AND BY DISTRICT [JUL/SEP 2012]

3. LISTENING AND VIEWING PATTERNS

Participants were asked which station they had watched or listened to for at least ten minutes the day before the interview. For this section no account is taken of the time spent by consumers listening/viewing their reception sets.

3.1 Radio Reach

This data has been repeatedly monitored since October 2006. For this period, there was a decrease in the number of radio listeners of 1.81% over the previous period of April-June 2012 and a decrease of 10.53% over the same period last year. Those who expressly stated that they did not listen to radio [54.432%] exceeded radio listeners [41.816%] by 12.616% which was the highest registered since October-December 2006 – see summary Table and Figure 3.1 below and Tables 3.1-3 in Part Two and Part Three.

TABLE 3.1: SAMPLE RADIO REACH BY QUARTERS [OCT/DEC 2006 – JUL/SEP 2012]

	Do not Listen to Radio	No Particular Radio Station	Do not Remember	No Response	Regular Listeners	±% Listeners/Non-Listeners
Oct-Dec 2006	43.982%	3.939%	0.875%		51.204%	7.221%

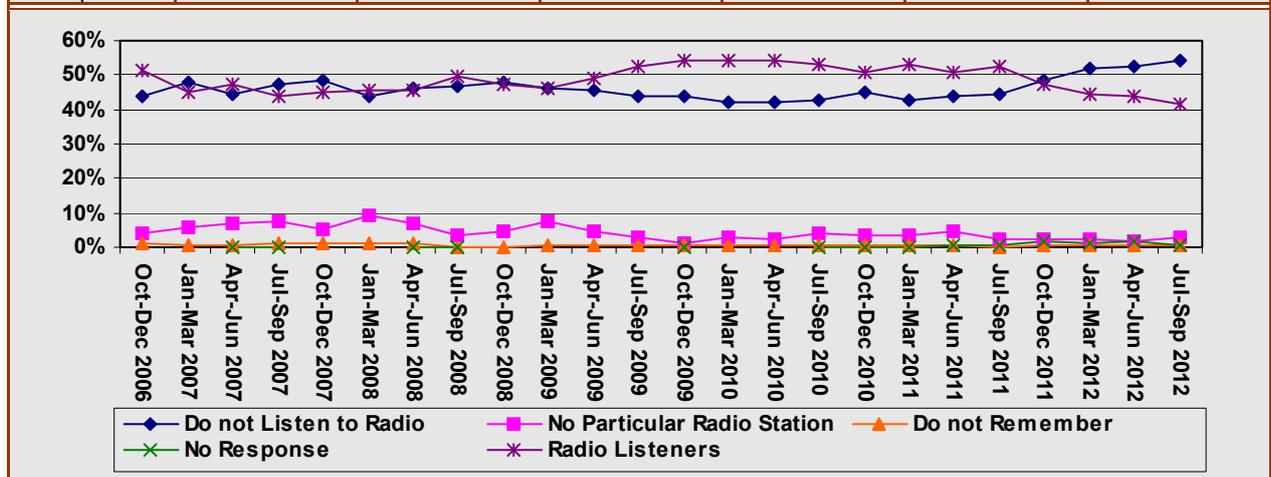

FIGURE 3.1: SAMPLE RADIO REACH BY QUARTERS [OCT/DEC 2006 – JUL/SEP 2012]

The total number of radio listeners were analysed by broadcasting station and the data is summarized in Table and Figure 3.2 below. This data gives the effective percentage of radio listeners that each radio broadcasting station has attracted [without taking into consideration the amount of time spent listening by each respondent]. Bay Radio maintained the highest percentage of radio listeners [23.48%], increased its share by 1.36% over the previous quarter of April-June 2012 [22.12%], and has increased its share by 3.05% over the same period last year [2011: 20.43%]. ONE Radio maintained its second ranking [17.60%] increasing its share by 2.91% over the previous assessment quarter [14.69%] and further increasing its share by 4.60% over the same period last year [Jul-Sep 2011: 13.00%]. Radju Malta ranked third [9.56%] increasing its share by 1.08% over the previous period of April-June, and increasing its share by 0.94% last year [8.62%].

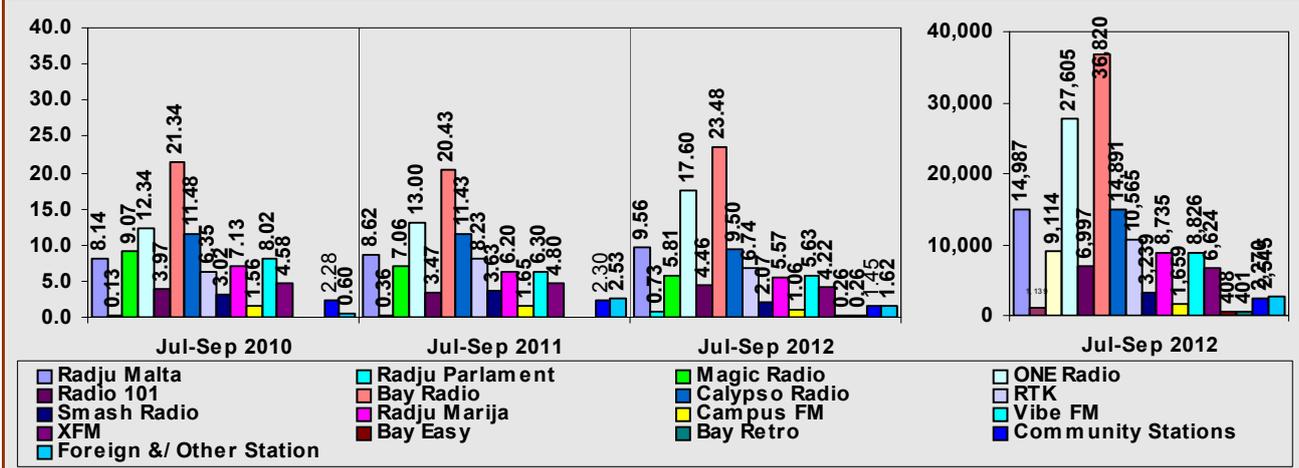

FIGURE 3.2 RADIO REACH BY BROADCASTING STATION BY QUARTER [JUL/SEP 2010, 2011, 2012]

Bay Radio and ONE Radio have maintained their positions since October-December 2008 while Calypso radio has lost its third ranking to Radju Malta – see Table 3.3 and Figure 3.3.a below, while Figure 3.3.b displays each station's ranking. Of note are the listeners who responded that they had listened to Bay Easy and Bay Retro. This was the first time that these two stations, broadcasting exclusively on the DAB+ network registered an audience.

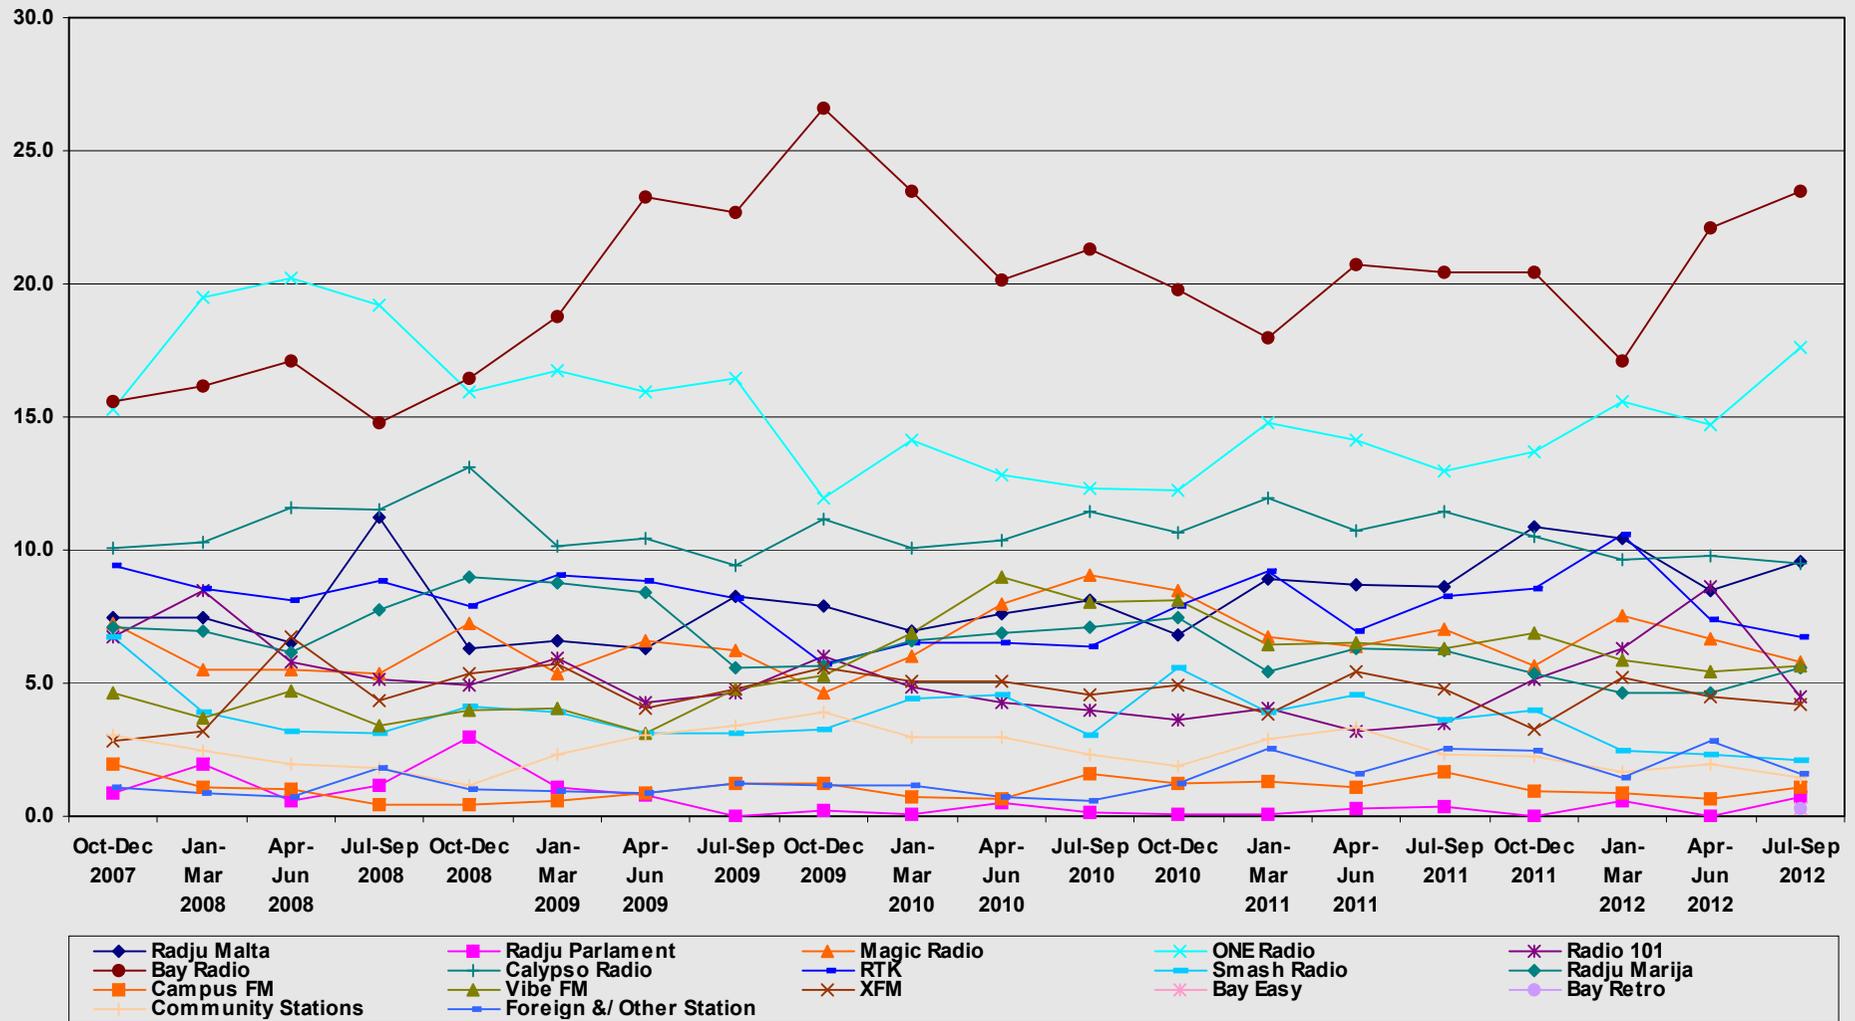

FIGURE 3.3.A RADIO REACH BY BROADCASTING STATION BY QUARTER [OCT/DEC 2007- JUL/SEP 2012]

3.1.1 Radio Reach by Gender, by Age Groups, and by District

For this assessment period, Bay Radio captured the highest number of both male [27.47%] and female [19.72%] radio listeners. One Radio attracted the second highest number of both male [18.74%] and female [16.53%] listeners. Following this, the third largest group of male listeners favoured Vibe FM [8.50%] while the third largest group of female listeners favoured Radju Malta [11.68%]. Calypso Radio was the fourth most favoured station for both males [7.87%] and females [11.03%]. The largest gender difference where females exceed males [F>M] is registered for Radju Marija [5.45%], Radju Malta [4.38%], Calypso Radio [3.16%] and Magic Radio [3.01%]. On the other hand males exceed females [M>F] for Bay Radio [7.75%], Vibe FM [5.38%], and ONE Radio [2.21%]. Gender differences of the other radio stations did not exceed the margin of error.

Analysed by age groups, Bay Radio again reached the largest percentage of respondents who are in the four-lowest age groups, i.e. all those who are under 50 years old; and has reached more than half of those who are under 25 years old. ONE Radio was the most followed station by all those who range from 50 years [50-64: 25.96%] to 80 years [65-79: 34.07%] while Radju Marija was the most followed station by those who were over 80 years old [31.68%]. ONE Radio was also the second most followed station by those between 30-49 years [12.55%] and the third most followed station of those over 80 years old [20.64%] after Radju Malta [26.62%] for the same group. Of note are the three lowest age groups [12-14; 15-24; and 25-29] whose second preference went to Vibe FM while the third preferences went to Radio 101 [12-14: 4.90%], ONE Radio [15-24: 6.99%], and XFM [25-29: 11.31%]. Of all the broadcasting stations only ONE Radio and Calypso Radio attracted audiences from all the age groups.

Analysed by district, Bay radio was the most followed station in five districts and the second most followed in South Eastern where ONE Radio ranked first. ONE Radio was the second most followed station in three districts [Northern Harbour, Southern Harbour, and Gozo 7 Comino] and the third most follow station in two other districts [Western and Northern districts]. Radju Malta was the second most followed station in Western and Northern districts and the third most followed station in Gozo & Comino. Calypso Radio was the third most followed station in three districts [Southern Harbour, Northern Harbour and South Eastern].

Of note is Gozo & Comino where audiences for community radio stations [which are all parochial community stations] ranked sixth at 6.52% while audiences for RTK which nearly always ranked first, this time RTK in Gozo & Comino ranked fourth with 10.31% - see Table 3.4 below and previous assessment.

TABLE 3.4: RADIO REACH BY BROADCASTING STATION: BY GENDER, BY AGE GROUP, AND BY DISTRICT [JUL/SEP 2012]

[Weighted]	Total %	Gender		Age Group						Districts

3.2 TV Reach

[For this section no account is taken of the time spent by consumers viewing their TV sets.]

Similar to radio, data for TV reach has also been monitored for the past years using the same analytical methods. The number of television viewers has remained constant over the first three quarters of this assessment period. For this quarter, however, TV viewers have reached the lowest amount since January-March 2007; 12.704% lower than that recorded for the previous assessment period of April-June 2012; and 12.887% lower than that registered for the same period the previous year [July-September 2011] – see Table and Figure 3.5 below.

TABLE 3.5: TV REACH BY QUARTER [OCT/DEC 2007 – JUL/SEP 2012]

[Actual]	Did not Watch TV	No Particular TV station	Do not Remember	No TV Set	No Response	TV Viewers
Oct-Dec 2007	24.903%	14.854%	0.939%	0.497%		58.807%
Jan-Mar 2008	24.236%	22.123%	1.501%	0.278%		51.862%
Apr-Jun 2008	21.229%	17.207%	0.503%	0.335%	0.112%	60.615%
Jul-Sep 2008	30.265%	10.615%	0.791%	0.452%	0.113%	57.764%
Oct-Dec 2008	24.360%	14.441%	0.490%	0.381%	0.054%	60.272%
Jan-Mar 2009	21.768%	23.951%	0.560%	0.224%		53.497%
Apr-Jun 2009	24.931%	9.708%	0.390%	0.440%		64.534%
Jul-Sep 2009	30.257%	5.461%	1.256%	0.492%	0.109%	62.425%
Oct-Dec 2009	22.252%	4.135%	1.306%	0.381%		71.926%
Jan-Mar 2010	23.778%	5.889%	0.833%		0.111%	69.389%
Apr-Jun 2010	24.849%	5.498%	0.880%			68.774%
Jul-Sep 2010	26.975%	7.302%	1.090%		0.054%	64.578%
Oct-Dec 2010	21.720%	8.873%	0.653%		0.163%	68.590%
Jan-Mar 2011	17.167%	8.889%	1.222%	0.556%		72.167%
Apr-Jun 2011	20.220%	10.000%	1.044%	0.549%	0.549%	67.637%
Jul-Sep 2011	29.617%	7.268%	.820%		.601%	61.694%
Oct-Dec 2011	23.996%	7.166%	1.031%		1.140%	66.667%
Jan-Mar 2012	24.286%	6.264%	0.604%		2.308%	66.538%
Apr-Jun 2012	26.154%	4.890%	0.604%		1.868%	66.484%
Jul-Sep 2012	35.726%	7.395%	0.653%		2.447%	53.779%

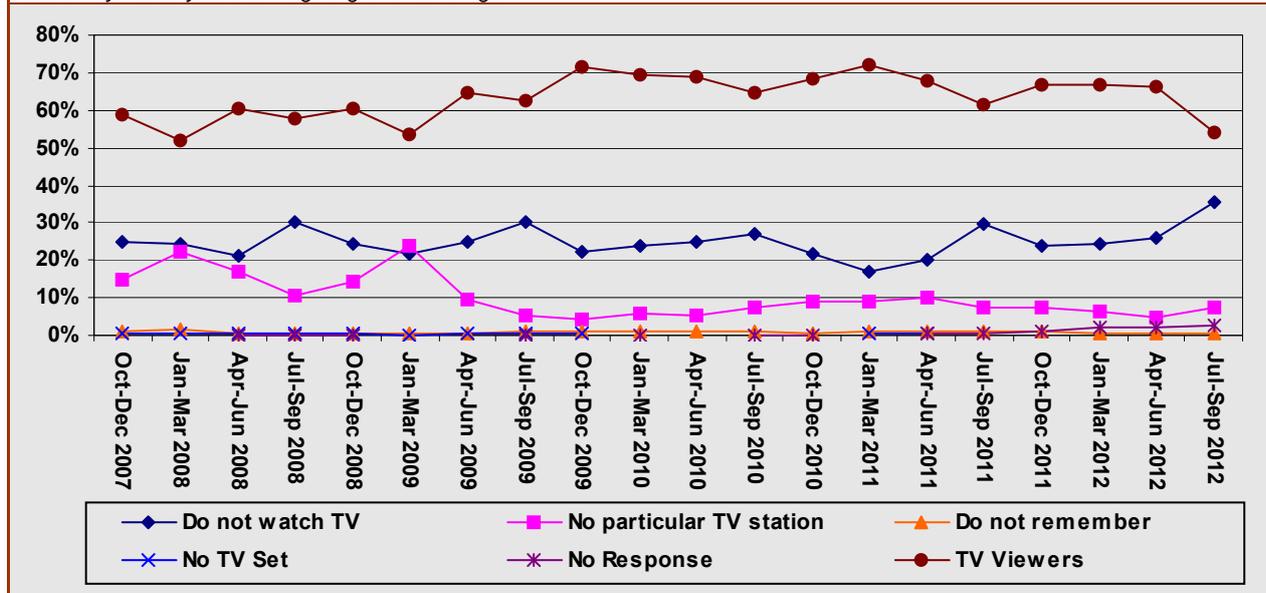

FIGURE 3.5: TV REACH BY QUARTER [OCT/DEC 2007 – JUL/SEP 2012]

The percentage of viewers of each broadcasting station for the periods July-September of 2010 to 2012 is given in Table and Figure 3.6 below. Of the local broadcasting stations, TVM [26.43%] has maintained its prime position throughout increasing the percentage number of viewers over the same broadcasting period of 2011 by 0.45% but decreasing the percentage number of viewers by 9.93% over the previous assessment period of April-June 2012, which was the largest decrease registered in the number of viewers. However, TVM2 must be singled out for its sharp gain over the same period in 2011 and its continued increase over the previous quarter of April-June 2012. ONE [17.08%] has increased its percentage number of viewers by 3.68% over the same period last year and, unlike TVM, has increased its share by 2.47% over the previous assessment period of April-June 2012. The largest increase by local TV stations over the previous quarter was registered by Net TV [+3.52%] while Other TV Stations registered the highest increase of foreign stations.

TABLE 3.6: TV REACH BY BROADCASTING STATION BY QUARTER [JUL/SEP 2010, 2011, 2012]

[Weighted]	Jul-Sep 2010 %	Jul-Sep 2011 %	Jul-Sep 2012 %	Population N	±% Over Apr-Jun 2012

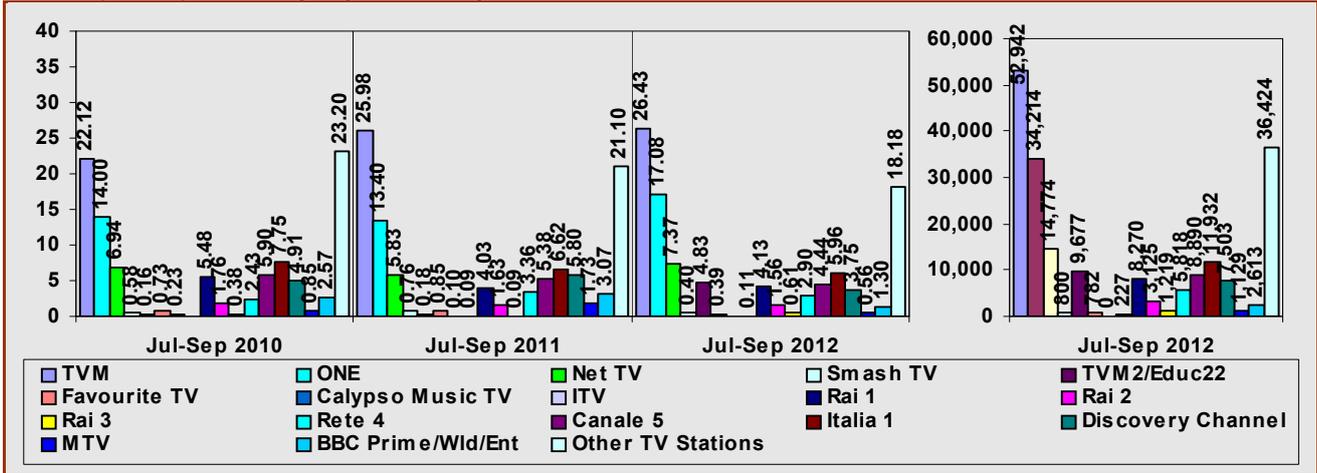

FIGURE 3.6: TV REACH BY BROADCASTING STATION BY QUARTER [JUL/SEP 2010, 2011, 2012]

Analyzing the reach of each TV station by quarter, it can be clearly seen that since 2007 TVM has had high seasonal fluctuations losing up to 10% of its viewers to other stations during the summer months – see Table 3.7 and Figures 3.7.a and 3.7.b below.

TABLE 3.7: TV REACH BY BROADCASTING STATION BY QUARTER AND BY RANKING [OCT/DEC 2007 – JUL/SEP 2012]

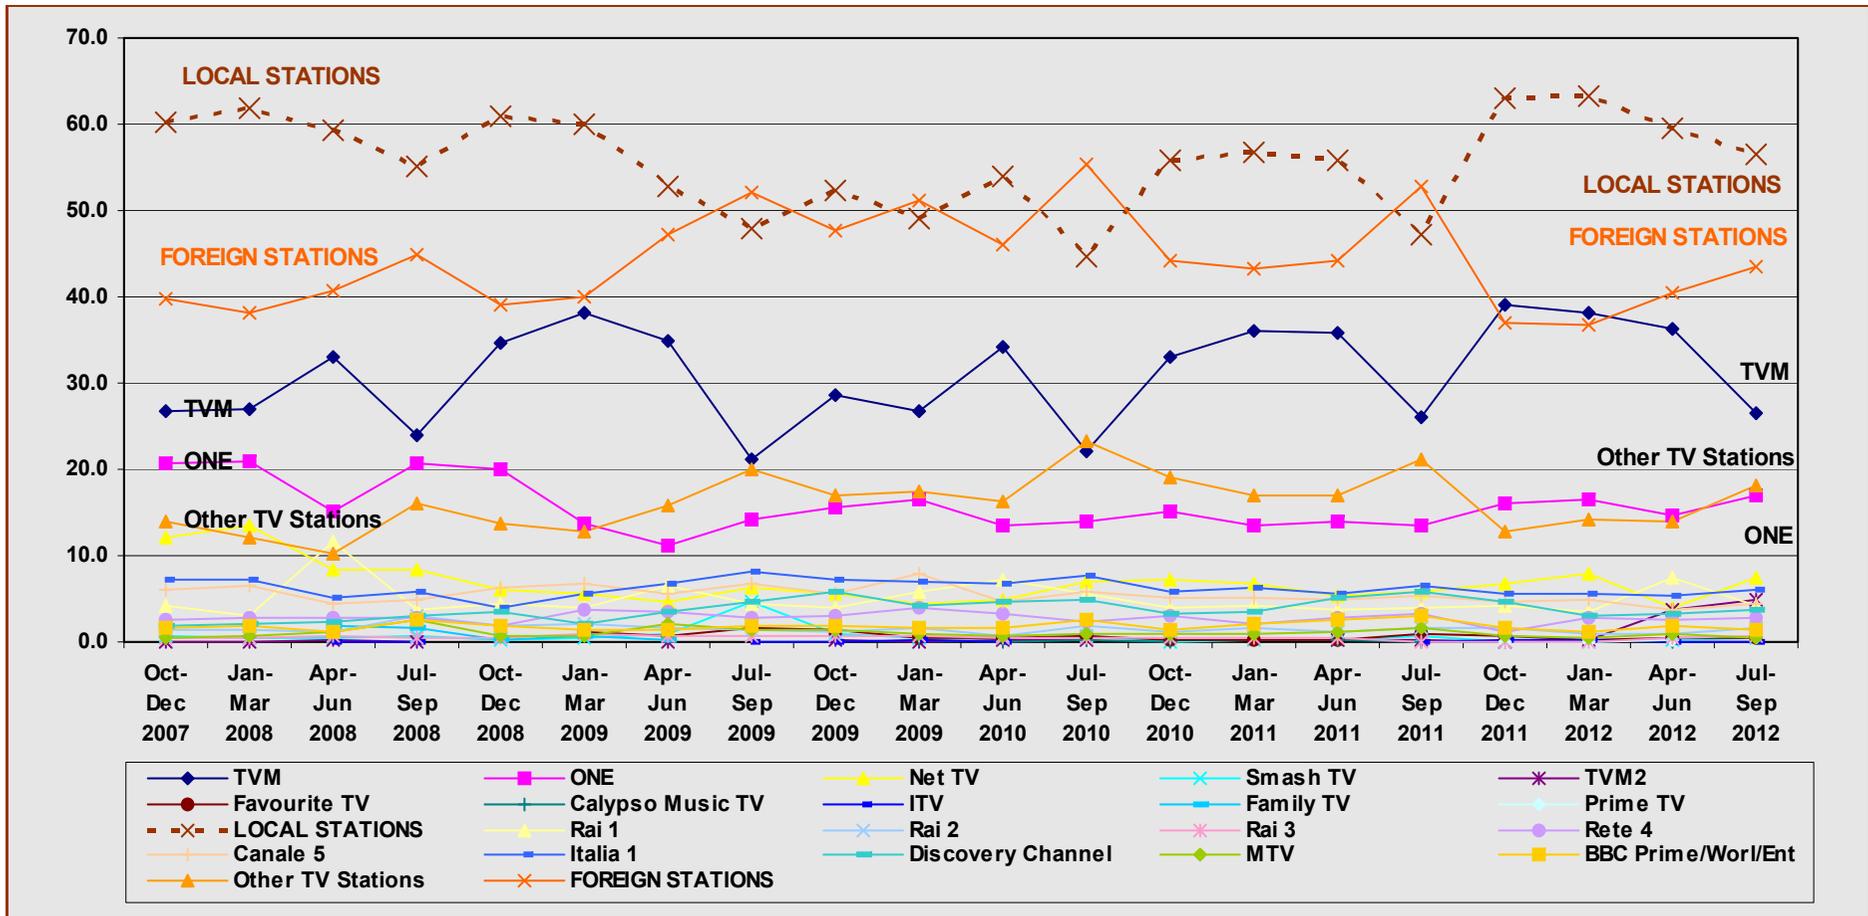

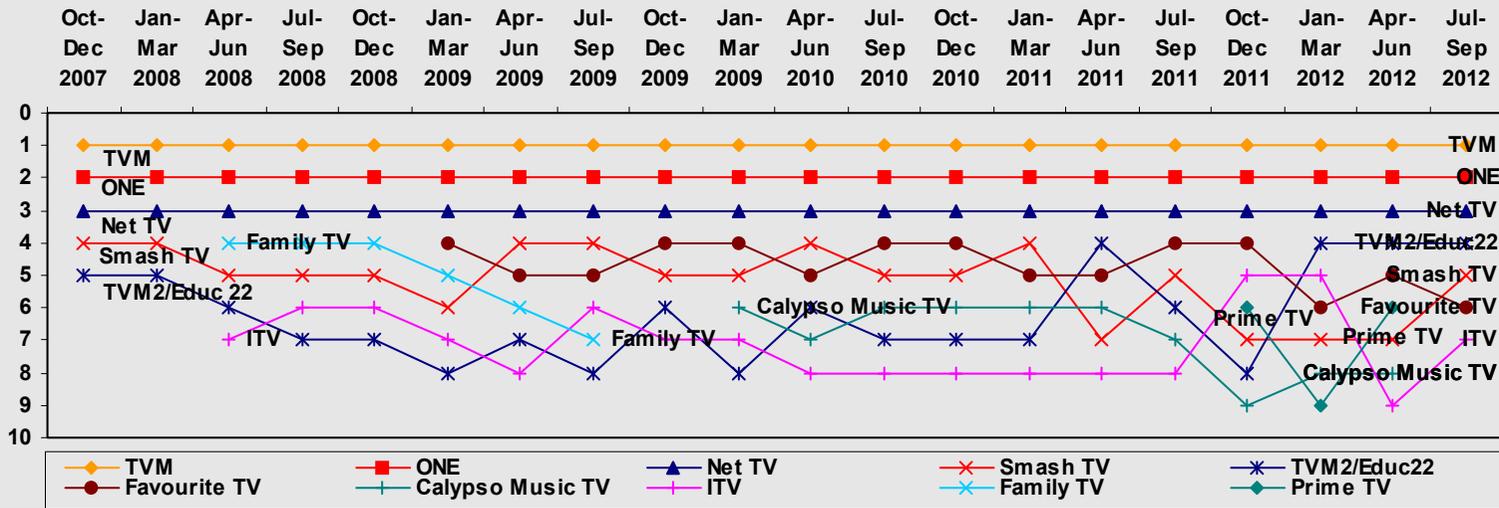

FIGURE 3.7.A: TV REACH BY BROADCASTING STATION BY QUARTER [OCT/DEC 2007 – JUL/SEP 2012]

Local Stations

Foreign Stations

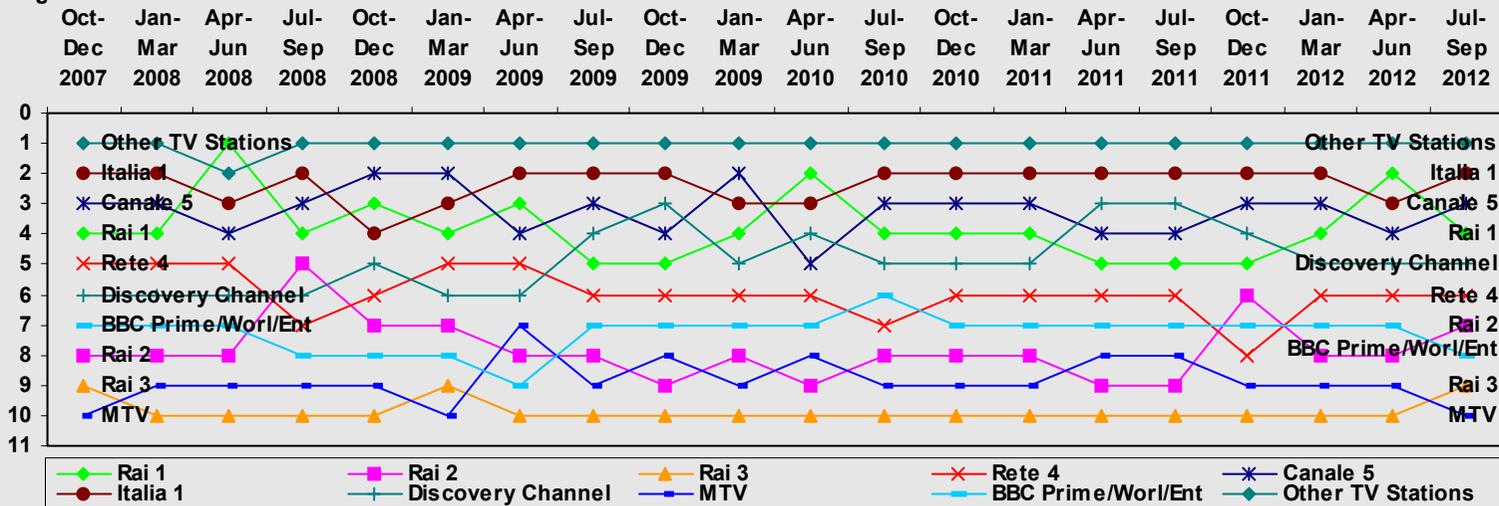

FIGURE 3.7.B: TV REACH BY BROADCASTING STATION BY RANKING [OCT/DEC 2007 – JUL/SEP 2012]

Of the foreign broadcasting stations received locally, Italia 1, Canale 5 and Rai 1 carried away most of the audiences. “Other TV Stations” which excludes local broadcasting stations and the most popular foreign stations [see Table 3.3 in Part 2 for the complete list] have also ranked high and for this quarter their percentage total amounted to 18.18%. Of note are the totals for all local stations against the total of all foreign broadcasting stations received locally – see Figure 3.7.a above. When charted this clearly shows the shifts from local television stations to foreign stations with a clear-cut period of reversal of percentages – the scrutiny of which requires further data-analysis which goes beyond the scope of this study.

3.2.1 TV Reach by Gender, by Age Groups, and by District

Analyzed by demographics, of the local broadcasting stations TVM [26.43%] was the most preferred station by gender, by nearly all the age groups and by district – the exception was for those of 25-29 year olds whose first preference was for ONE [22.81%]. ONE was the second most followed station with a total of 17.08%, while Net TV was the third most followed station with 7.37%. All three stations catered for all the demographic groupings with the exception of Net TV for 25-29 year olds which did not register any audiences for this group and whose second preference went for TVM [17.37%] while their third preference went for TVM2 [3.87%].

Excluding “Other TV stations [18.18%], of the foreign stations the most watched was Italia 1, followed by Canale5 and Rai 1. Similarly, nearly all of the demographic groups preferred these three stations – the exceptions being Italia 1 for 80+ year olds, Canale 5 for 12-14 and 15-24 year olds, and Rai 1 for 12-14 year olds. In fact, nearly half of the 12-14 year olds prefer “Other TV Stations” [49.41], followed by TVM [24.30%], and Italia 1 [10.04%].

In certain demographic groups the total amount of foreign TV stations exceeded the total amount of local TV stations. All those under the age of 30 in fact preferred watching foreign stations than local stations. By district the same applies for the Northern district where total foreign stations exceeded local TV stations. Of note is the amount of “Other TV Stations” followed which overall ranked first for 12-14 year olds and 25-29 year olds, and first in the Northern district [53.84%].

The highest percentage of people viewing local TV stations was registered for Gozo & Comino with 63.55% - see Table 3.8 below.

TABLE 3.8: TV REACH BY BROADCASTING STATION: BY GENDER, BY AGE GROUPS, AND BY DISTRICTS [JUL/SEP 2012]

4. MEDIA RECEPTION PLATFORM

Only the data from persons living in the archipelago form the basis of this analysis – no institutions, of whatever kind were/are contacted. The data is therefore representative only of household reception platforms used and not of national digital uptake.

4.1 Radio Reception Platforms

All survey participants were asked to indicate what type of reception platform they have at home [irrespective of whether they are avid media consumers or not] choosing from “FM”, “Digital”, “Other System” and “Do not have a radio-set at home” **while allowing for multiple replies**. Out of the 1839 respondents, 2234 replies were received which were weighted as per the instructions received from the N.S.O. Of all those interviewed, 12.55% have more than one system of radio reception available – a decrease of 2.61% over that of the same period last year – see Table 4.1 below.

Of all the replies, 8.90% of participants responded that they do not have a radio-set at home – a percentage increase of 1.50% over that of the same quarter last year while there was also a decrease in the effective number of users [-7,138]. While the use of the Digital radio platform has increased by 1.16% to 11.53% over the same period last year, the use of other systems of reception, such as Internet radio, has only decreased by 0.69% over the same period while the largest decrease was that in the use of AM/FM system.

TABLE 4.1: RADIO RECEPTION SYSTEMS BY QUARTER [JUL/SEP 2011/2012]

	Jul/Sep 2011			Jul/Sep 2012			±	
	n	%	N [370,215]	n	%	N [372,447]	%	N

Totals may not tally due to weighting and rounding off

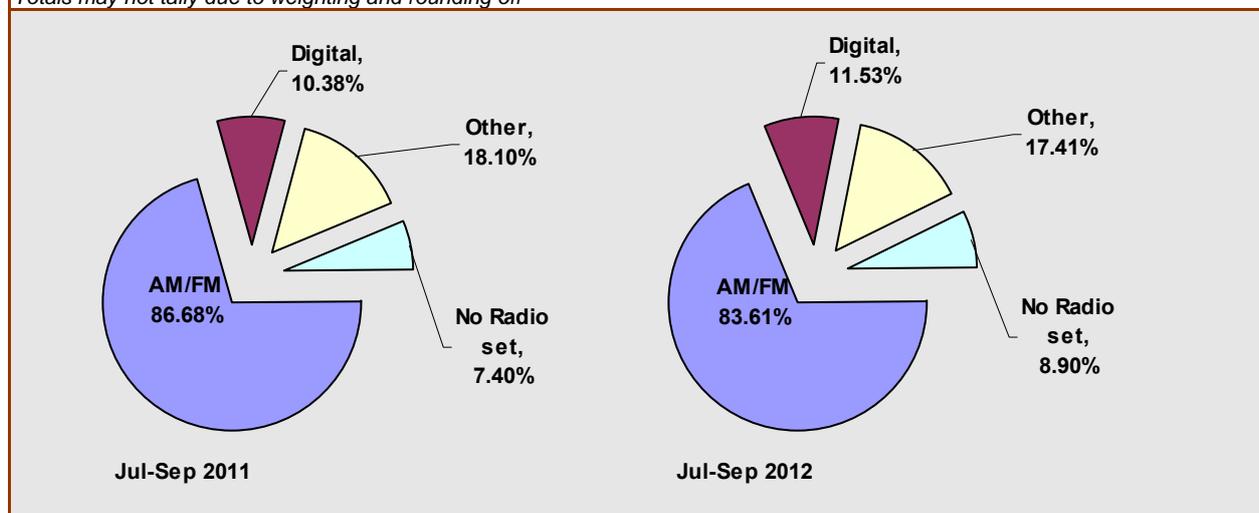

FIGURE 4.1: RADIO RECEPTION SYSTEMS BY QUARTER [JUL/SEP 2011/2012]

4.1.1 Radio Reception Platforms by Gender, Age Groups and District

Analysed by demographics the largest difference between genders was registered for Other Radio systems that are more preferred by males [50.9%] than females [49.1%] while gender differences in the uptake of AM/FM and Digital Radio nearly equates population gender percentages. Similar gender difference is present with those respondents who do not have a radio at home.

Analysed by age groups, the use of AM/FM radio systems is still predominant. Digital Radio and Other Radio Systems are more common with 30-49 year olds – 19.6% and 33.9% respectively. On the other hand, the highest percentage for no radio available was registered with the 30-49 year olds at 43.8%.

The South Eastern district registered the highest percentage usage of AM/FM radio systems [86.6%] while the Northern district registered the highest percentage for Digital Radio[13.3%] and for Other Radio systems [19.2%].

4.1.2 Radio Reception analysis by Platform

To further understand the diversity mix of media platforms, further analysis was made – see Table 4.3 below. Of the total population 65.63% depend only on AM/FM radio, 5.85% depend only on Digital Radio, 0.71% make use of Other Radio Systems, while approximately 2.5% of the population have more than 2 radio systems.

4.2 TV Reception Platforms

On the other hand, digital television broadcasting is available through various platforms. With this in mind, respondents were asked to indicate on which broadcasting platform they receive their household television broadcasts while allowing for multiple replies. Respondents were directly asked whether they subscribe to both Melita and/or GO services for their cable and digital-aerial services. Table and Figure 4.4 below detail the percentages registered by the various broadcasting platforms by quarter for July-September 2011 and for this quarter under review.

Of note is that while only 12.55% of households declared that they have more than one radio system, for television the number of households that have declared multiple systems amounts to 49.18%. The amount of free-to-air viewers has decreased by 7.4% to 63,164 viewers over the same period last year. On the other hand while the number of subscribers to Melita have decreased by 1.39% subscribers to GO have increased by 3.06%. Those who declared that they do not have a TV-set at home has decreased by about 60% from 3,244 to 1,268 over the same period last year.

The amount of satellite systems has decreased by 4.77% from 23.51% to 18.74% of all replies over the same period last year. Internet reception has decreased by 0.75% over the same period to 17.38% of all replies. "Other TV system" includes all those who could not identify what reception system they employ.

TABLE 4.4: TV RECEPTION SYSTEM BY QUARTER [JUL/SEP 2011/2012]

	Jul/Sep 2011		Jul/Sep 2012	
	%	N [370,215]	%	N [372,447]

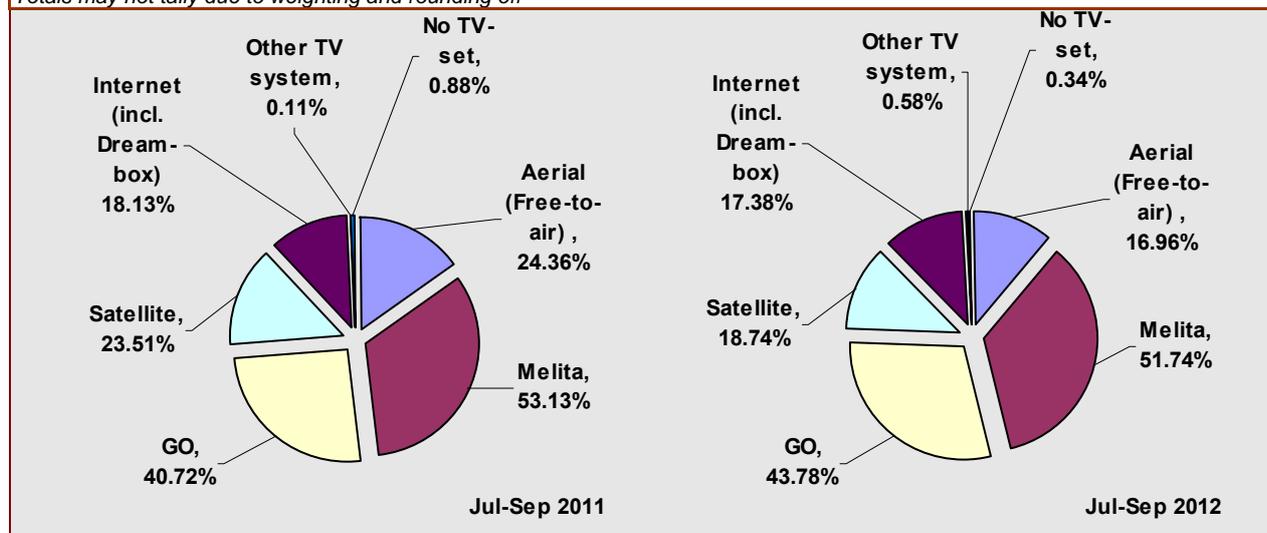

FIGURE 4.4: TV RECEPTION SYSTEM BY QUARTER [JUL/SEP 2011/2012]

4.2.1 TV Reception Platform by Gender, Age Groups and District

For this quarter some gender difference is evident in the types of television reception systems used. The largest gender difference is with those making use of the Satellite [18.7%] and Internet [17.4%]. The use of free-to-air reception by males is higher than that by females by 7.6%. Similarly for Melita services where males exceed females by 0.4% which is minimal; while for the usage of GO services females exceed males by 3.4%. However, the largest gender difference was with those who could not identify what system they operate where females are more than twice likely to be unable to identify the system they use [M: 32.5%; F: 67.5%].

Comparatively the use of free-to-air reception, Melita services, and GO services are spread amongst the age groups according to their demographic representation. Satellite usage is highest with the lowest age groups 12-14 and 15-24 year olds [25.2% and 19.6%]. Similarly for Internet TV systems with 30.0% for 12-14 year olds, 30.1% for 15-24 year olds, and 23.9% for 25-29 year olds. Analysed by district, only two districts [Southern Harbour and Gozo & Comino] did not register any respondent who stated that they do not have a TV system at home.

4.2.2 TV Reception analysis by Platform

Similar to radio, all the replies given by respondents for each television platform were analysed for the multiple use of platforms at the same household. Although 16.96% of all respondents stated that they hold a roof-top aerial only 2.45% of respondents said that they **only** made use of the roof-top aerial – see Table 4.6 below. This figure of 2.45% was 0.94% lower than that registered for the the same period last year; and as per the weighting provided by the NSO, this figure amounts to a percentage reduction of 27.36% from 12,542 to 9,110 persons.

Melita and GO attracted 51.74% and 43.78% respectively of all households. Of these 35.94% [123,449/192,703] of all Melita users and 42.76% [93,327/163,057] of all GO users respectively rely exclusively on their service provider for their media consumption. On the other hand, 2.01% [7,486] of each service's consumers have both platforms installed.

Similarly, singular usage of Satellite, Internet (including Dreambox) and Other TV systems is approximately 1.0% and even far less; while for the combination of such systems with either Melita and/or GO the highest registered figure was only of 4.13% for Satellite with Melita and 3.44 for Satellite with GO.

The amount of respondents who, by elimination, would have more than two systems installed/available registered highest with those who stated that they make use of a satellite system [7.94%] followed by those who make use of Internet (including Dreambox) [7.78%]. On the other hand, those who have more than two such systems installed barely exceed the 6.0% mark for Melita [5.64%] and GO [4.90%].

Further data is available in Part Two of this report.

5. TEleshopping

Respondents were asked whether they regularly watch teleshopping and on which channel such programmes are followed. Teleshopping programmes are aired on local broadcasting stations, generally during the off-peak hours during the day while two teleshopping channels – iTV and Prime TV Shopping Channel are licensed specifically for this genre by the Broadcasting Authority. Replies were analysed as given and without any amendments – a case in point being teleshopping on TVM2 which does not broadcast any teleshopping programmes.

For this broadcasting season 7.06% of television viewers stated that they regularly watched Teleshopping programmes – this is 3.34% lower than for the same period last year and is 0.76% higher than that recorded for the previous assessment period of April-June 2012. Overall, of the effective teleshopping programme viewers, the most followed station was TVM [25.25%] followed by Net TV [20.81%]; and ONE [18.92%] – see Table 5.1 and Figures 5.1.a-b below; and Tables 5.1-2 in Part Two of this report.

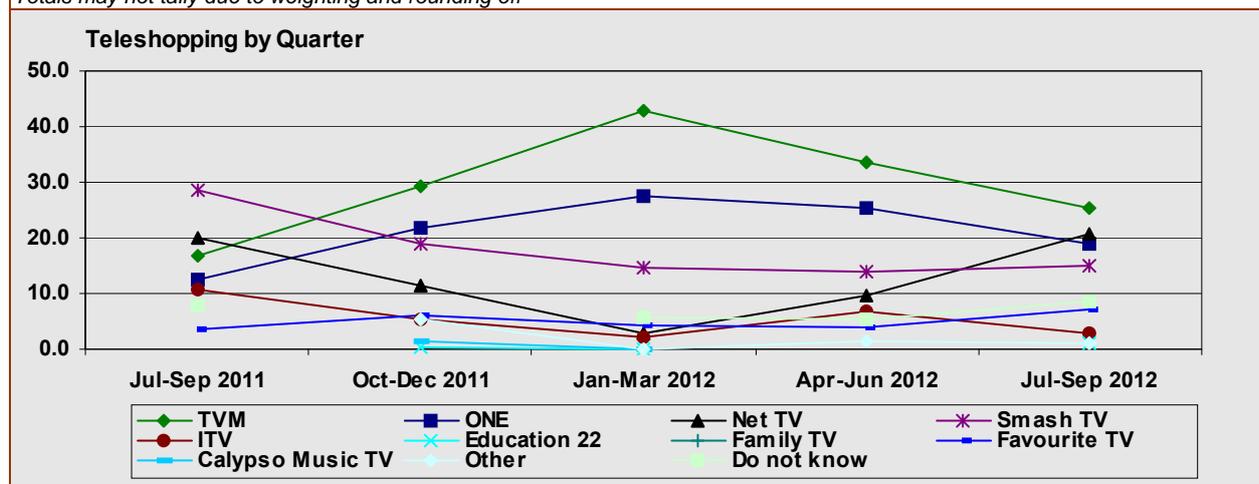

FIGURE 5.1.A: TEleshopping BY BROADCASTING STATION BY QUARTER [JUL/SEP 2011-2012]

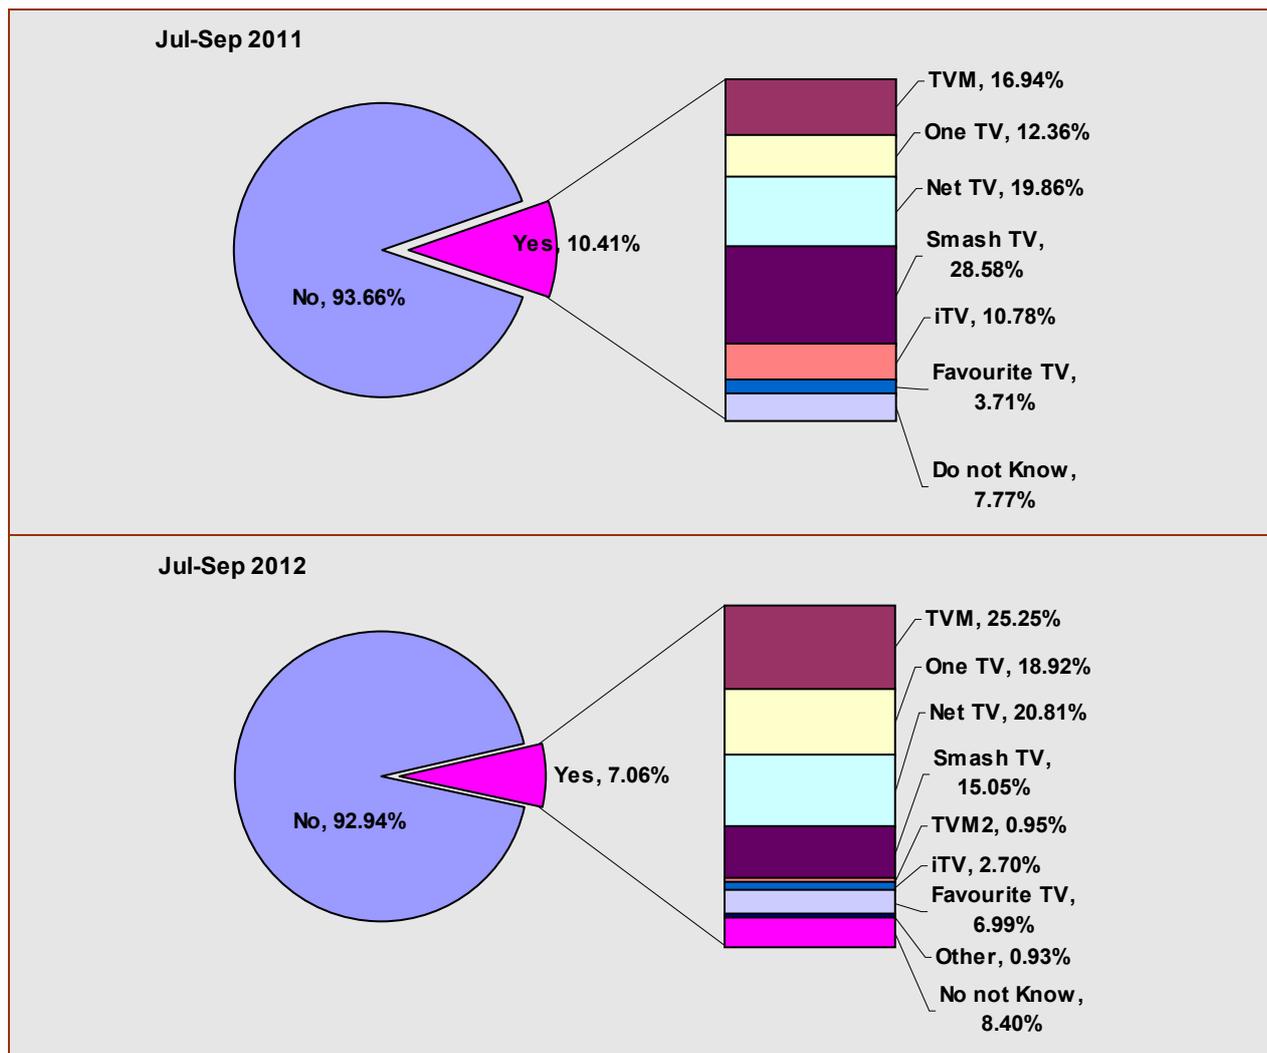

FIGURE 5.1.B: TEleshopping BY BROADCASTING STATION [JUL/SEP 2011-2012]

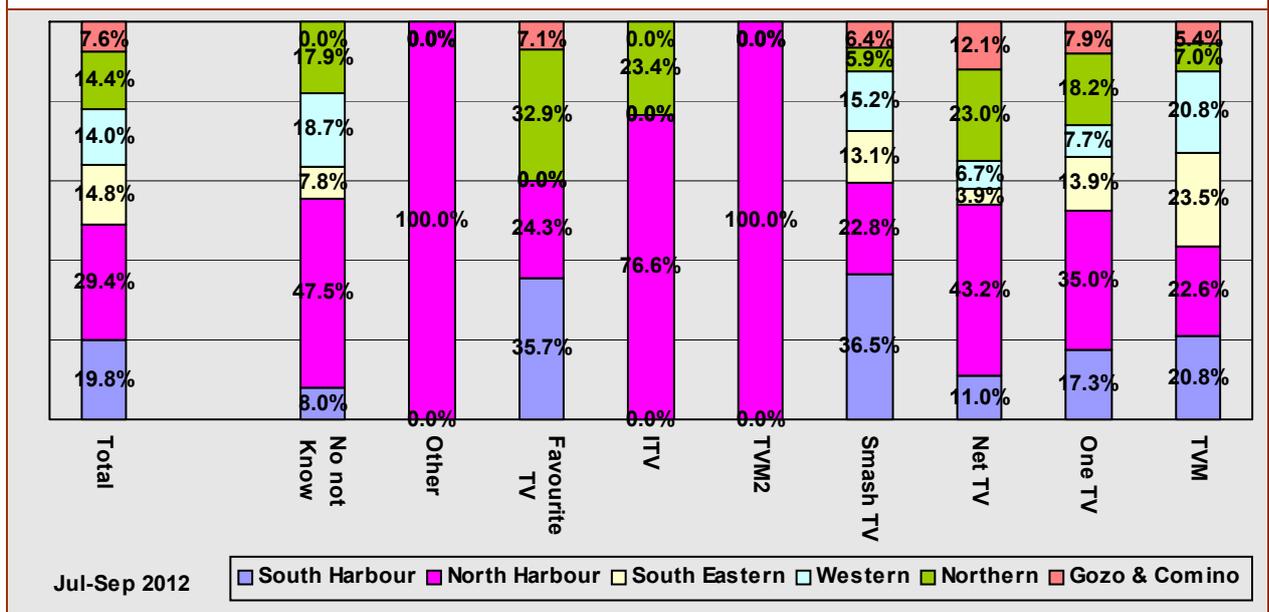

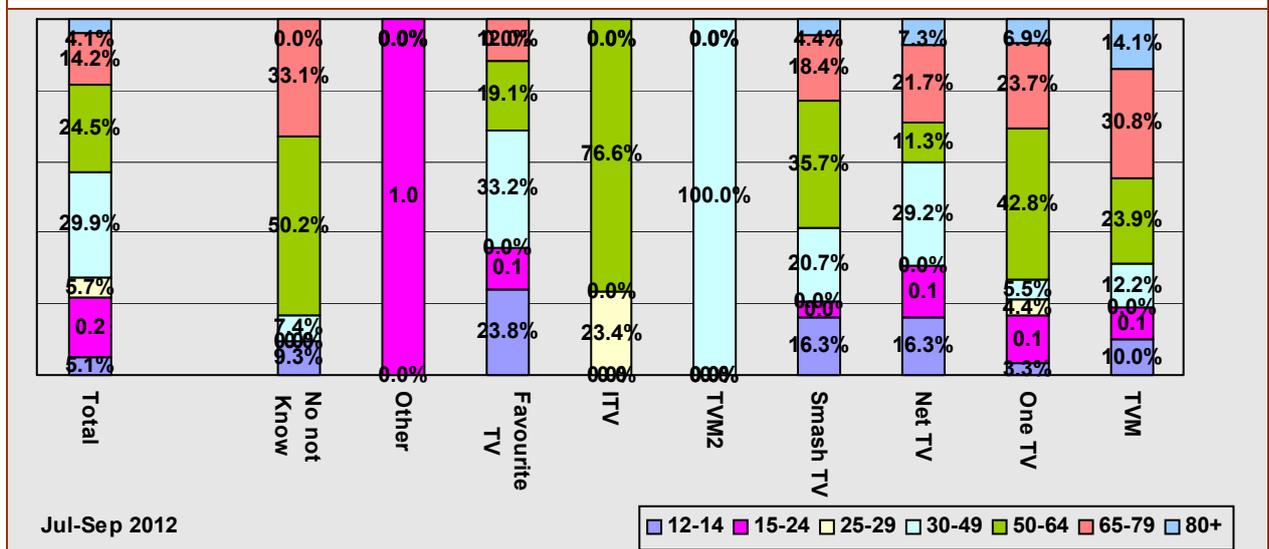

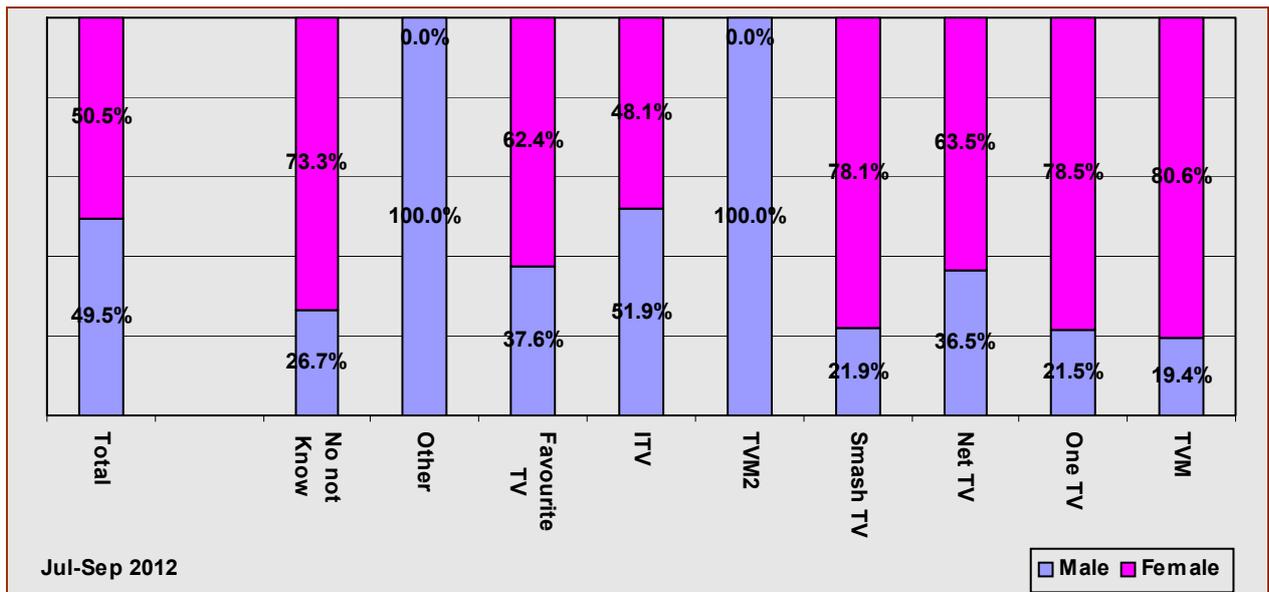

5.1 TEleshopping BY GENDER, BY AGE GROUPS, AND BY DISTRICT

Overall, teleshopping is more followed by female audiences than by male audiences with the highest number of estimated female audiences being those of TVM 28.28% [5,355] followed by those of ONE 20.64% [3,908] and Net TV 18.36% [3,475]. Those in the 50-64 age group registered the highest amount of viewers at 29.47% [7,750] followed by those in the 65-79 age group with 23.18% [6,098] and those in the 30-39 age group 17.21% [4,528]. Of note is the amount of children and young adults [12-14 and 15-24 year olds] who declared that they regularly watch teleshopping [11.44% and 10.19% respectively]. Analysed by district, the Northern Harbour area registered the highest amount of teleshopping viewers [34.39%; 9,045] followed by those of the Southern Harbour [19.48%; 5,124] - see Table 5.2 and Figures 5.2.a-c below.

FIGURES 5.2.A-C: TEleshopping BY BROADCASTING STATION: BY GENDER, BY AGE GROUPS AND BY DISTRICTS [JUL/SEP 2012]

6. RADIO AUDIENCES

For this assessment, the N.S.O. weighted each respondent to be representative of the whole population, giving a grossed-up population of 372,447 representing all those over 12 years old. In the calculation of audiences, this grossed-up calibration weight is used. The daily half-hour slots by broadcasting station can be found in Appendix E: these have been calculated on the calibration weight provided while the data was rounded to the nearest thousand.

6.1 WEEKDAYS-AVERAGE AUDIENCE SHARE

The Weekday-average Audience Share for all the week-days by radio broadcasting stations is presented in Table 6.1 and Figure 6.1 below and Table 6.4 in Part 2 of this report. Overall, in total from Monday to Sunday, ONE Radio has attained the highest daily average of listeners [%: 2.221%; N: 8,271] with its highest average on Saturdays which was also the highest average amount of listeners that logged-on to a particular station on any day. ONE Radio was also the highest followed station for all the weekdays except for Fridays where Bay Radio had the highest average [%: 1.437; N: 5,462] amongst all stations. Bay Radio was also the second highest overall average [%: 1.539; N: 5,733]. The third overall highest average was attained by Calypso Radio [%: 1.098; N: 4,171].

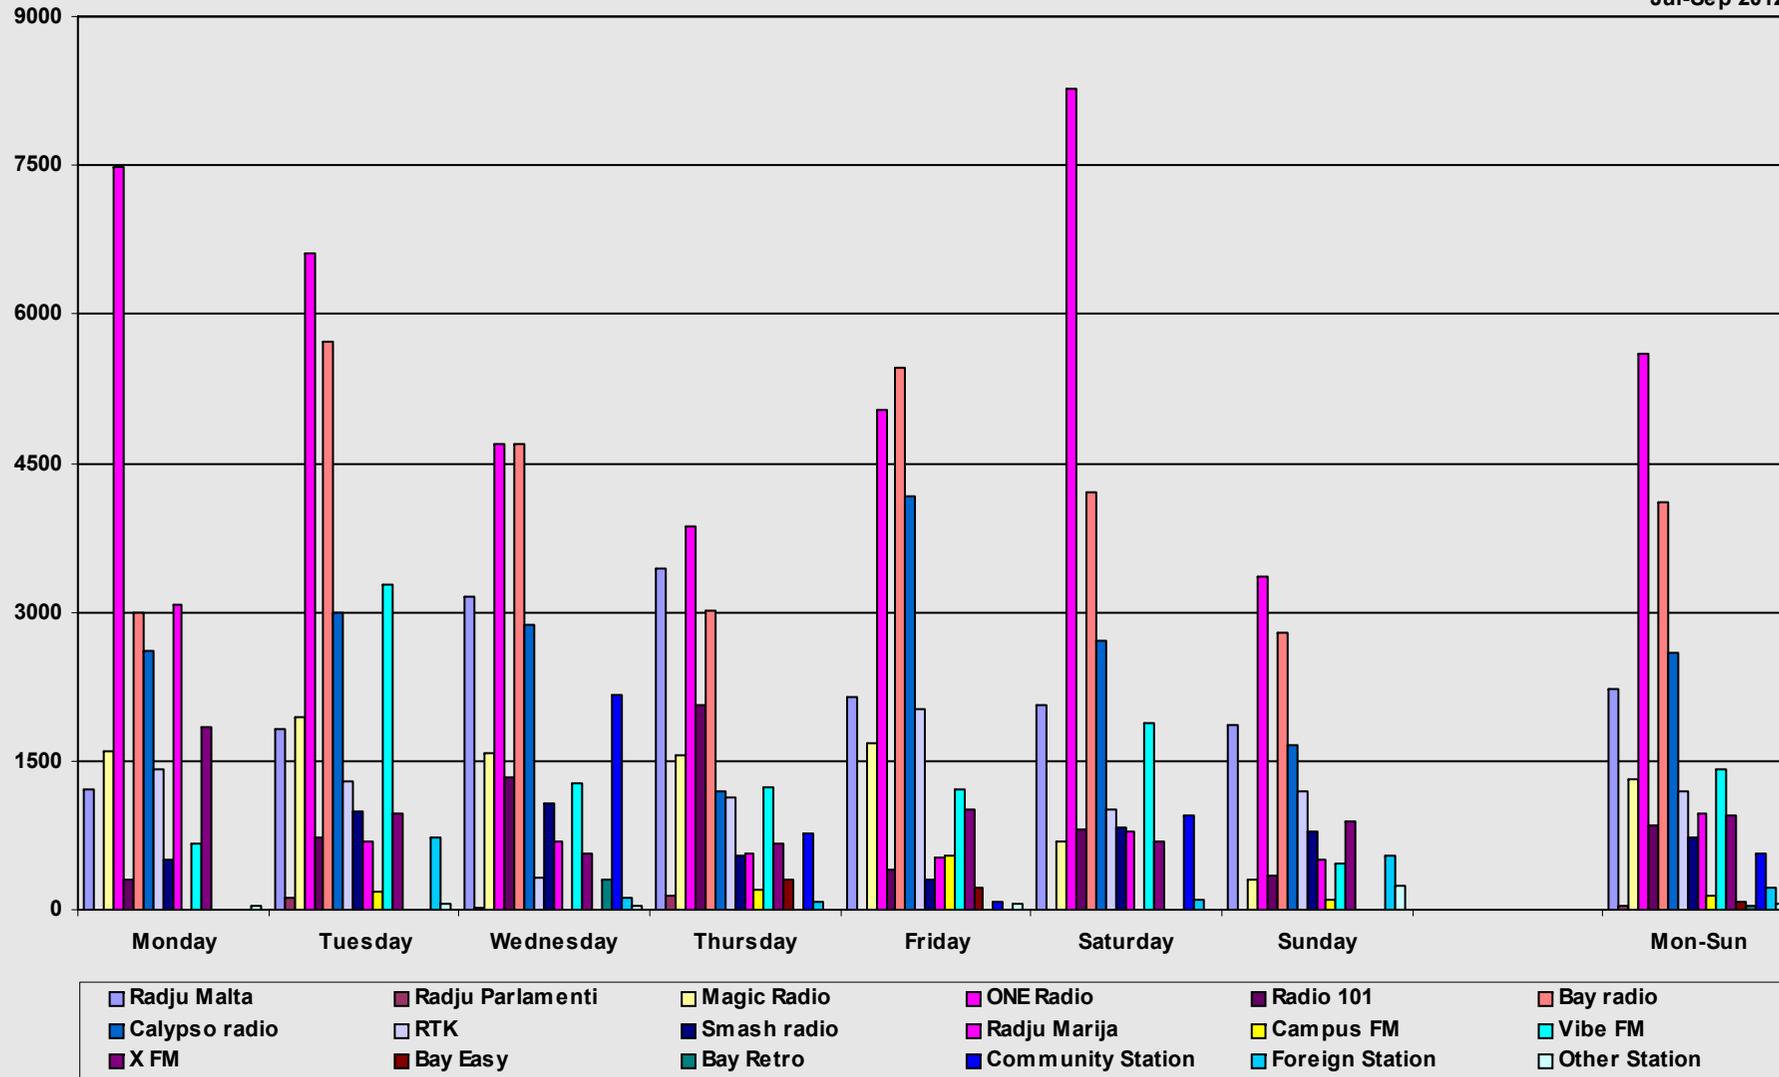

FIGURE 6.1: RADIO WEEKDAY-AVERAGE AUDIENCE SHARE [JUL/SEP 2012]

6.2 WEEKDAYS PEAK AUDIENCES

Another indication of a radio station's popularity with its audiences is the highest percentage/number of audiences obtained at any particular time for each week-day. The Weekday Peaks attained by each radio broadcasting station are summarized in Table and Figure 6.2 below. The most followed station was ONE Radio on Saturdays and Bay Radio on Tuesdays

FIGURE 6.2: RADIO WEEKDAY PEAK AUDIENCES [JUL/SEP 2012]

6.3 DAILY AUDIENCE SHARE

The following figures map in detail the daily audience shares for radio broadcasting stations at half-hour intervals. The Figures 6.3.a – 6.3.g below are taken from Tables 6.3.a – 6.3.g in Part Two of this report, which represent the total audience counts as a percentage of the total for each particular week-day. Included in the tables are statistics for (a) the daily average audience; (b) the highest daily peak audience; and (c) the standard deviation – for each particular broadcasting station.

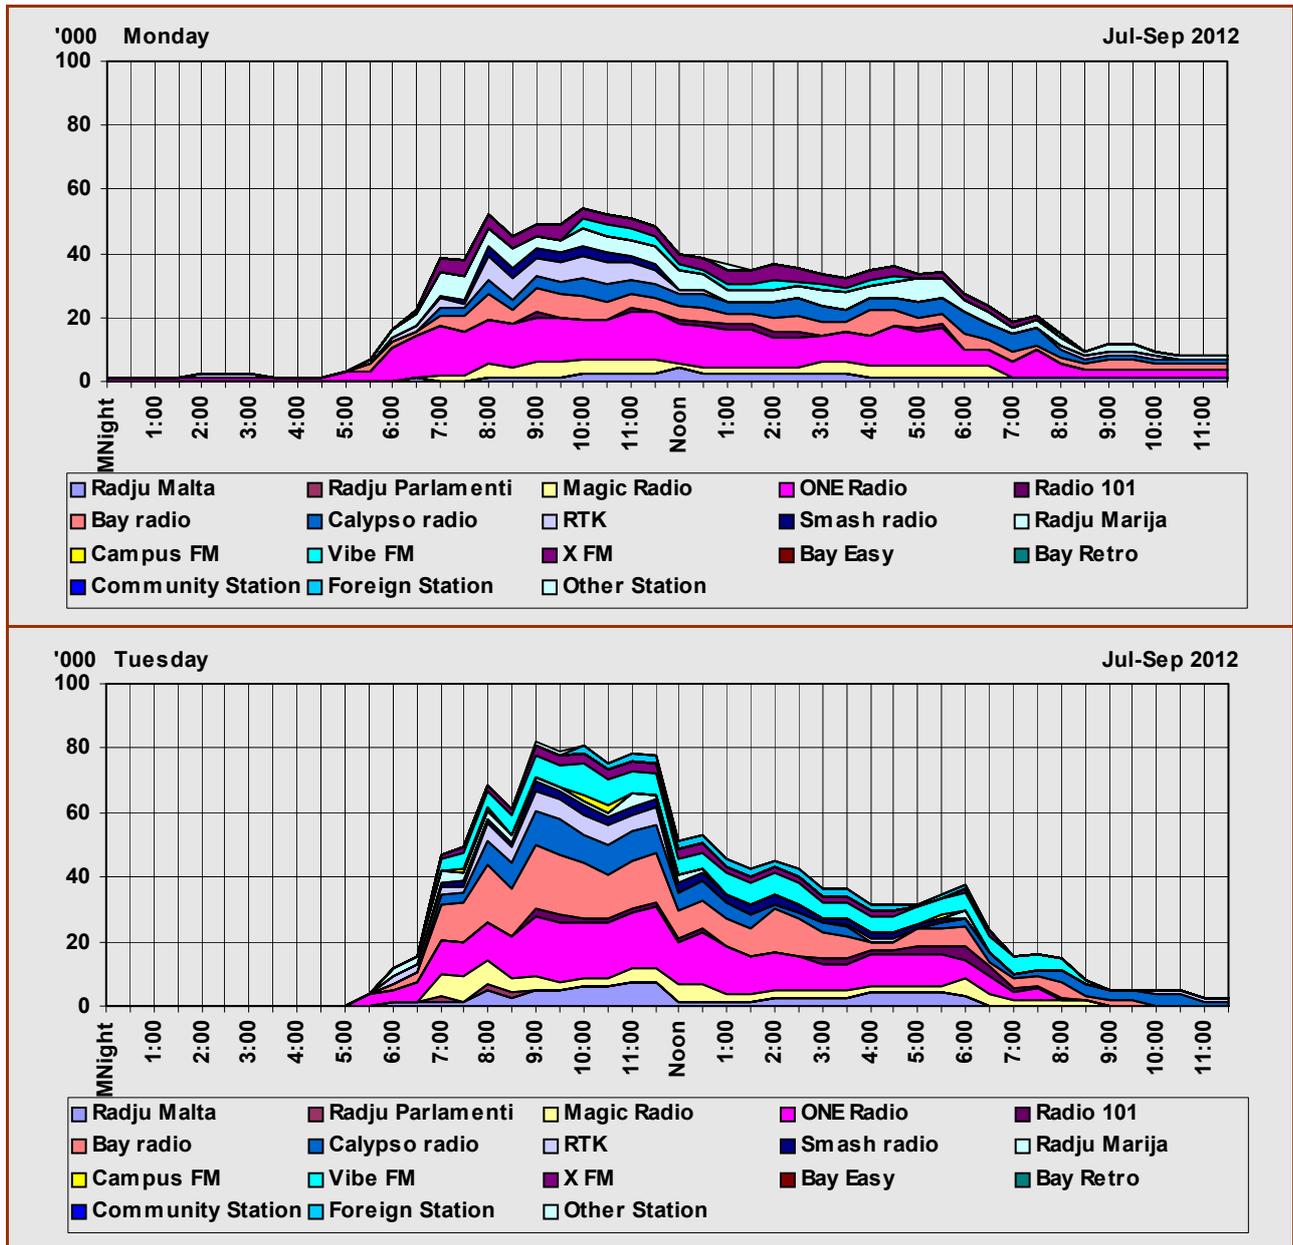

FIGURE 6.3.A-B: RADIO DAILY AUDIENCES BY TOTAL AND BY STATION: MONDAYS-TUESDAYS

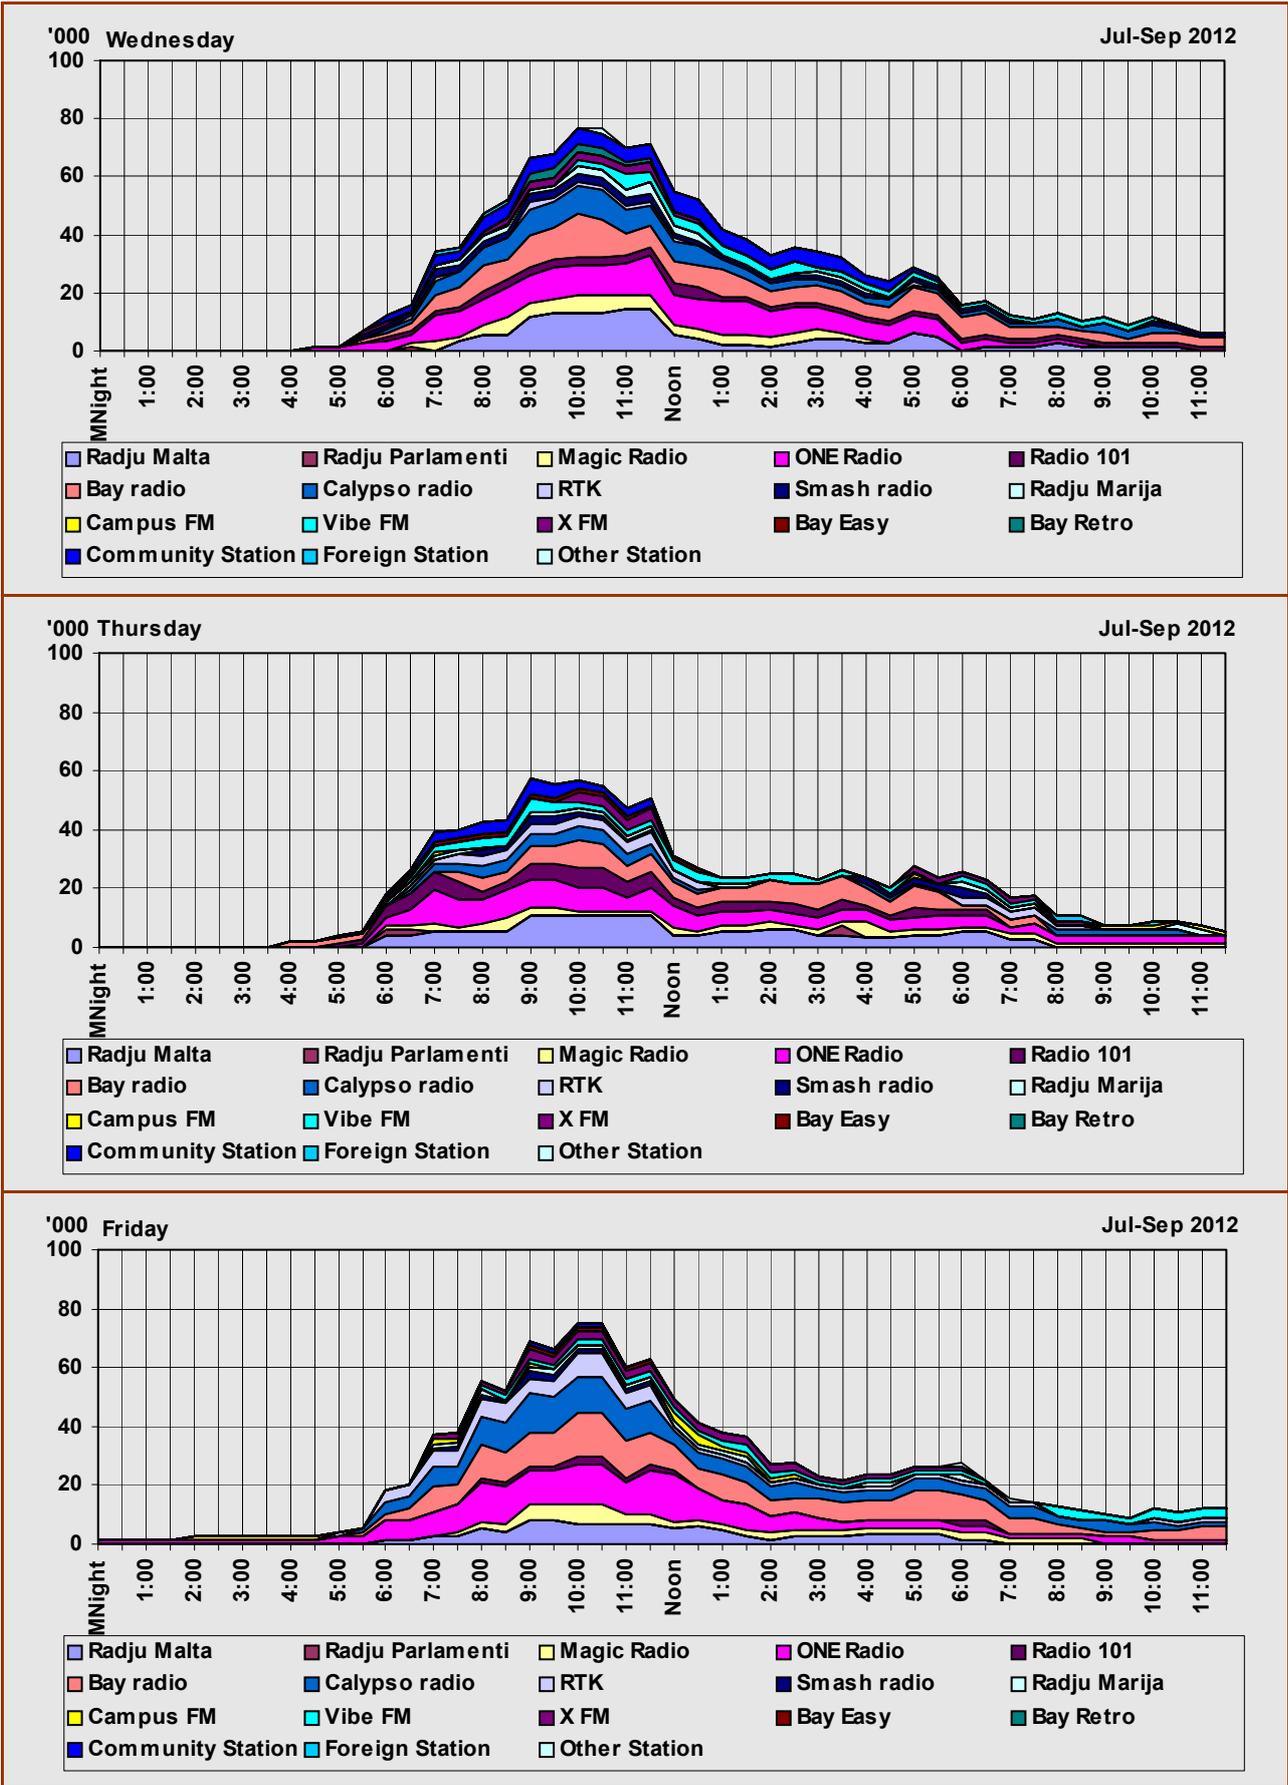

FIGURE 6.3.C-E: RADIO DAILY AUDIENCES BY TOTAL AND BY STATION: WEDNESDAY – FRIDAY

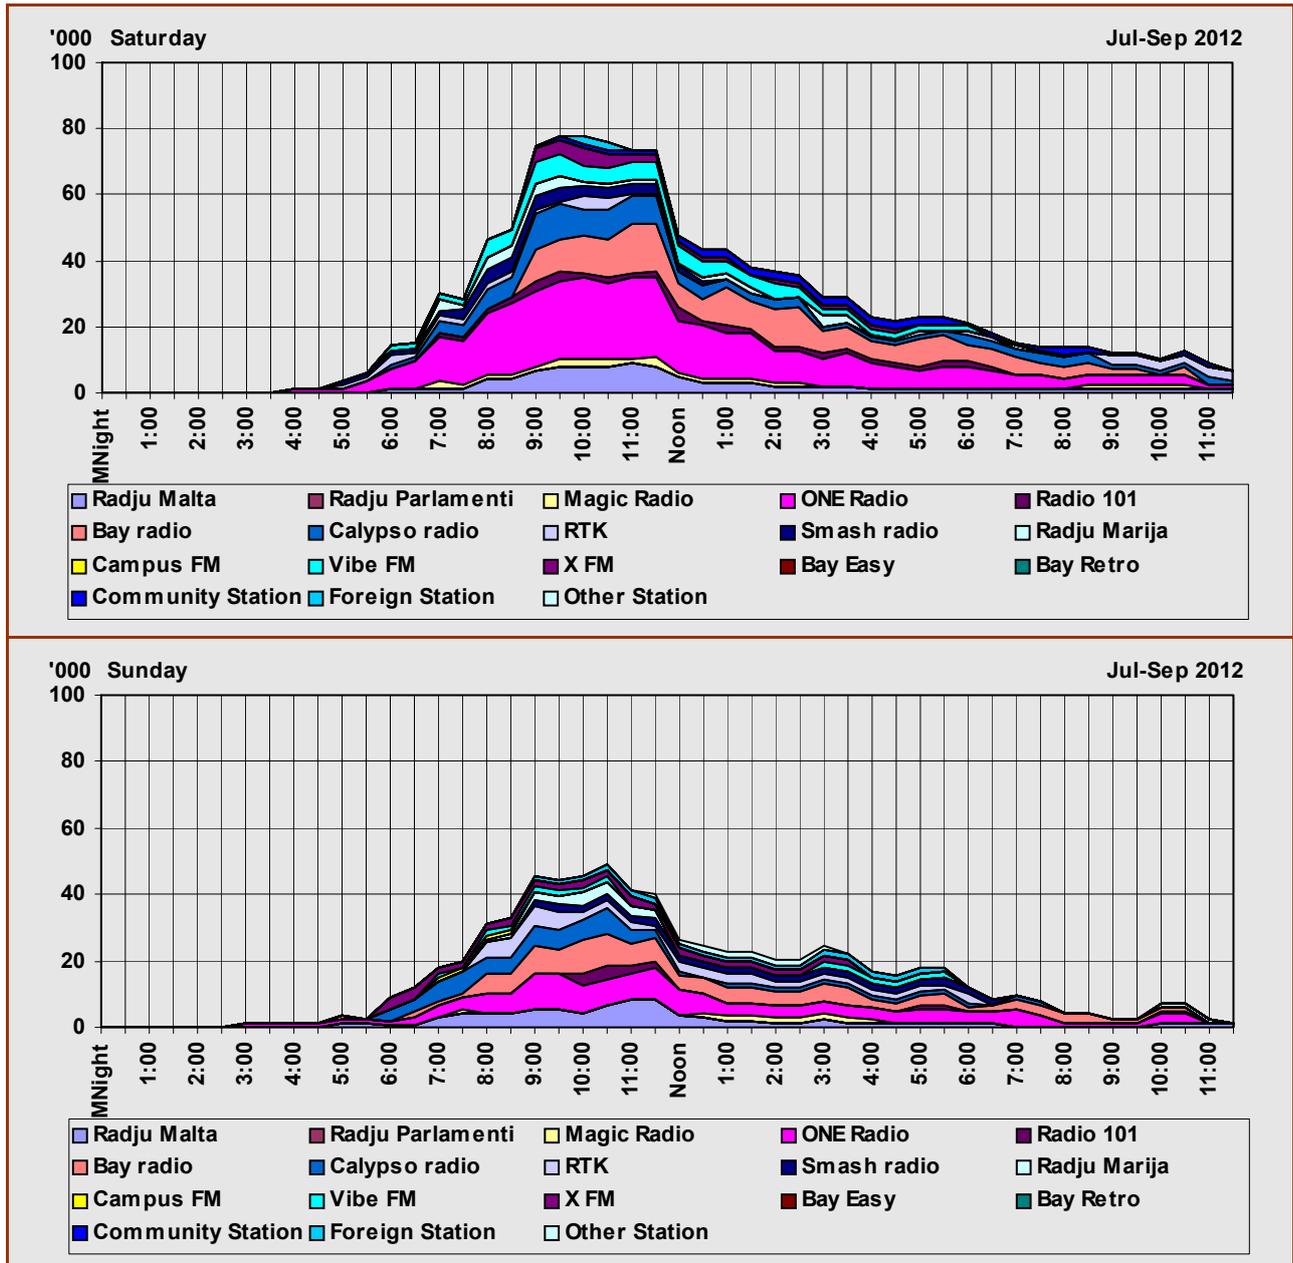

FIGURE 6.3.F-G: RADIO DAILY AUDIENCES BY TOTAL AND BY STATION: SATURDAY – SUNDAY

6.4 RADIO AUDIENCE SHARE

Taking all the audiences for all the weekdays, the daily average radio audience share attained by each broadcasting station is shown in Table 6.4 and Figure 6.4 below, and Table 6.4 in Part Two. Overall, ONE Radio ranked first with 24.22% of all audiences, followed by Bay Radio [17.80%] and Calypso Radio [11.21%].

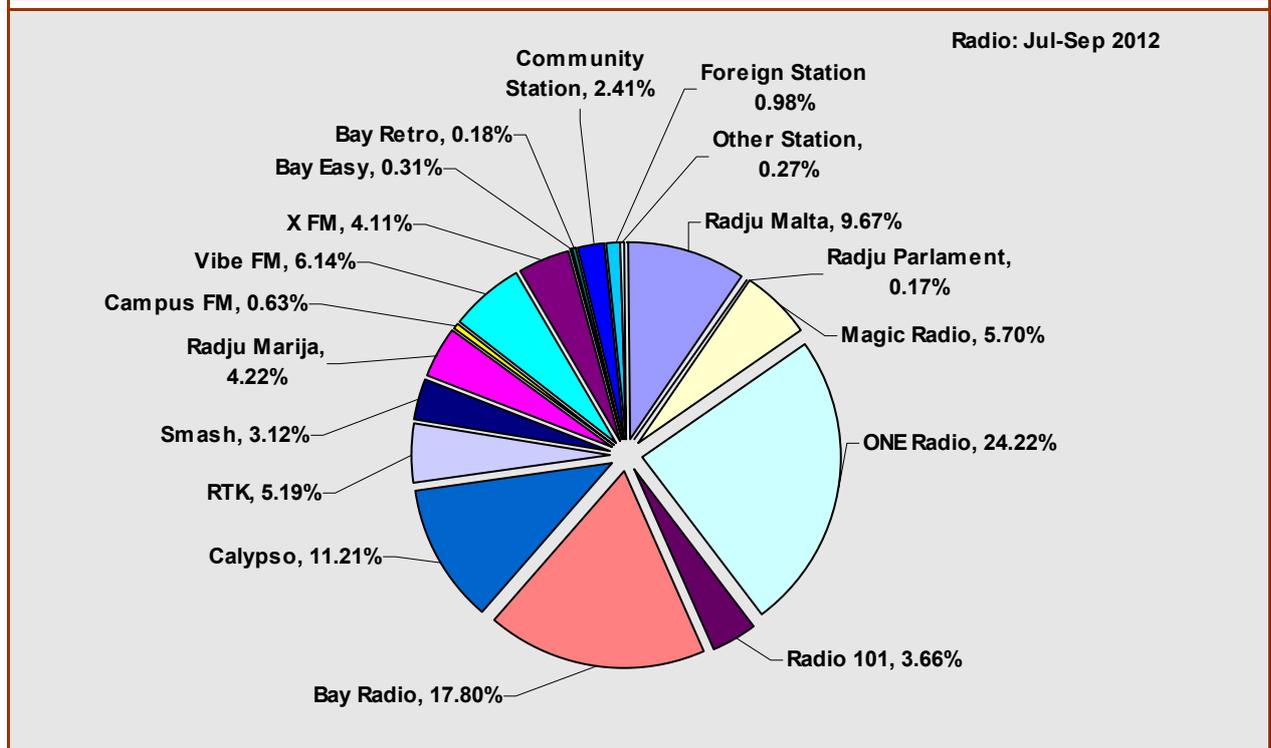

FIGURE 6.4: RADIO TOTAL DAILY AVERAGE AUDIENCE [JUL/SEP 2012]

7. TV AUDIENCES

Similar to radio audiences, the daily half-hour slots by TV broadcasting station can be found in Appendix F: these have been calculated on the calibration weight provided while the data was rounded to the nearest thousand.

7.1 WEEKDAYS-AVERAGE AUDIENCE SHARE

The Weekday-average Audience Share for all the week-days by television broadcasting stations is presented in Table 7.1 and Figure 7.1 below and Table 7.4 in Part 2 of this report. Of the local stations TVM has attained the highest average of 1.411% [N: 5,256] while ONE attained the second overall average of 1.335% [N: 4,972] of all TV audiences. The highest average attained by TVM was that on Sundays with 1.411% [N: 5,256] followed by that of Fridays with 1.162% [N: 4,327]. On the other hand, ONE attained its highest average on Tuesdays [%: 1.335; N: 4,972] and attained the highest average viewing from all stations on Mondays, Thursdays, and Saturdays. TVM2 attained the third highest average of 0.621% [N: 2,313] on Sundays.

Overall, from Monday to Sundays, ONE attained the highest average at 1.149% [N: 4,972].

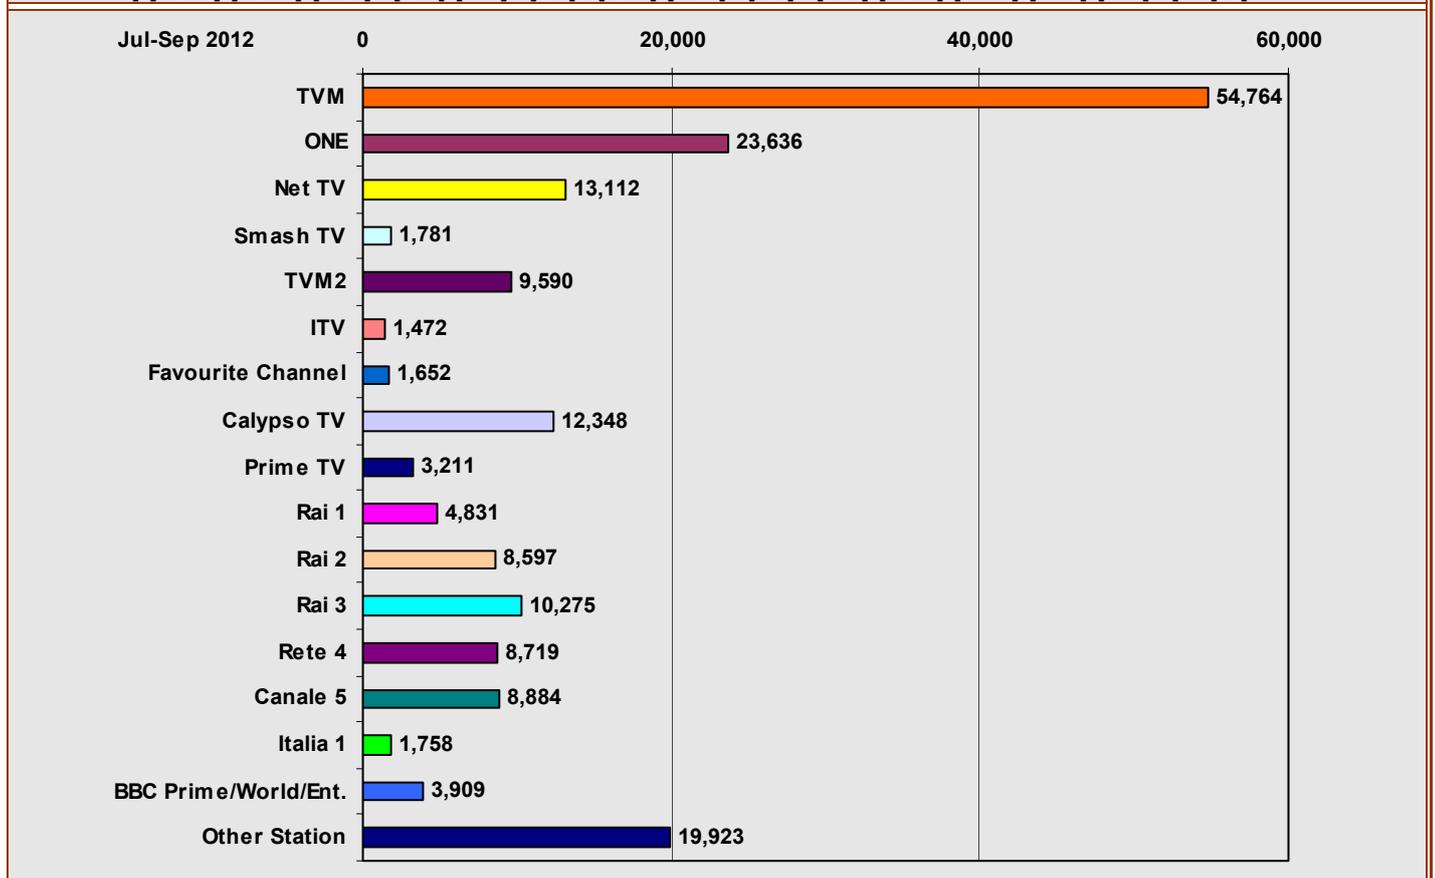

FIGURE 7.2: TV WEEKDAY PEAK AUDIENCES [JUL/SEP 2012]

7.3 DAILY AUDIENCE SHARE

The following figures map in detail the daily audience shares for television broadcasting station by half/quarter-clock hour. The Figures 7.3.a – 7.3.g below are taken from Tables 7.3.a – 7.3.g in Part Two of this report, which represent the total audience counts as a percentage of the total week-day audiences. Included in the tables are the same statistics as those calculated for Radio consumption for each particular broadcasting station; i.e. (a) the daily TV average audience; (b) the highest daily peak TV audience; and (c) the standard deviation.

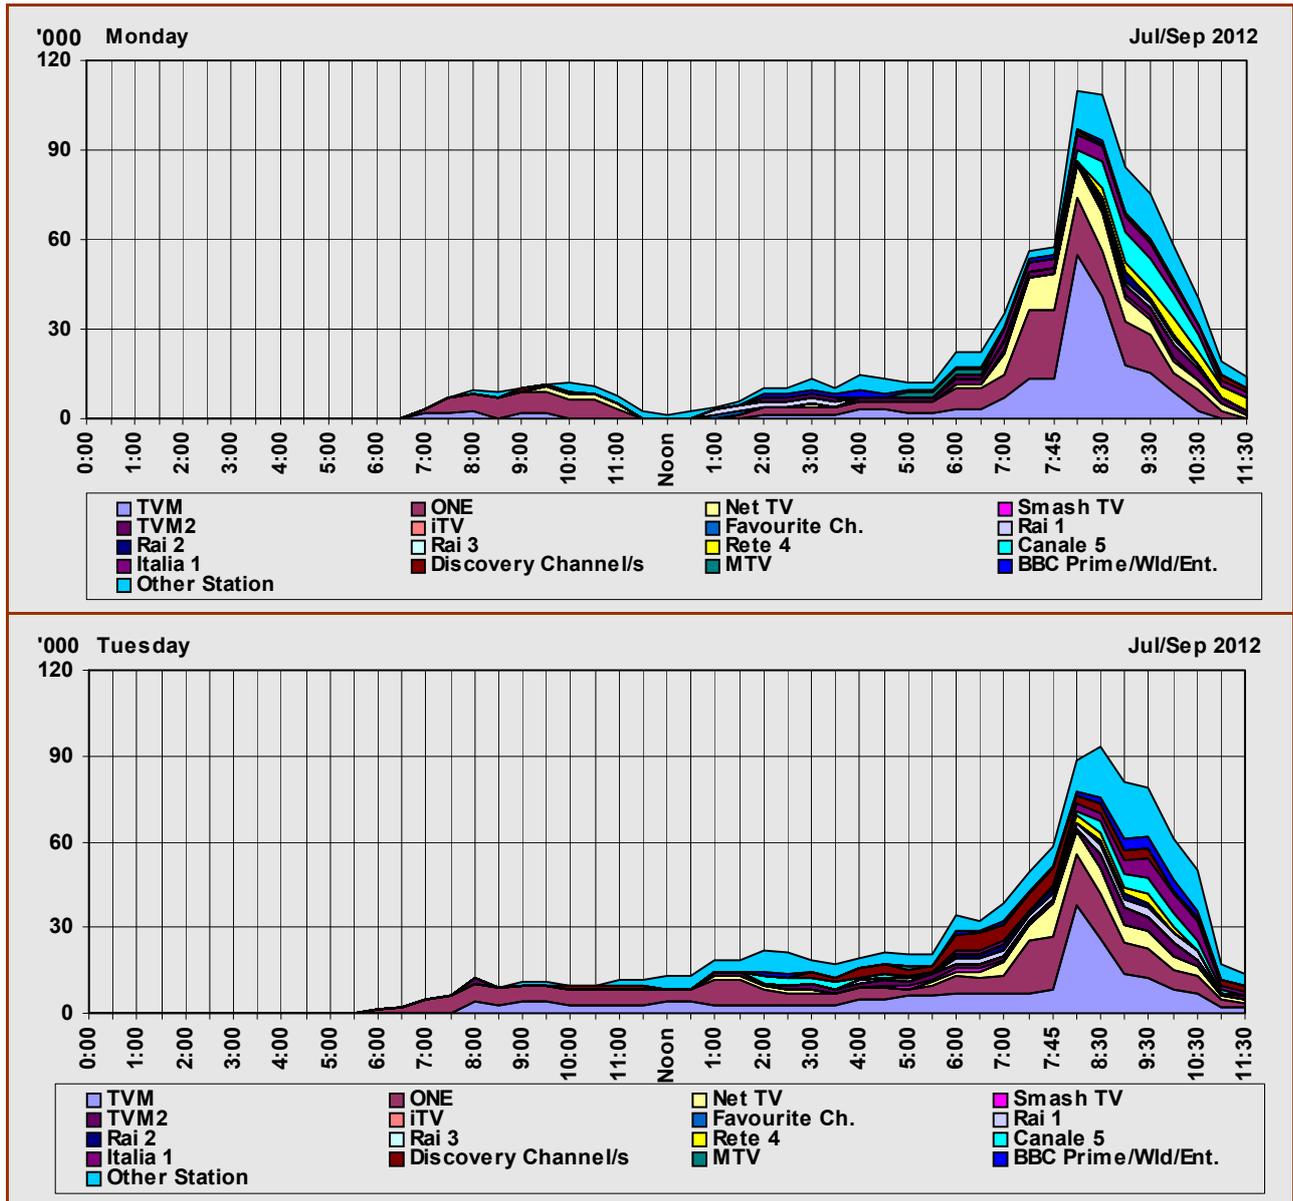

FIGURE 7.3.A-B: TV DAILY AUDIENCES BY TOTAL AND BY STATION: MONDAYS-TUESDAY

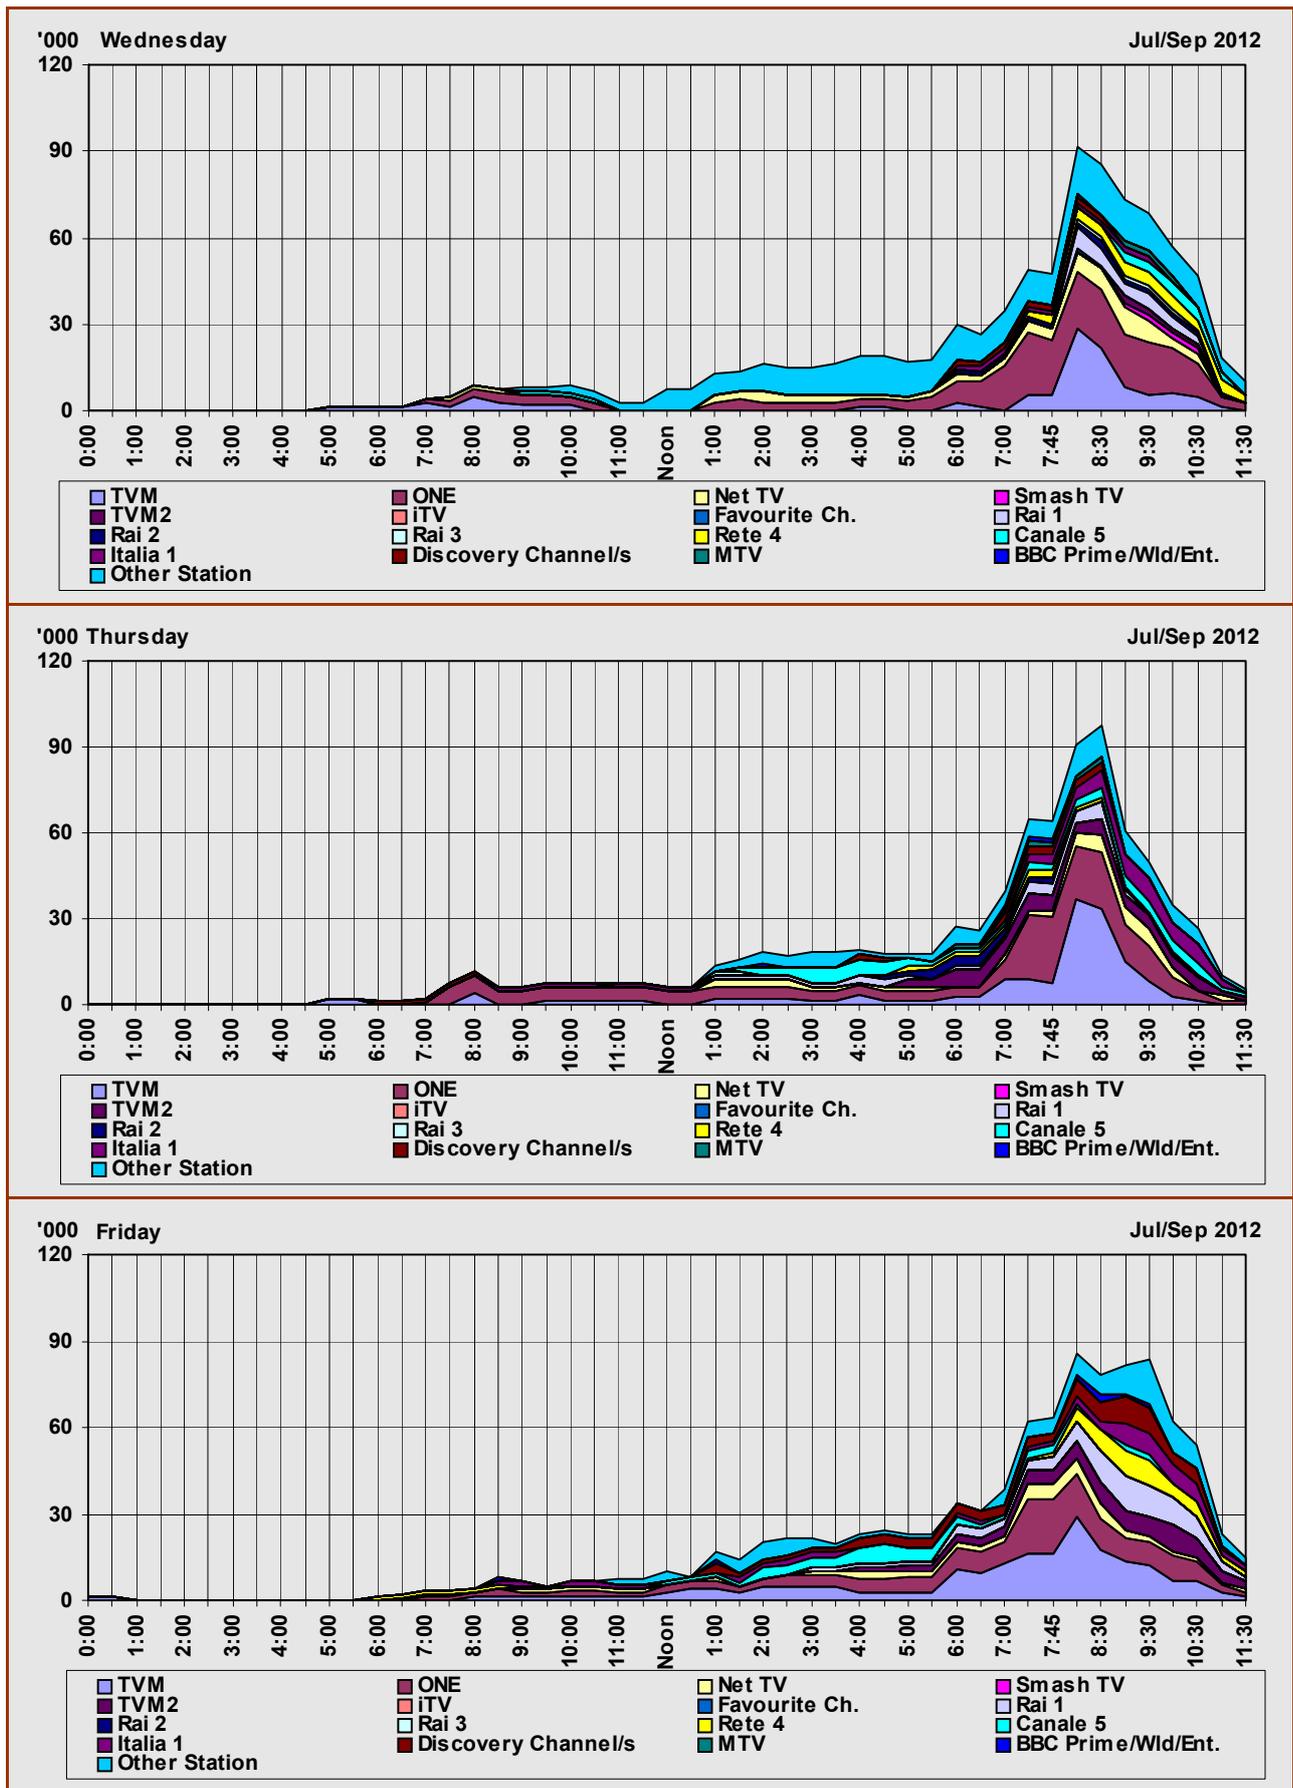

FIGURE 7.3.C-E: DAILY AUDIENCES BY TOTAL AND BY STATION: WEDNESDAY-FRIDAY

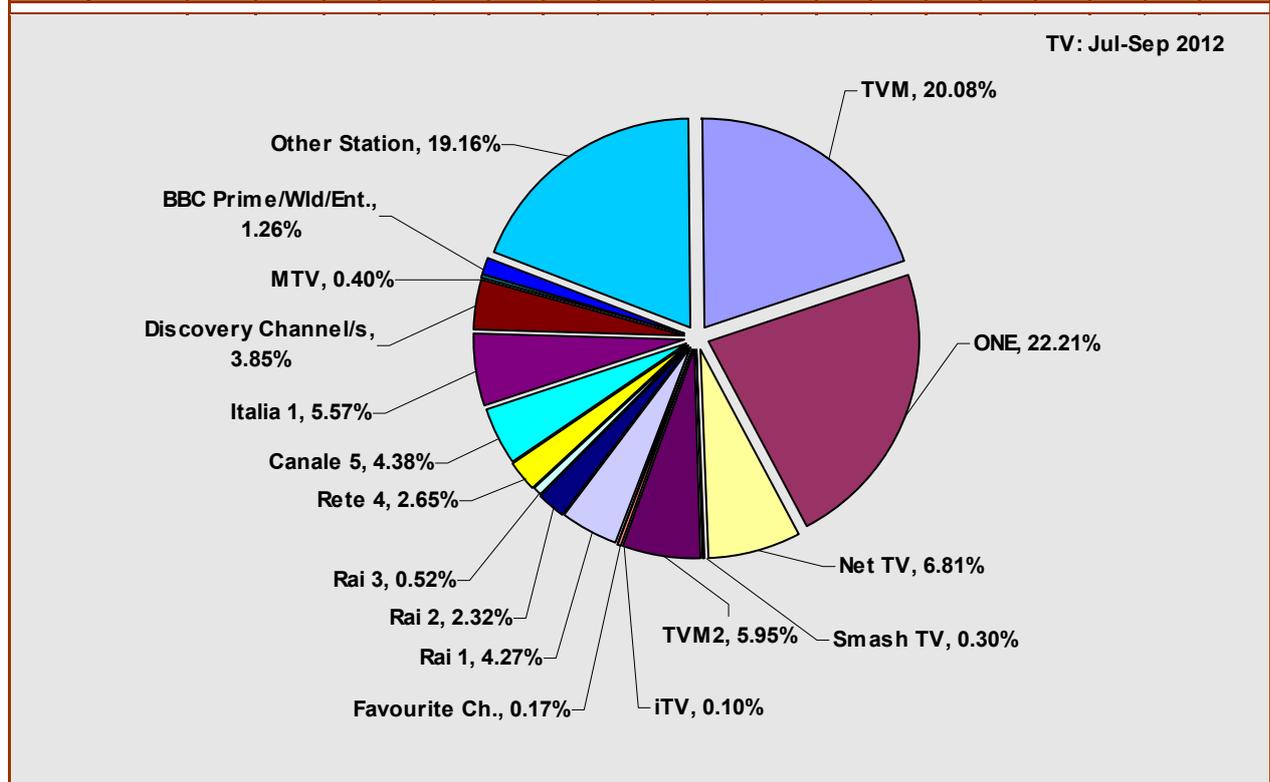

FIGURE 7.4: TV TOTAL DAILY TV AVERAGE AUDIENCE [JUL/SEP 2012]

8. RADIO AND TV CONSUMPTION

Calculating the average number of hours that radio listeners and television viewers spend on a daily basis listening/viewing their reception media is another data that indicates the number of hours that consumers were captured by the respective broadcasting stations; or rather for how long did each broadcasting station manage to maintain, on average, its audiences.

8.1 Daily Hours of Radio Consumption

The total number of hours spent by consumers was analysed by broadcasting station and divided by the total number of consumers per station. The total effective Radio hours spent by consumers for this period stands at **3.53 hrs** which was 0.47 hrs [or 00:28:11] **more** than the average hours consumed the same period last year. The analysis by Radio station is represented in Table 8.1 and Figure 8.1 below:

TABLE 8.1: RADIO DAILY CONSUMPTION BY HOURS: BY STATION [JUL/SEP 2011-2012]

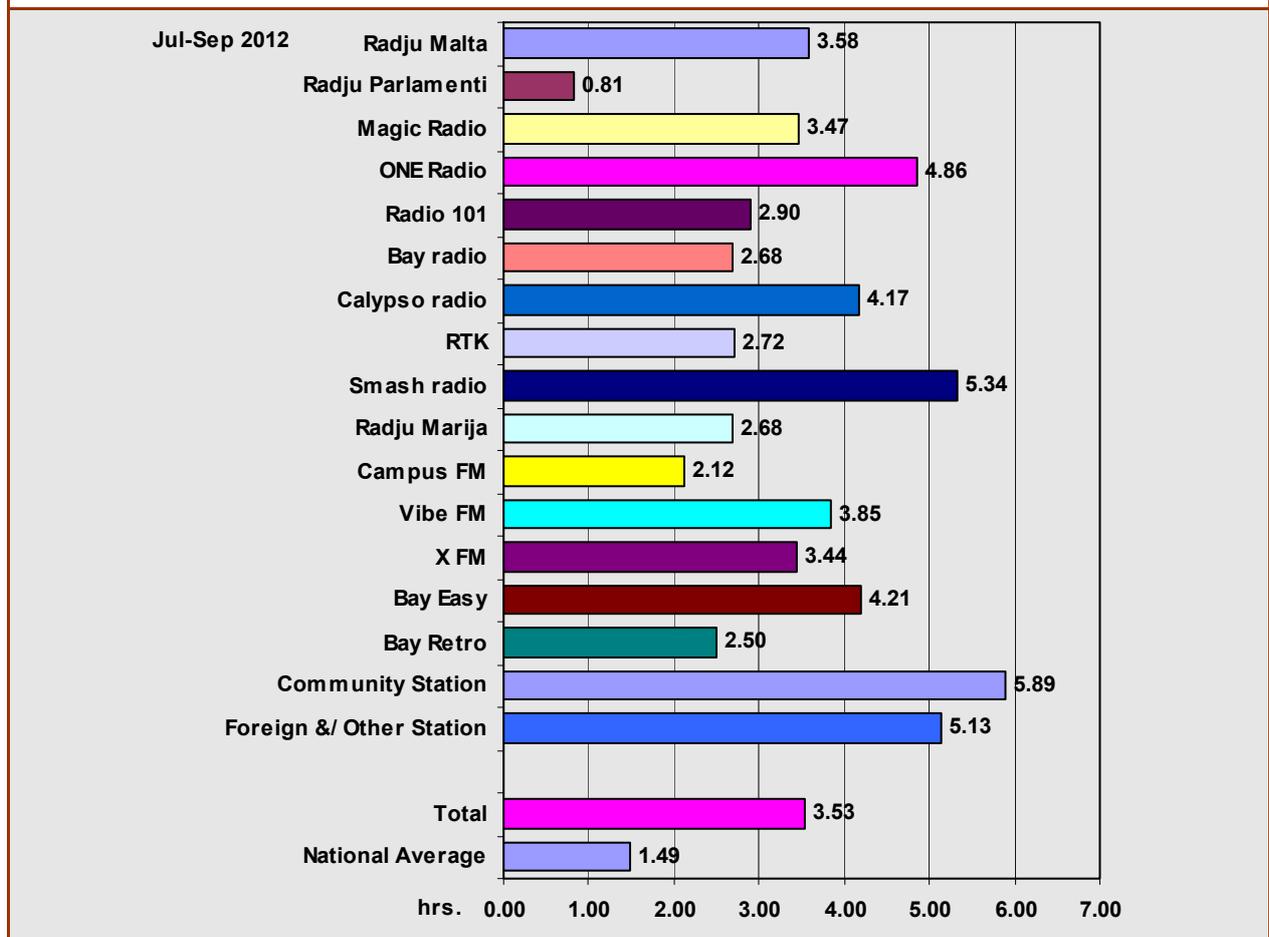

FIGURE 8.1: RADIO DAILY CONSUMPTION BY HOURS AND BY STATION [JUL/SEP 2012]

Taking the total number of hours of radio listening over the total sample of people interviewed including those who did not listen to radio, the overall average hours of radio listening spent by consumers for this period stands at **1.49 hrs** every day.

This data has been compiled using similar data collection and analysis methods since October 2006. Taking all the data by quarter since July-September 2008, it can be seen that the total number of hours that regular radio listeners spent listening to programmes has slightly increased by 0.26% from 3.27hrs for July-September 2008 to 3.53 hrs for this period under assessment. Taking the total sample [i.e. including also those who did not listen to radio] the overall national average decrease for the whole period from 2008 to-date is of 7.45% [from 1.61 hrs to 1.49 hrs] indicating that more people are turning to other forms of media platforms – see Table 8.2 and Figure 8.2 below.

8.2 Daily Hours of TV Consumption

The total number of hours spent by consumers analysed for each TV broadcasting station was again divided by the total number of consumers per station. The total effective TV hours spent by consumers for this period stands at **2.23 hours**. Taking the total number of hours of TV viewing over the whole population, the national average hours of TV viewing consumed stands at **1.20 hours** every day. The analysis by TV station is represented Table and Figure 8.4 below:

TABLE 8.4: TV DAILY CONSUMPTION BY HOURS BY STATION BY QUARTER [OCT/DEC 2009 – JUL/SEP 2012]

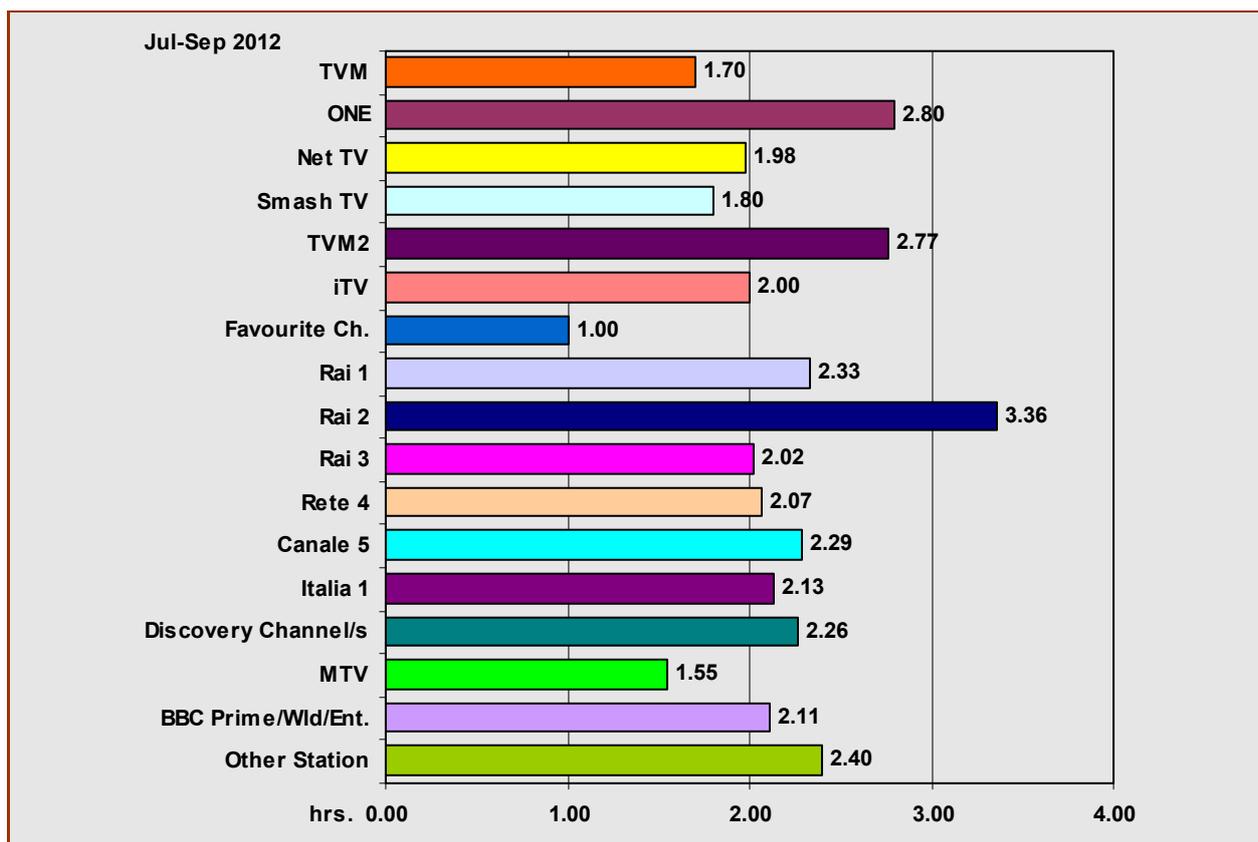

FIGURE 8.4: TV DAILY CONSUMPTION BY HOURS AND BY STATION [JUL/SEP 2012]

Similar to Radio data has also been compiled using similar data collection and analysis methods since October 2006. Taking all the data by quarter it can be seen that the total number of hours that regular TV viewers spent watching programmes has increased by 1.83% [00:01:06] over the same period last year from 2.19 hours to 2.23 hours. The national average, on the other hand, has decreased by 11.76% [00:07:03] from 1.36 hours to 1.20 hours – see Table 8.5 and Figure 8.5 below:

TABLE 8.5: TOTAL TV AVERAGE CONSUMPTION BY HOURS BY QUARTER [JUL/SEP 2008-2012]

8.3 Radio Consumption by Time Brackets

The same time-brackets used in previous audiences were again used for this analysis: radio and TV consumption was analysed by such broad time-brackets to highlight consumption trends at different time-periods of the 24-hour clock.

For this analysis data was taken from the counts of all viewers and listeners while taking into consideration the time spent. The data was analysed first in total by demographic factors as gender, age group, and district and by time period (weekday and month) – see Table and Figure 8.7. The same counts were then analysed by broadcasting station; the summary of which is listed in Table and Figure 8.8 below. Each station's data was then analysed by broadcasting station and is found in Part Two of this report.

8.4 TV Consumption by Time Brackets

The same systematic analysis as in the previous section was repeated for TV – see Table and Figure 8.9, Table and Figure 8.10 below, and Part Two of this report.

TABLE 8.7: WEIGHTED RADIO CONSUMPTION BY TIME BRACKET: BY GENDER, BY AGE GROUPS, BY DISTRICTS, BY WEEKDAYS AND BY MONTHS [JUL/SEP 2012]

	Total	Gender		Age Groups							Districts						Weekdays							Months

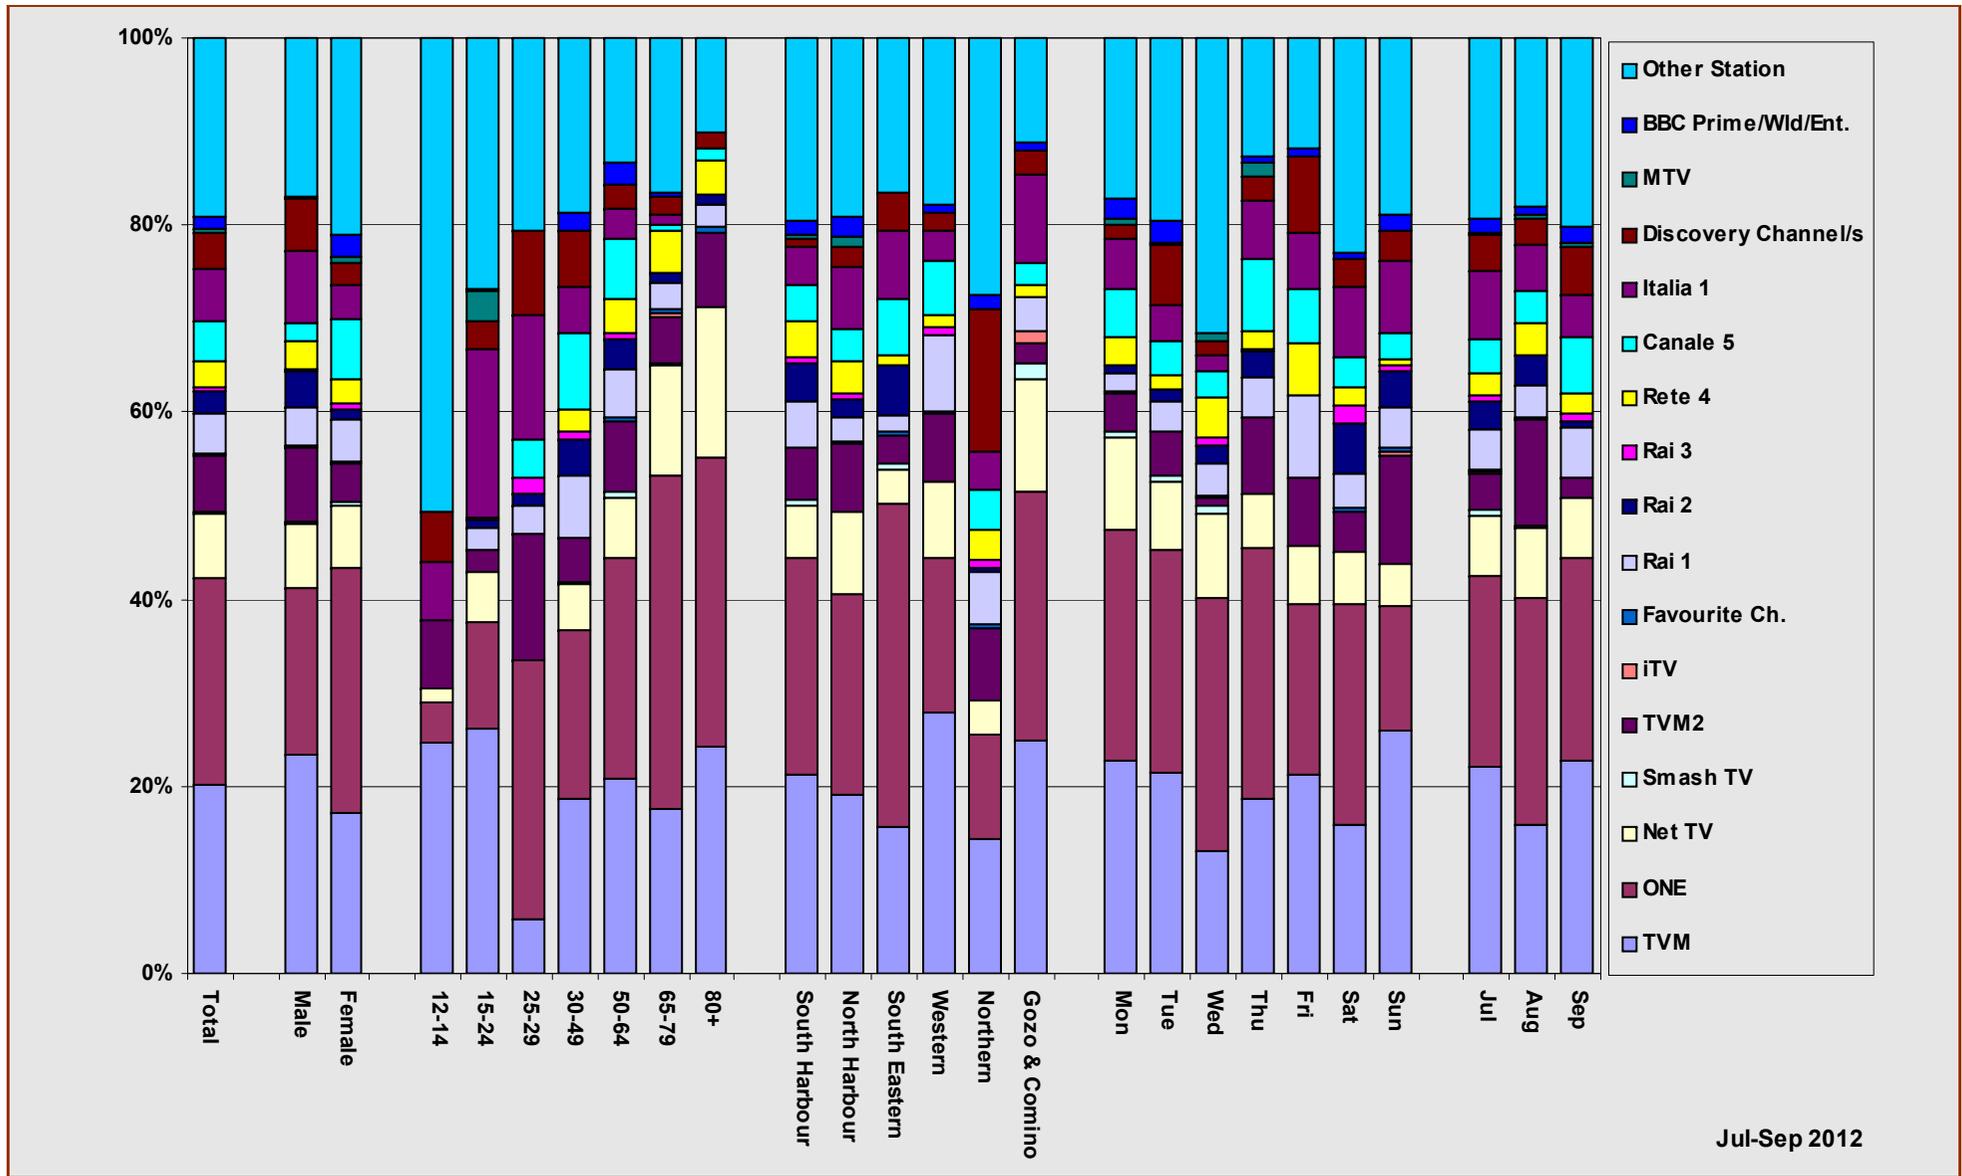

FIGURE 8.10: WEIGHTED TV AUDIENCES BY STATION: BY GENDER, BY AGE GROUPS, BY DISTRICTS, BY WEEKDAYS, AND BY MONTHS [JUL/SEP 2012]

8.5 What 12-14 year olds are viewing?

Interesting to note is the spread of TV viewing of 12-14 years olds. TV viewing of this group is spread amongst all the time-brackets discussed above [see Table 8.9] with 14.68% of this group viewing television before noon, 15.32% of this group at prime time, while 5.93% view television after 10:00 pm. Besides, 24.71% of this group stated that they watch TVM while 50.582% watch “Other TV station” [see Table 8.10 above].

Analyzed by weekday, viewing was consistent throughout the whole week with the highest percentage for Tuesdays [31.22%], Sundays [18.18%] and Mondays [12.82%] while the lowest amount of viewers of this age group was for Wednesdays at 6.63% – see Table and Figure 8.11 below. During this period viewing was exceptionally high in the afternoon [%: 46.04; N: 23,895] especially for Tuesdays and Sundays. Post watershed viewing reached 15.32% [7,950] while 5.93% of 12-14 year olds viewed TV after 10:00pm.

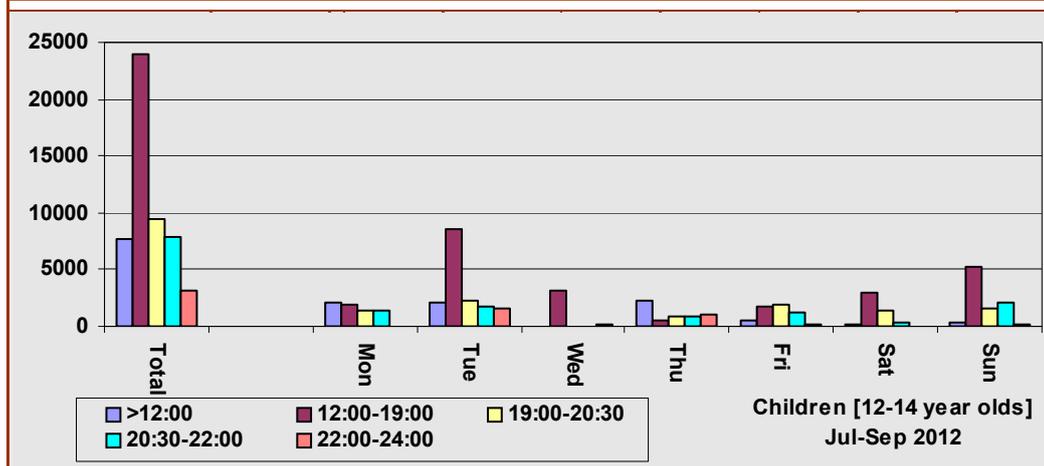

FIGURE 8.11: CHILDREN 12-14 YEAR OLDS – TV VIEWING BY WEEKDAY [JUL/SEP 2012]

Analyzed by broadcasting station, Disney Channel [%25.1; N: 13,025] was the most watched channel by this age group, followed by TVM [%: 24.61, N: 12,773], E! Entertainment [%:10.09; N: 5,237] and TVM2 [%:7.35%; N: 3,817] – see Table and Figure 8.12 below.

These findings have to be analysed in view of the fact that 12-14 year olds tend to be on Summer holidays during this period under review.

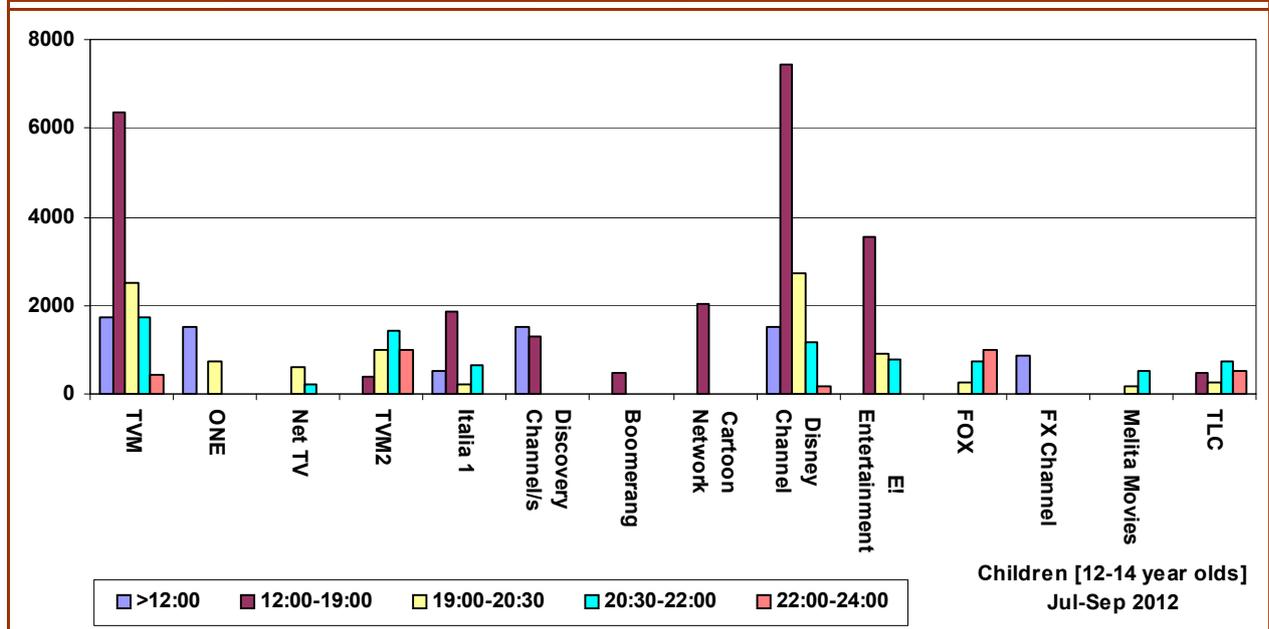

FIGURE 8.12: CHILDREN 12-14 YEAR OLDS – TV VIEWING BY STATION [JUL/SEP 2012]

Analysed by time slot, no 12-14 year olds registered as televiewers before 06:00am and the stations followed by noon were TVM [1,719], Disney Channel [1,527], and ONE and Discovery Channel [1,495]. Between noon and 7:00pm audiences peaked for Disney Channel [7,483], TVM [6,365] and E!Entertainment [3,550]. By 8:30 pm, Disney Channel [2,727] still ranked first closely followed by TVM [2,513]. For after 10:00 pm, TV viewing was most for TVM2 [982] followed by FOX [977] and TLC [525] – see Table and Figure 8.13 below.

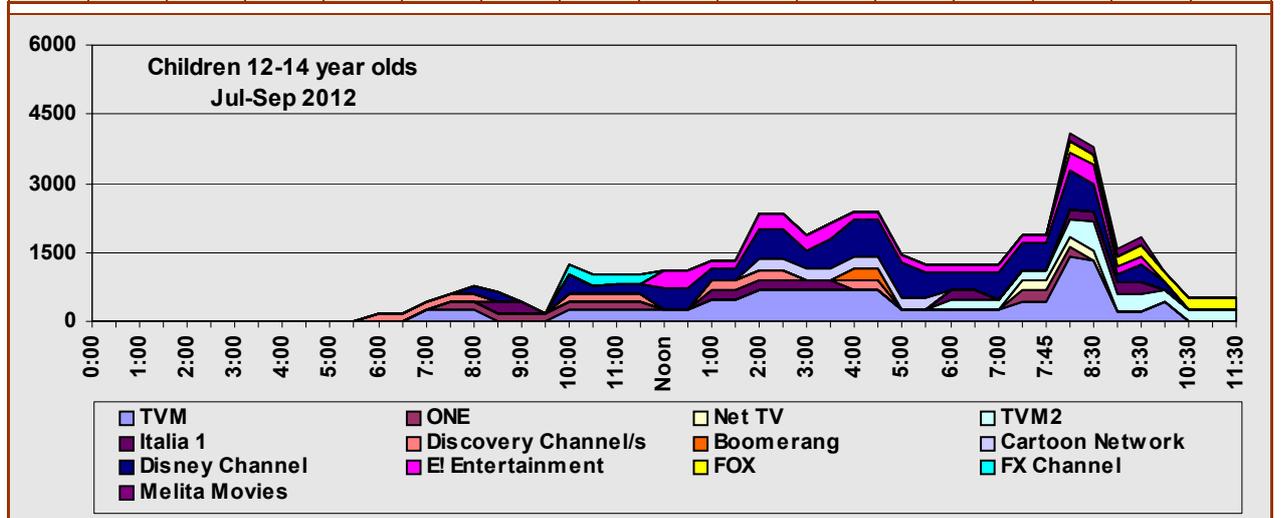

FIGURE 8.13: CHILDREN 12-14 YEAR OLDS – TV VIEWING BY TIME-SLOT [JUL/SEP 2012]

9. TV PROGRAMME PREFERENCES

Respondents were asked to list “their most favourite three programmes”. This is not a ‘beauty content’ between programmes or producers, but rather the Authority wants to research what type of programmes local consumers would prefer. Nor does it represent the actual audiences shares of particular programmes attained by the respective broadcasting stations through the analysis of the weekday half-hour slots as discussed earlier. The analysis of this data would help producers and broadcasters better develop their services on broadcast media according to the expectations of consumers.

Instead of listing a series of programme genres which respondents could choose from [such as local news; foreign news; current affairs; sports; weather; feature films; serials and soap operas; documentaries; etc] it was decided to ask for the three most preferred programmes. The determination of genres of programmes broadcast is not always clear, as most locally produced programmes would fall in more than one single genre. To take an example, the main news bulletin at prime time could easily contain various genres as local news, foreign news, news features, current affairs exponents, sports summary bulletin, as well as the weather forecast. Morning breakfast shows would then contain a synopsis of all these included with other programme sections as childrens’ corner, household maintenance, art and culture, and quizzes/game shows/variety creations.

The programmes named in no way reflect the quality of the programmes broadcast as theoretical quality in media would also consider other areas as broadcasting compliance by broadcasters, resources deployment, and staff professionalism. However, it does indicate consumers’ perception of media with regard to its perceived three major areas: entertainment, information and education.

Respondents were given the possibility of naming three programmes broadcast on local TV stations while allowing also for two other types of responses: respondents could state that they do not regularly watch television; and/or they could also state that they do not watch local television programmes.

The programmes mentioned were classified according to their declared order by each respondent [i.e. the first, second and third named programme]; by their broadcast time as per the time-brackets in section 8.4 above; and by the broadcasting station on which it was broadcast. The programmes named were also compared to the broadcasting schedules as provided by each broadcasting station for this assessment period. Naturally, some of the programmes named were broadcast during previous broadcasting schedules; these were checked for repeated series on the same or other broadcasting station. Some of the programmes named either were of a generic nature, broadcast on radio or on the digital/cable network; or could not be properly identified as the programme named was a combination of programmes.

Named programmes that were re-runs were classified separately and not according to the time that they were re-broadcast.

The full list of programmes and their percentage to total programmes quoted for this assessment period is found in Part Two of this report; Table 9.1 below gives a summary of all the responses received for the last five broadcasting quarters; while Table 9.2 gives the analysis of this quarter by gender, by age group, and by district.

Totals may not tally due to weighting and rounding off

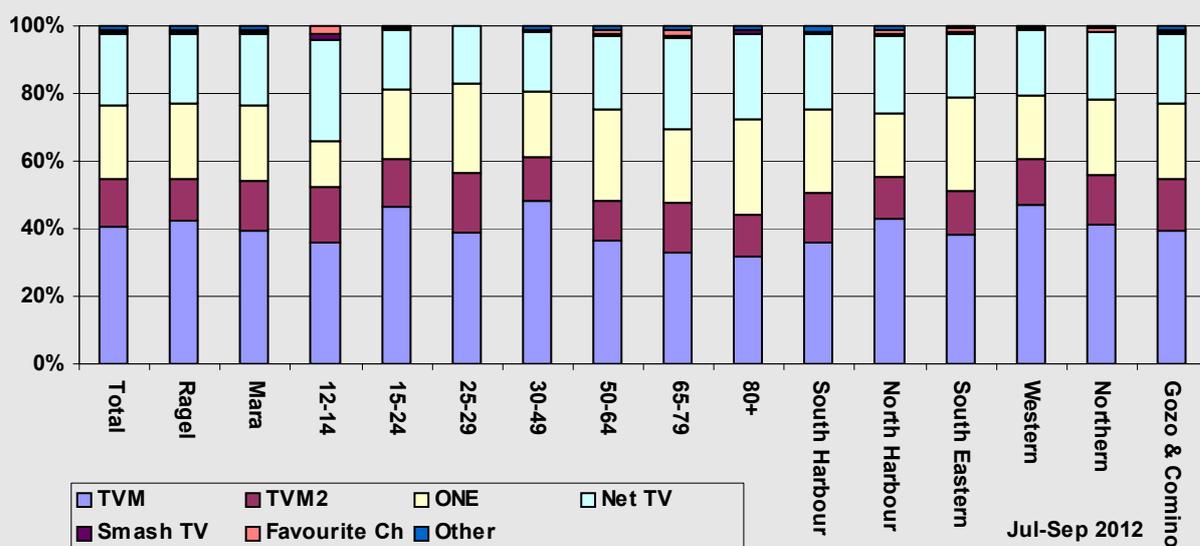

Over the past eight broadcast quarters the percentage of consumers who were able to identify their most three favourite programmes have remained nearly within the same percentage levels respectively – the exception being this quarter where total preferences have plummeted. Of note are those who have stated that they do not watch TV, do not watch local programmes, and do not have a favourite programme. For this group there was a substantial increase during this period of July-September 2012 where they have almost doubled. The total percentage of all named programmes has decreased by 45.5% over the previous quarter from 163.3% to 117.8%

Out of all the programmes named, TVM got 43.635% of all counts, followed by ONE with 22.201% and Net TV with 21.090; while 1.085% of all programmes named were either or of a generic programme type – see Table and Figure 9.3 below.

**FIGURE 9.3: PROGRAMMES NAMED BY STATION:
BY GENDER, BY AGE GROUPS, AND BY DISTRICTS [JUL/SEP 2012]**

Out of all the programmes identified by respondents, the most quoted was *News on TVM* with 14.174%; followed by *F'Salib it-Toroq* from previous broadcasts on TVM2 with 8.535%; and *News on ONE* with 7.560% - all prime time programmes.

Out of the ten most quoted programmes, five programmes were Drama with 27.735%; the main news bulletins of TVM, ONE, and NET TV ranked second with 27.109%; one was a re-broadcast Discussion Programme [*Xarabank*] with 6.913%; and one Light Entertainment [*Sellili*] with 2.756%.

News was quoted mostly by Males [35.989%] and by those over 30 years old. Drama was mostly quoted by females [34.413%] and by nearly all the age groups with the lowest being those of the 30-49 years old [22.397%]. The Discussion program *Xarabank* was favoured most by those in the 15-24 age group [11.563%] while the light entertainment programme *Sellili* was favoured most by those of the 25-29 age group.

The Programme "Gheruq" started with a new schedule of programmes for the new season which started in late September 2012.

Since it was also a programme in previous schedules, the date of the response given was checked and analysed accordingly.

APPENDIX A: QUESTIONNAIRE

Respondent ID: _____	Tel No: _____
Date of Survey: _____	
Name & ID of Interviewer: _____	

Jiena (għid ismek) mill-Uffiċċju Nazzjonali ta' l-Istatistika. Bhalissa qeġhdin nagħmlu sfharrig' f' isem l-Awtorita' tax-Xandir dwar ir-Radju u t-Televizjoni. L-istfharrig' jieħu madwar 5 minuti biex jitlestu. Mill-familja tiegħek ġie magħżul/a (għid isem) bil-polża biex jieħu/tieħu sehem fl-istfharrig'. Nista' nkellmu/nkellimha bhalissa?

1. X'sistema tat-televizjoni għandek is-dar? <i>(Immarka kull fejn japplika)</i>	
Aerial (<i>Free-to-air</i>)	<input type="checkbox"/> (1)
Melita Cable	<input type="checkbox"/> (2)
GO digital aerial	<input type="checkbox"/> (3)
Satellita'	<input type="checkbox"/> (4)
Internet (<i>incl. Dreambox</i>)	<input type="checkbox"/> (5)
Mod ieħor	<input type="checkbox"/> (6)
M'għandix televizjoni	<input type="checkbox"/> (7)

} go to q2

} go to q6

5. Rajt Telebejh il-bierah?	Iva Le	Go to q6
6. Fuq liema stazzjon rajtu iaktar?		
	1= TVM	
	2= ONE	
	3= Net TV	
	4= Smash TV	
	5= Education 22	
	6= iTV	
	7= Favorite TVv	
	8= Oħrajn	
	9= Ma nafx	

2. Liema stazzjon tat-televizjoni rajt l-aktar ilbierah għal mill-anqas 10 minuti? (Immarka waħda biss)	
TVM	<input type="checkbox"/> (1)
ONE	<input type="checkbox"/> (2)
Net TV	<input type="checkbox"/> (3)
Smash TV	<input type="checkbox"/> (4)
Education 22	<input type="checkbox"/> (5)

APPENDIX D: DEMOGRAPHIC LOCATIONS

[Source: <http://www.census2005.gov.mt/presentations/supervisors%20briefing.pps> – Supervisors' Briefing]

Localities are classified into districts according to the Malta Geographical Codes (MGC) as follows:

- **Southern Harbour** - Żabbar, Xgħajra, Valletta, Tarxien, Santa Lucija, Paola, Marsa, Luqa, Kalkara, Senglea, Floriana, Fgura, Cospicua, Vittoriosa.
- **Northern Harbour** - Ta' Xbiex, Swieqi, Sliema, Santa Venera, San Gwann, St. Julians, Qormi, Pietà', Pembroke, Msida, Ħamrun, Gżira, Birkirkara.
- **South Eastern** - Żurrieq, Żejtun, Safi, Qrendi, Mqabba, Marsaxlokk, Marsaskala, Kirkop, Gudja, Għaxaq, Birżebbuġia.
- **Western** - Żebbuġ (Malta), Siġġiewi, Rabat (Malta), Mtarfa, Mdina, Lija, Iklin, Dingli, Balzan, Attard.
- **Northern** - St. Paul's Bay, Naxxar, Mosta, Mgarr, Mellieħa, Għargħur.
- **Gozo and Comino** - Rabat (Gozo), Fontana, Għajnsielem and Comino, Għarb, Għasri, Kerċem, Munxar, Nadur, Qala, San Lawrenz, Sannat, Xagħra, Xewkija, Żebbuġ (Gozo).

APPENDIX E: RADIO AUDIENCES BY HALF-HOUR SLOTS – MONDAY TO SUNDAY

The follow data is being presented for the sake of simplicity. The original calculations for radio audiences by half-hour slots can be found in Part 2, Tables 6.3.a-g. From these latter tables, data was rounded up to the nearest thousand. A “nil” record only means that audiences were less than 2000; and not that there were zero audiences.

A "nil" record only means that audiences were less than 2000; and not that there were zero audiences.

APPENDIX F: TV AUDIENCES BY HALF-HOUR SLOT – MONDAY TO SUNDAY

The follow data is being presented for the sake of simplicity. The original calculations for radio audiences by half-hour slots can be found in Part Two, Tables 7.3.a-g. From these latter tables, data was rounded up to the nearest thousand. A “nil” record only means that audiences were less than 2000; and not that there were zero audiences.
