## PREFACE

Article 30(2) of the Broadcasting Act, Chapter 350 of the Laws of Malta, requires the Broadcasting Authority to make and transmit to the Prime Minister a report that includes the results of independent audience research which ascertains:

- (a) the state of listenership or viewership of broadcasting services provided in Malta;
- (b) the state of public opinion concerning programmes included in broadcasting services provided in Malta;
- (c) any effects of such programmes on the attitudes or behaviour of those who watch them; and
- (d) the types of programmes that members of the public would like to be included in broadcasting services provided in Malta.

In order to give effect to the above, the Broadcasting Authority has commissioned the National Statistics Office to compile data through telephone interviews during the period October – December 2007 that is representative of the whole population. The analysis of these interviews is contained in this report.

Part One of the report details the analysis of the data collected and includes the questionnaire used, the classification of localities in the Maltese Islands by district as found in this particular work, demographic data of the Maltese population, and a list of nationwide radio and television stations and community radio stations licensed by the Broadcasting Authority during this period.

Part Two of the report details the tables for this period.

## **1. METHODOLOGY AND SAMPLE COLLECTION**

Data was collected by means of telephone interviewing conducted by National Statistics Office interviewers continuously during the period 1<sup>st</sup> October to 31<sup>st</sup> December 2007. NSO interviewers are instructed to make interviews between 04:00pm – 08:00pm on weekdays and between 09:00am – 1:00pm on weekends, and are instructed to call-back individuals up to 3 times before interviewing the next person in their list. This is mainly to avoid any bias that could be introduced among gender and age.

Starting from October 2007, the number of interviewees contacted by the National Statistics Office was doubled vis-à-vis the previous year and the desired target of interviewees was now at 20 daily. A stratified random sample based on gender, age and district population distribution was selected by the National Statistics Office allowing for a 50% response rate and amounting to 3680 possible interviewees [92 days by 40 interviewees]. For this period 1811 individuals [57.04% of contacted persons] accepted to participate in the survey and, on average, responses were evenly spread out during the whole period. Below is a breakdown of responses achieved during this period:

**TABLE 1.1: SURVEY RESPONSE RATE**

<b>TOTAL</b>	<b>1811</b>	<b>100.00</b>

The target population for this survey consisted of Maltese residents aged 12 years and over, living within private households. The respondents' households were selected using systematic random sampling from a database containing all individuals maintained and known only to the NSO – respondents' personal data are only known to NSO Officials and such data is not forwarded to the Broadcasting Authority. Each individual has an equal and independent chance of being chosen.

All the data that was collected was subject to a series of quality checks by vetters. Apart from this, the data entry programme has a number of in-built validation rules in order to limit the errors of data inputting.

## 1.1 The Accuracy of the Results

How well the sample represents the population is gauged by two important statistics – the survey's margin of error and the confidence level used. The margin of error is the amount of error inherent in the results due to sampling and depends on the size of the sample – a lower margin of error requires a larger sample size. A common choice as an accepted margin of error is that of **±5%**. The confidence level is the amount of uncertainty that can be tolerated. Typical choices are 90%, 95% and 99% confidence – a higher confidence level requires a larger sample size.

With a response rate of 57%; a population size of 355000; and a 95% confidence level; the sample of 1811 interviewees has a margin of error of **± 2.3%**.

The differences by age groups, gender and region between the sample and the population as published on 23<sup>rd</sup> January 2008 by the National Statistics Office in the Demographic Review 2006 are as follows:

**TABLE 1.2: COMPARISON BETWEEN SAMPLE AND POPULATION GROUPS**

Age	Sample	Population <sup>a</sup>	Difference
12 - 14	5.0%	4.5%	0.5
15 - 24	15.0%	16.3%	-1.3

<sup>b</sup> Percentages are based on Total Population by Region as listed in Table 9 of the Demographic Review 2006 – see also Appendix B.

## 2. SAMPLE PROFILE

For this analysis, the demographics included gender, age and location of households by geographic district. The ages of respondents were grouped according to demographic categories used by NSO for World Population Day 2006 (D.O.I Press Release 153/2006) and for the International Day of Older Persons 2006 (D.O.I Press Release 218/2006). Demographic location of respondents was based on the same distribution as that used for the Population Census 2005 and divided into six districts.

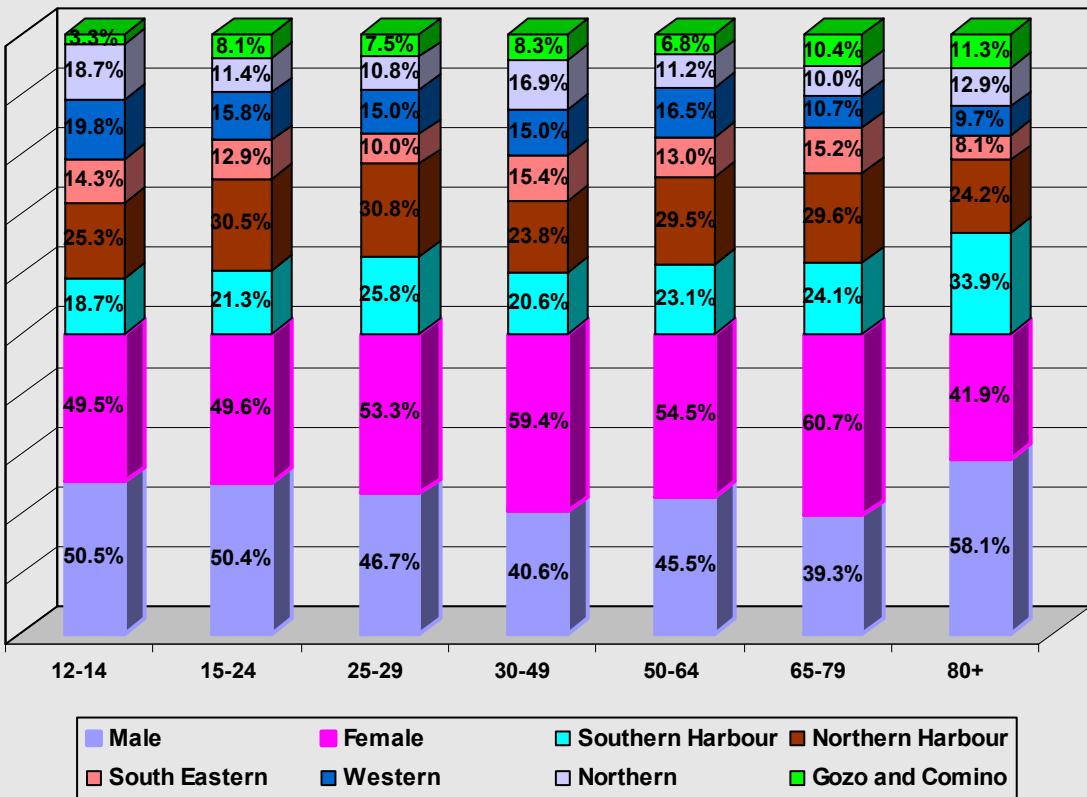

The minimum age of respondents was 12 years old, while the oldest person interviewed was 90 during the period October-December 2007 [94 years old during the period October-December 2006].

Table and Figure 2.1 gives the profile of the sample by age group and by gender and district, based on the demographic features of the resident population used for this study. Further details about sample distribution are given in Tables 1.1 to 1.3 in Part 2 of this report.

### 3. LISTENING AND VIEWING PATTERNS

Participants were asked which station they had watched or listened to for at least ten minutes the day before the interview and from which times they had watched or listened to that particular station. With regard to TV, participants were also asked which reception platform they prefer most to receive television at their household.

#### 3.1 Radio Listening

While 54.4% of those interviewed stated that they do not listen to radio; 4.7% stated that they had listened to radio but to no particular radio station; and 1.6% stated that they do not remember which radio station they had listened to – see Part 2: Tables 3.1 and 3.2, and summary Table & Figure 3.1 below. Compared to the same period of the previous assessment period [October-December 2006], regular radio listening has decreased by 7.9% from 51.2% in 2006 to 43.4% for the same period in 2007.

### 3.1.1 Radio Listening by Gender and by Age Group

Of the effective listening population, 17.4% of all the male population prefer Bay Radio while 15.2% of all the female population prefer One Radio. Again, the most listened station is Bay Radio for those in the youngest three age groups of 12-14 years [46.2%], 15-24 years [57.0%], and 25-29 year olds [33.3%]. Those in the 30-49 age group prefer most Calypso Radio [18.3%] while those in the 50-64 [24.3%] and 65-79 [27.6%] age groups prefer One Radio. Those over 80 years old have an equal preference for RTK and Radju Marija – 28.6%. See Table 3.2 below.

### 3.1.2 Radio Listening by District

While One Radio attracted the highest percentage of those living in the Southern Harbour [17.9%] and those of the South Eastern district [26.7%], Bay Radio attracted the highest percentages of those living in the Northern Harbour district and the Western district [17.7%] and those of the Northern district. Of those living in Gozo and Comino, 18.3% prefer RTK.

### 3.2 Radio Listening by Broadcasting Station

The replies given by respondents to the question “Which radio station did you listen most yesterday for at least 10 minutes” were analysed by gender, by age group, and by district. The overall counts, excluding those who “do not listen to radio”; “did not remember”; and “did not follow any particular radio station”; are given in Table 3.4 and Figure 3.2 below. This data gives the effective percentage of radio listeners that each radio broadcasting station has attracted.

For the period October-December 2007, Bay Radio attracted the highest number of radio listeners at 15.5%; closely followed by One Radio at 15.3% and Calypso Radio at 10.0%. Compared to the previous assessment period for the summer months of July-September 2007 the only marked increase was that of Bay Radio.

**TABLE 3.4: RADIO LISTENING BY BROADCASTING STATION –  
JULY-SEPTEMBER & OCTOBER-DECEMBER 2007**

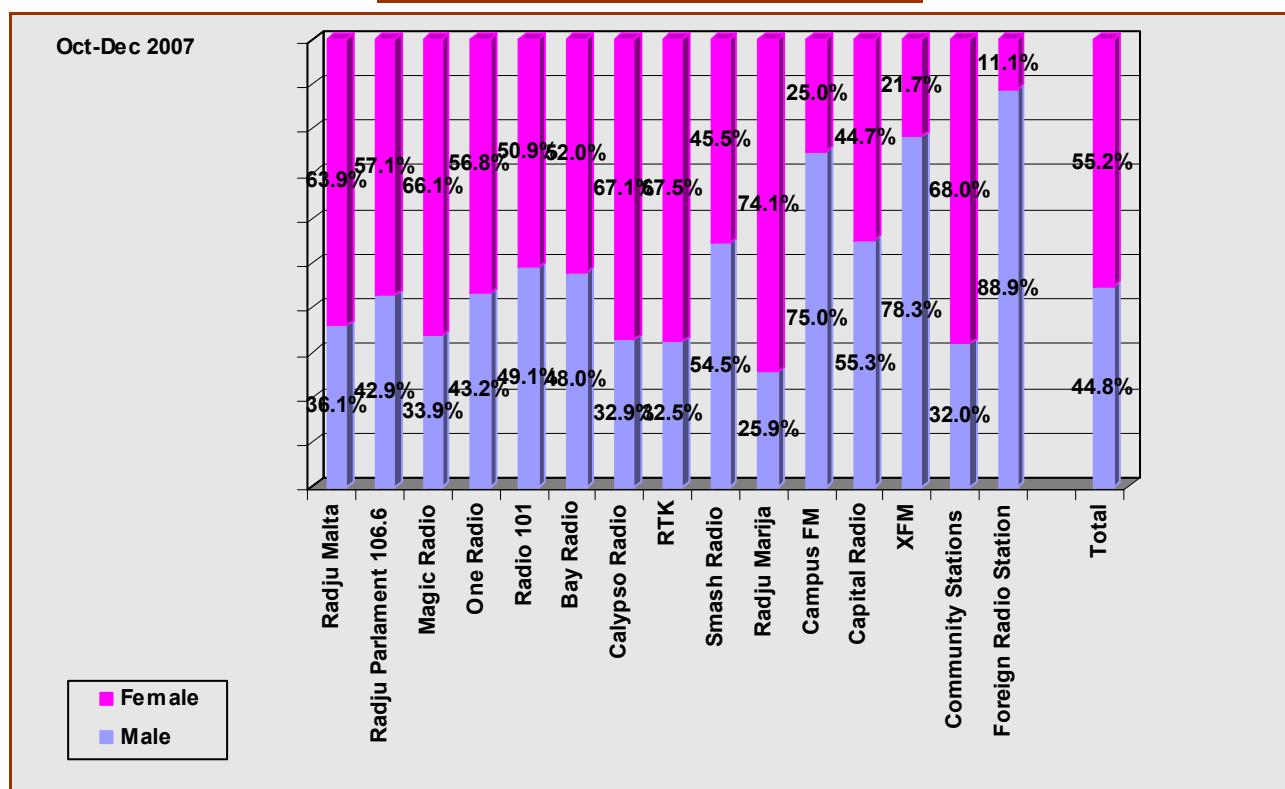

**FIGURE 3.2 RADIO LISTINING BY BROADCASTING STATION –  
JULY-SEPTEMBER & OCTOBER-DECEMBER 2007**

### 3.2.1 Radio Listening by Broadcasting Station – By Gender

Most radio broadcasting stations have a balanced gender audience. Of significance, however, are those listening to a foreign radio station where male following is dominant. Similar male dominant following is also present with XFM and Campus FM. On the other hand, female following is significant with Radju Marija, RTK, and Calypso Radio. See Table 3.5 and Figure 3.3 below

**TABLE 3.5: RADIO LISTINING BY BROADCASTING STATION – BY GENDER**

### 3.2.2 Radio Listening by Broadcasting Station – by Age Group

Overall, the distribution of radio listeners by each broadcasting station by age group is similar to national percentage population distribution by age groups. However, analysis of each station's distribution is also dependent on each station's targeted audience and its broadcasting programme schedules; the results of which goes beyond the scope of this work. Of significance, however are the distribution of listeners of Radju Parlament, Campus FM, and the listeners of Foreign Radio Stations: they did not attract audiences who are under 39 years old. Exceptions to the national population distribution by age are Bay Radio and Smash Radio whose highest audiences are of 15-24 years old. Of significance are the audiences of the two political party radio stations [One Radio and Radio 101], one of the Public Service Broadcaster's radio station [Radju Malta] and the Church's station [RTK] where their largest audiences are in the 50-64 age group. Radju Marija and Campus FM also have their highest audiences in the 30-64 age group – see Table 3.6 and Figure 3.4 below.

### 3.2.3 Radio Listening by Broadcasting Station – By District

Most broadcasting stations have a nationwide following with the exception of Radju Parlament, Campus FM and from those listening to a foreign radio station. Although most stations also follow the national distribution population percentages by district, there are a few exceptions. Of significance are Calypso Radio and One Radio whose largest percentage of audience is from the Southern Harbour area rather than from the Northern Harbour area. Other stations which have significant audiences in excess of national population percentage distribution include Radju Parlament in the South Eastern area; Magic Radio in the Northern Harbour area; and XFM in the Western area – see Table 3.7 and Figure 3.5 below.

### 3.3 TV Viewing

With regard to TV viewing, 24.9% stated that they do not watch TV; 14.9% stated that they had watched TV but did not remember a particular television station; another 0.9% stated that they do not remember which station they had watched the day before; while 0.5% of those interviewed stated that they do not have a TV-set – see Part 2: Tables 3.3 and 3.4, and summary Table 3.8 and Figure 3.6 below. Compared to the same period of October-December 2006, regular TV viewing was less by 7.6% while after the summer period of July-September 2007, TV viewing increased by 8%.

#### 3.3.1 TV Viewing by Gender and by Age Group

Of the effective viewing population, TVM is the station most followed by gender and by age group with the exception of those of the 12-14 year olds. The second most followed station for both males and females is One TV; while the third most followed station for males is Other TV Station; while for females, the second most followed station is Net TV. The same pattern follows through all the age groups of all those who are 25 years old and over. Of significance, however, are those of the 12-14 year olds and those of the 15-24 year olds. Although the most viewed stations of the 15-24 year olds is TVM [22.5%], the second following of this age group is Italia 1 [17.2%] which is also the most followed station of those in the 12-14 age-group [30.2%]. On the other hand, the second most preferred station of those in the 12-14 age-group is One TV [23.8%] followed by TVM [15.9%]. Although this may seem, at first sight, to be indicative

of market failure in locally produced children's programmes, further analysis from other sources is required to assess and verify the correctness of this statement. See Table 3.9 below.

### 3.3.2 TV Viewing by District

TVM was the most followed station amongst all the districts. This station was followed by One TV in nearly all the districts with the exception of the Northern district where the most followed station was Net TV. The third most followed station varies from district to district; however of significance is that the third choice of TV viewers is another TV station not included in the list of stations analysed and is included under Other TV station in five of the districts. See Table 3.10 below.

### 3.4 TV Viewing by Broadcasting Station

The period October-December is deemed as the start of the broadcasting season where local stations heavily promoted their new broadcasting schedules. Of significance importance are TVM and One TV which have increased the number of viewers over the previous summer broadcasting season and at the expense of other broadcasting stations especially foreign stations. Net TV has maintained its share of numbers of TV viewers, albeit a slight increase.

The overall counts of respondents, excluding those who stated that they do not have a TV-set [0.5%]; those who watch TV but not on a particular station [14.9%]; those who did not remember which station they had watched [0.9%]; and those who stated that they do not watch TV [24.9%]; are given in Figure 3.7 and Table 3.11 below. This data gives the effective percentage of TV viewers that each broadcasting station has attracted.

### 3.4.1 TV Viewing by Broadcasting Station – By Gender

The major local broadcasting TV stations [TVM; One TV; Net TV] have a skewed female gender following – the exceptions being Samsh TV with a skewed male following and Education 22 with a totally male audience. From the foreign broadcasting stations, of significance are Rai 1, Rai 3, and Canale 5 which are more followed by females – the rest of the foreign broadcasting stations have a skewed male following; see Table 3.12 and Figure 3.8.

### 3.4.2 TV Viewing by Broadcasting Station – By Age Group

Overall, the distribution of TV viewers by each broadcasting station is similar to national percentage population distribution by age groups. However, analysis of each station's distribution is also dependent of each station's targeted audience and its broadcasting programme schedules; the results of which goes beyond the scope of this work. Of significance, however are the viewers of Smash TV and Education 22 whose percentages did not cover all the age-groups; while two other major local broadcasting stations [TVM and One TV] attracted more viewers in the 50-64 age group than the sample percentage.

The only foreign broadcasting station that has managed to cover all the age group is that clustered under Other TV station. Of significance, however are Italia 1 and MTV whose viewers who are 15-24 years old far exceed the sample total percentage. Similarly 50% of the viewers of BBC Prime are in the 50-64 age group; while 75.0% of BBC World are in the 65-79 year old; see Table 3.13 and Figure 3.9 below.

### 3.4.3 TV Viewing by Broadcasting Station – By District

Only the main three local TV broadcasting stations [TVM, One TV and Net TV] have nationwide following; Smash TV did not have following in Gozo and Comino which Education 22 only registered viewers in the Western District. On the other hand, four foreign stations [Rai 1, Rai 2, Canale 5, and Italia 1] have nationwide following; see Table 3.14 and Figure 3.10 below.

### 3.5 TV Reception Platform

As yet, no licences have been issued to regulate programme content for digital radio broadcasts. On the other hand, digital television broadcasting is available through various platforms. With this in mind, respondents were asked to indicate on which broadcasting platform they receive their household television broadcasts; namely through roof-top aerial – both analogue and digital, cable system, satellite dish and through the Internet.

The data for the uptake of digital broadcasting services could very well be taken from other sources coming from other national and E.U. agencies and could be used for data triangular purposes. However, the data collected by other agencies goes beyond the purposes of this study – the uptake of digital TV broadcasts by a 500-roomed hotel is calculated in toto by other monitoring agencies and not calculated on the average bed-occupancy rates for that hotel.

The data used in this analysis is derived only from persons living in the archipelago – no institutions, of whatever kind are contacted. It is therefore representative only of household reception platforms used and not of national digital uptake. Table 3.15 and Figure 3.11 and Figure 3.12 detail the percentages registered for the various broadcasting platforms by quarter from October 2006 to December 2007. Further data is available in Part 2 of this report; Tables 3.5 to 3.7.

### 3.5.1 TV Reception Platform by District

From the previous section it is evident that digit up-take from July-September to October-December 2007 increased by more than 7-times from 3.6% in the third quarter of 2007 to 25.2% in the fourth quarter. Analysed by district, this uptake was persistent in all districts – this was taken at the expense of cable TV [Ca TV]; see Table 3.16 and Figure 3.13 below.

### 3.5.2 TV Reception Platform by Broadcasting Station

The data was also analysed by each broadcasting station. All the broadcasting stations were received through the digital aerial platform. Reception of local broadcasting stations through satellite gives an indication that some households have more than one reception platform installed.

### 3.6 Teleshopping

Starting from 1<sup>st</sup> April 2007, the Authority wanted to research Teleshopping originating from the Maltese Islands. Respondents were asked whether they regularly watch teleshopping and on which channel such programmes are followed. Teleshopping programmes are locally aired differently on local broadcasting stations, generally during the off-peak hours during the day. There is only one channel completely dedicated to 24/7 Teleshopping.

Of all the interviewees, only 10.8% stated that they regularly watched Teleshopping programmes – a drop of 3.2% over those interviewed during July-September 2007. Of the effective teleshopping programme viewers, 12.8% stated that they did not know which teleshopping programme they had watched while the most followed teleshopping programme is that broadcast on Smash TV, followed by One TV. The teleshopping dedicated TV station, ITV, ranked third with 17.4% - see Figure 3.15 below and Table 3.8 and Table 3.9 in Part 2 of this report.

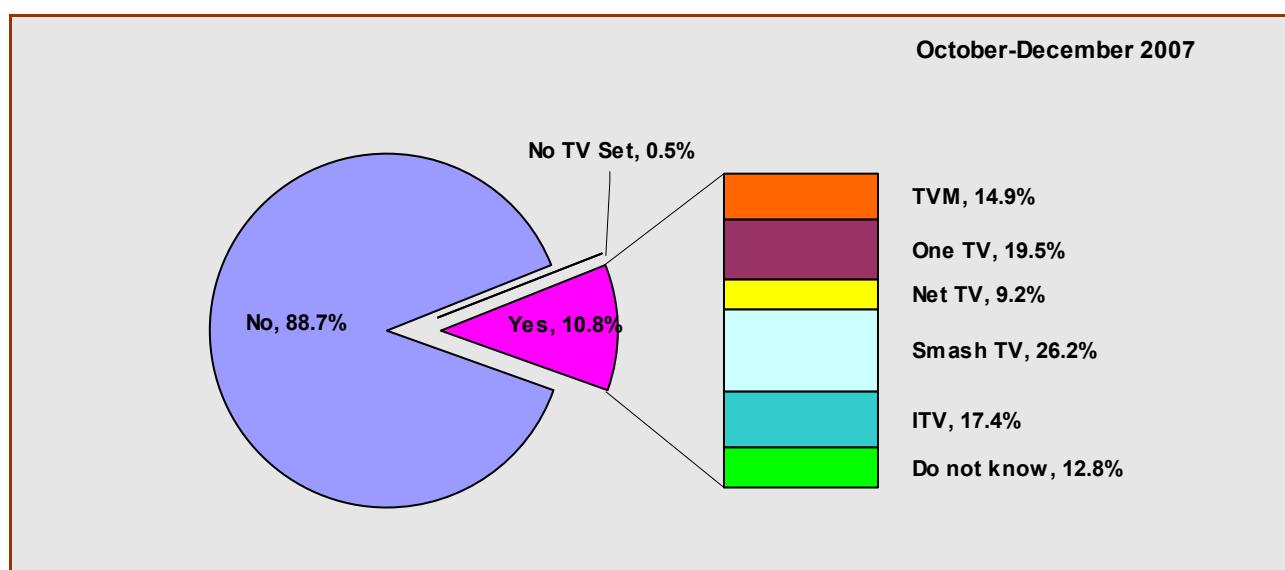

FIGURE 3.15: TELESHOPPING BY BROADCASTING STATION

Only TVM's audience is gender balanced, all the rest have a skewed gender audience with the highest female audience being that of Smash TV [80.4%], followed by Net TV [72.2%], One TV [68.4%], and ITV [61.8%]; see Figure 3.16 below.

The effective teleshopping audience by age group is predominantly of those who are in the 50-64 age brackets; and this is persistent among all the broadcasting stations – see Table 3.18 and Figure 3.17. What is of concern is that such programmes are also followed by children on four of the five broadcasting stations.

TABLE 3.18: TELESHOPPING BY BROADCASTING STATION – BY GENDER AND BY AGE GROUP

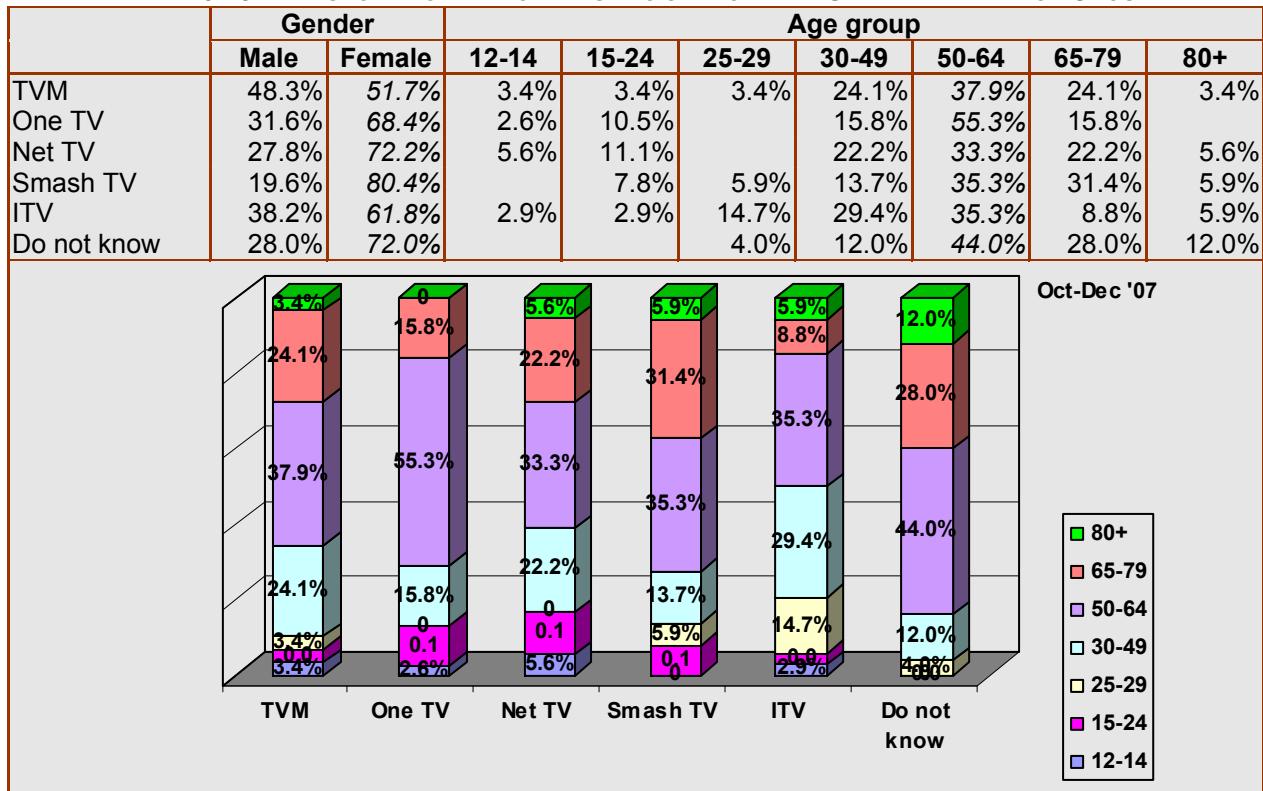

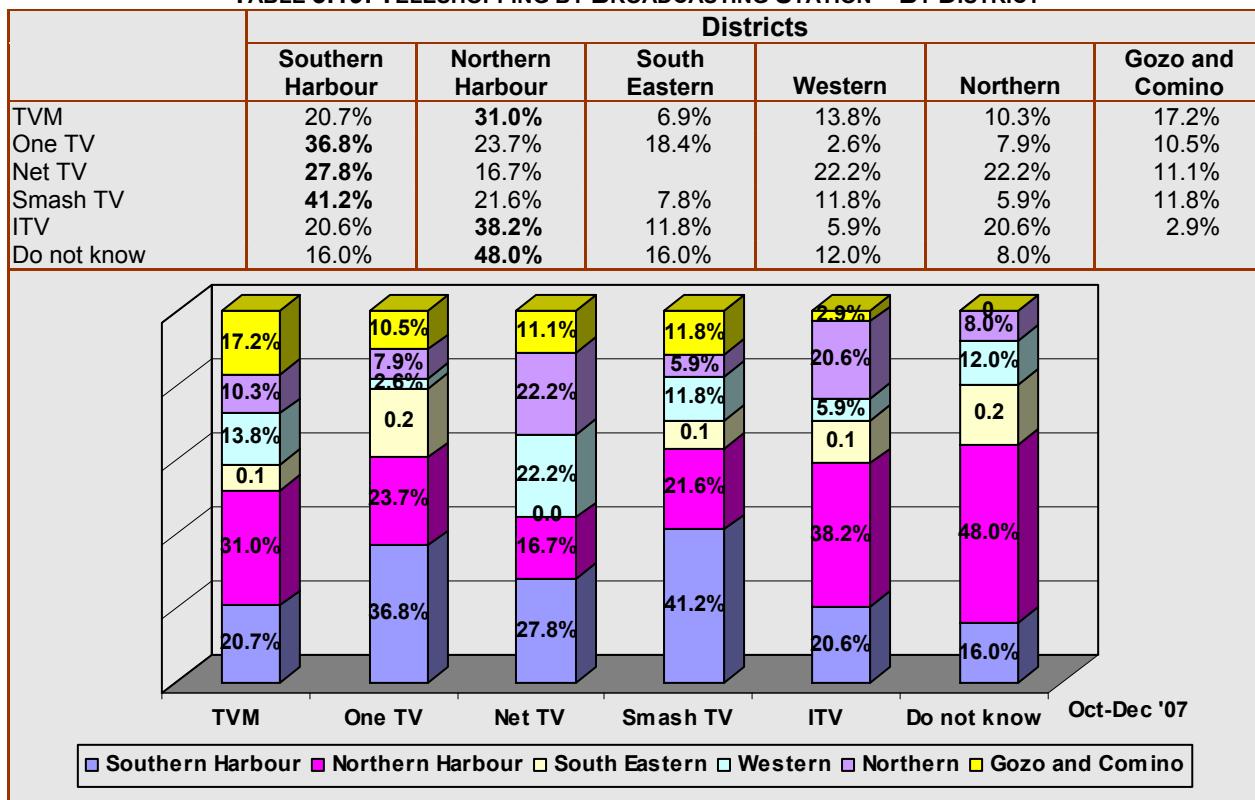

FIGURE 3.17: TELESHOPPING BY BROADCASTING STATION – BY AGE GROUP

Analysed by district, three broadcasting stations have their highest audiences for teleshopping programmes coming from the Southern Harbour areas [One TV, Net TV, and Smash TV]; while the other two stations [TVM and ITV] have their highest audiences for such programmes from the Northern Harbour area – see Table 3.19 and Figure 3.18 below.

## 4. RADIO AUDIENCES

Respondents were asked to state at which times they started and stopped listening to their radio. These time brackets were listed by the interviewer as time start-up and time-ending. The 24-hour clock was divided into half-hour brackets and each time-period was recorded separately. Thus, a listener spending two-hours of radio-listening from 08:00am to 10:00am as recorded by the interviewer was counted four times.

These counts were then grouped according to the listening-day of the interviewee, and all the counts for each respective week-day were grouped together, thus forming the basis of radio consumption by week-day. The results given are the totals for each particular sub-sample for that week-day.

### 4.1 WEEKDAYS-AVERAGE AUDIENCE SHARE

The Weekday-average Audience Share for all the week-days by radio broadcasting stations is presented in Table 4.1 and Figure 4.1 below. Overall, One Radio has attained the highest daily average [1.18%] with its highest average being on Saturdays [1.73%]. This was followed by Radio Calypso with the next highest daily average [0.79%] while reaching its highest on Fridays [1.54%].

The following figures map in detail the daily audience shares for radio broadcasting stations by half-hour clock. The Figures 4.3.a – 4.3.g below are taken from Tables 4.3.a – 4.3.g in Part Two of this report, which represent the total audience counts as a percentage of the total for each particular week-day. Included in the tables are statistics for (a) the daily average audience; (b) the highest daily peak audience; and (c) the standard deviation – for each particular broadcasting station.

## 5. TV AUDIENCES

Respondents were asked to state at which times they started and stopped watching their TV-sets. The time brackets were listed by the interviewer. The 24-hour clock was divided into half-hour brackets, with the exception of main news broadcasts where the clock-hour was divided into quarter-hours.

The counts of each half/quarter clock-hour were grouped according to the viewing-day of the interviewee, and all the counts for each respective week-day were grouped together, thus forming the basis of television consumption by week-day. The results given are the total for each particular sub-sample for that week-day.

### 5.1 WEEKDAYS-AVERAGE AUDIENCE SHARE

The Weekday-average Audience Share for all the week-days by television broadcasting stations is presented in Table 5.1 and Figure 5.1 below. Overall, One TV has attained the highest daily average [1.59%] with its highest average being on Sundays [2.26%]. This was followed by TVM with the next highest daily average [1.32%] and reaching its highest average on Fridays [2.46%].

### 5.3 DAILY AUDIENCE SHARE

The following figures map in detail the daily audience shares for television broadcasting station by half/quarter-clock hour. The Figures 5.3.a – 53.g below are taken from Tables 5.3.a – 53.g in Part Two of this report, which represent the total audience counts as a percentage of the total week-day audiences. Included in the tables are the same statistics as those calculated for Radio consumption for each particular broadcasting station; i.e. (a) the daily TV average audience; (b) the highest daily peak TV audience; and (c) the standard deviation.

## 6. RADIO AND TV CONSUMPTION

Calculating the average number of hours that radio listeners and television viewers spend on a daily basis with their reception media is another data that has been computed for this period. This would indicate the number of hours that consumers were captured by the respective broadcasting stations; or rather for how long did each broadcasting station manage to maintain, on average, its audiences.

### 6.1 Daily Hours of Radio Consumption

The total number of hours spent by consumers was analysed by broadcasting station and divided by the total number of consumers per station. The total effective Radio hours spent by consumers for this period stands at 3.42 hrs. The analysis by Radio station is depicted in Table 6.1 and Figure 6.1 below:

TABLE 6.1: RADIO DAILY CONSUMPTION BY HOURS BY STATION

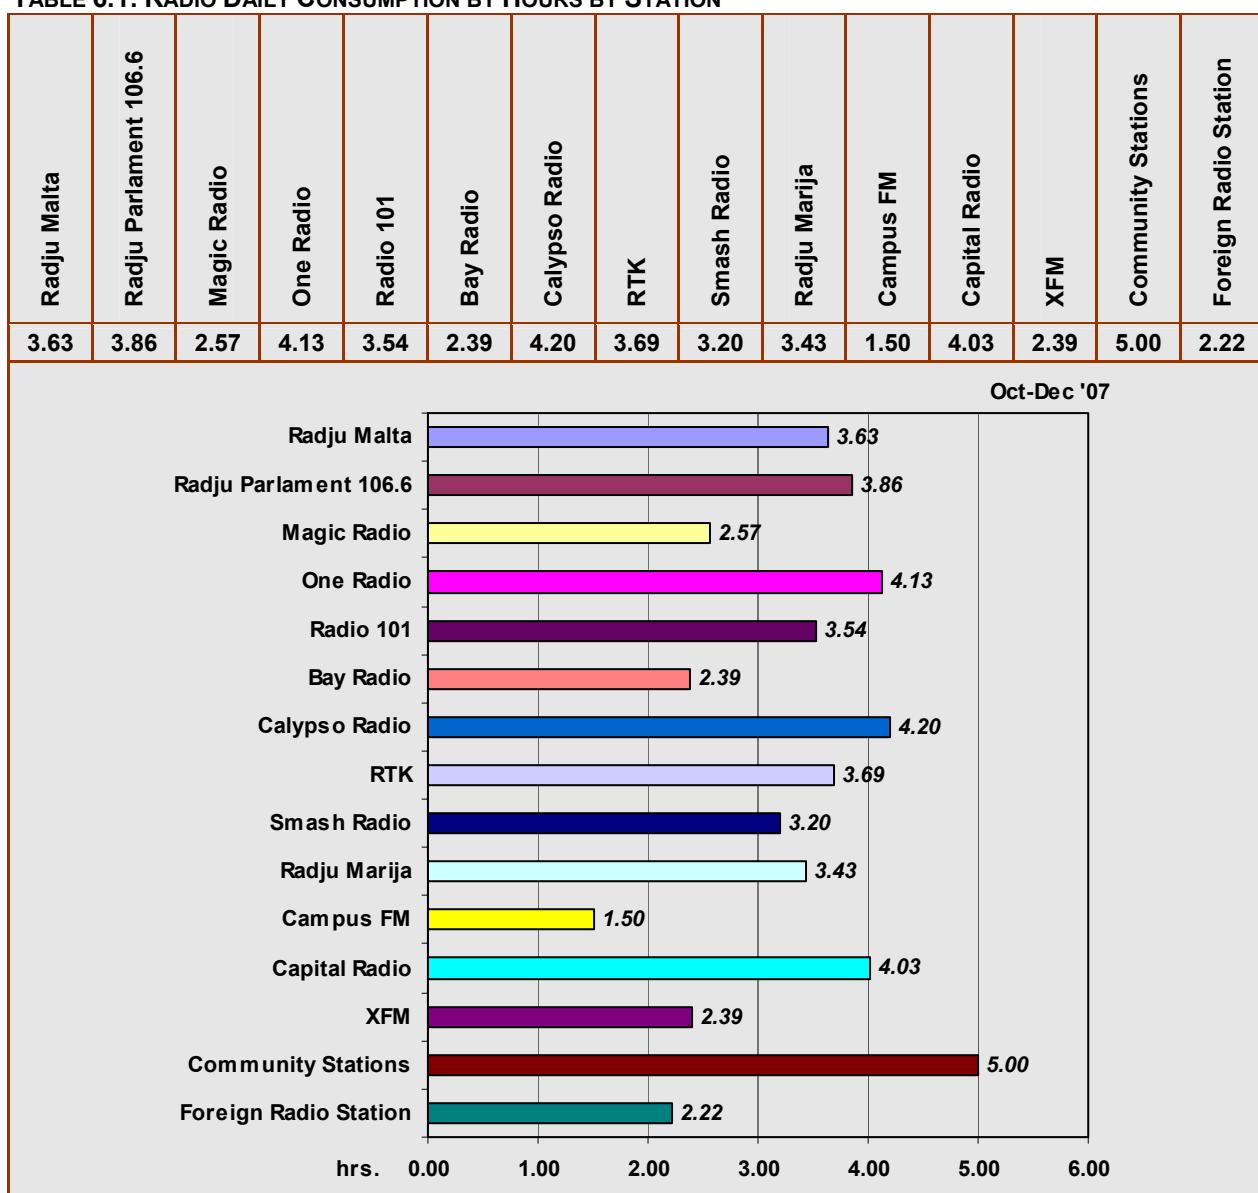

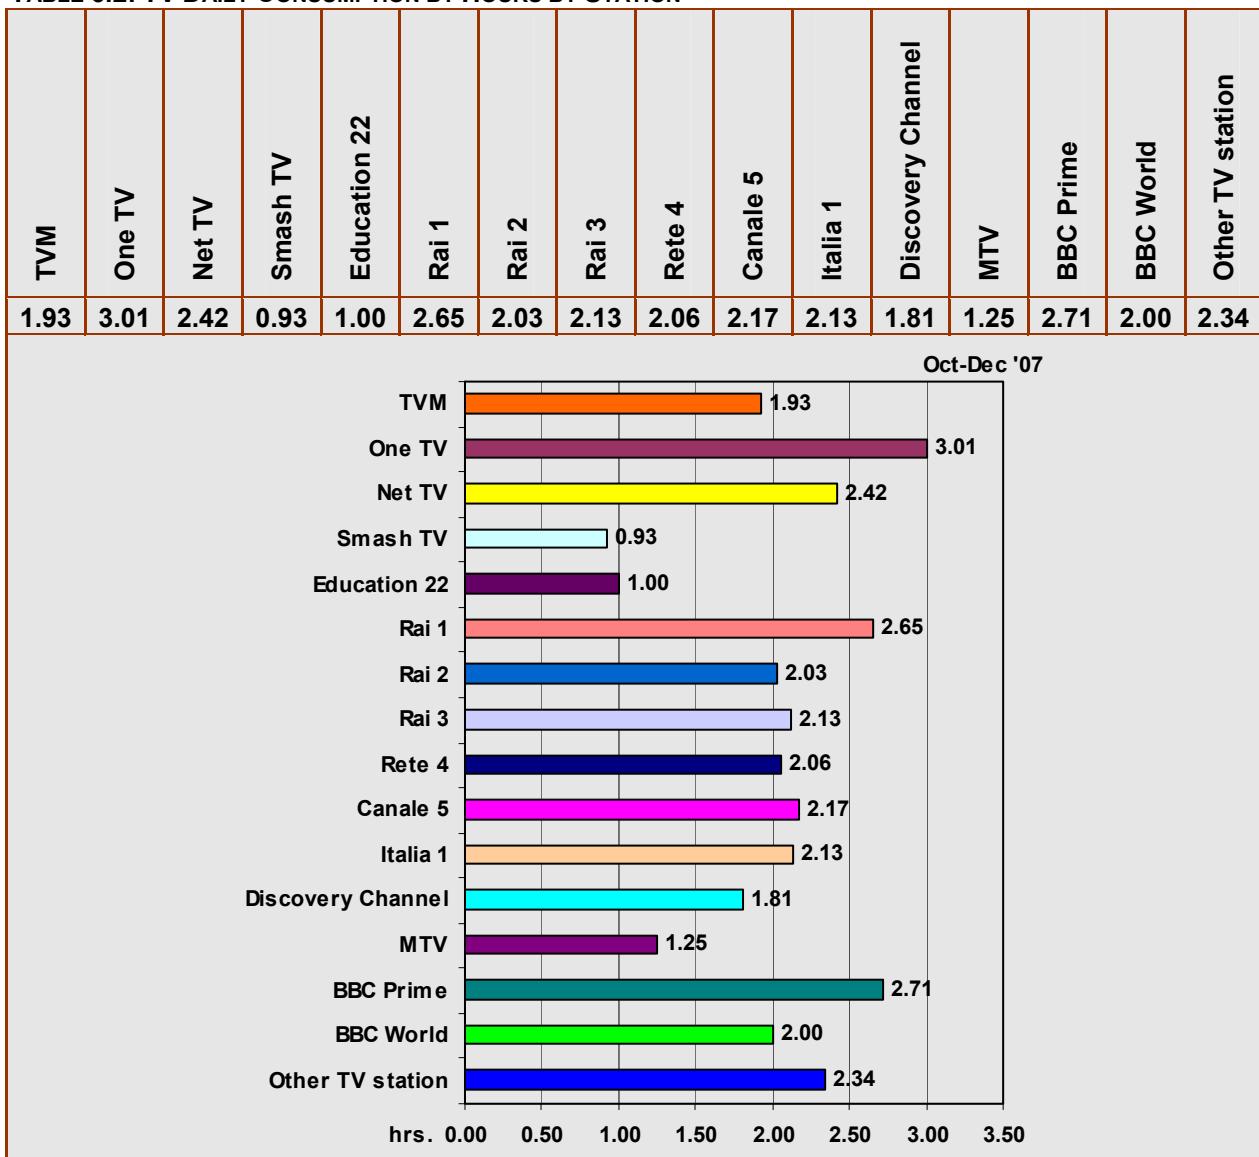

FIGURE 6.1: RADIO DAILY CONSUMPTION BY HOURS AND BY STATION

Taking the total number of hours of radio listening over the total sample of people interviewed, the national average hours of radio listening spent by consumers stands at 1.53 hrs every day.

## 6.2 Daily Hours of TV Consumption

The total number of hours spent by consumers analysed for each TV broadcasting station was again divided by the total number of consumers per station. The total effective TV hours spent by consumers for this period stands at 2.33hrs. The analysis by TV station is depicted in Table 6.2 and Figure 6.2 below:

**TABLE 6.2: TV DAILY CONSUMPTION BY HOURS BY STATION**

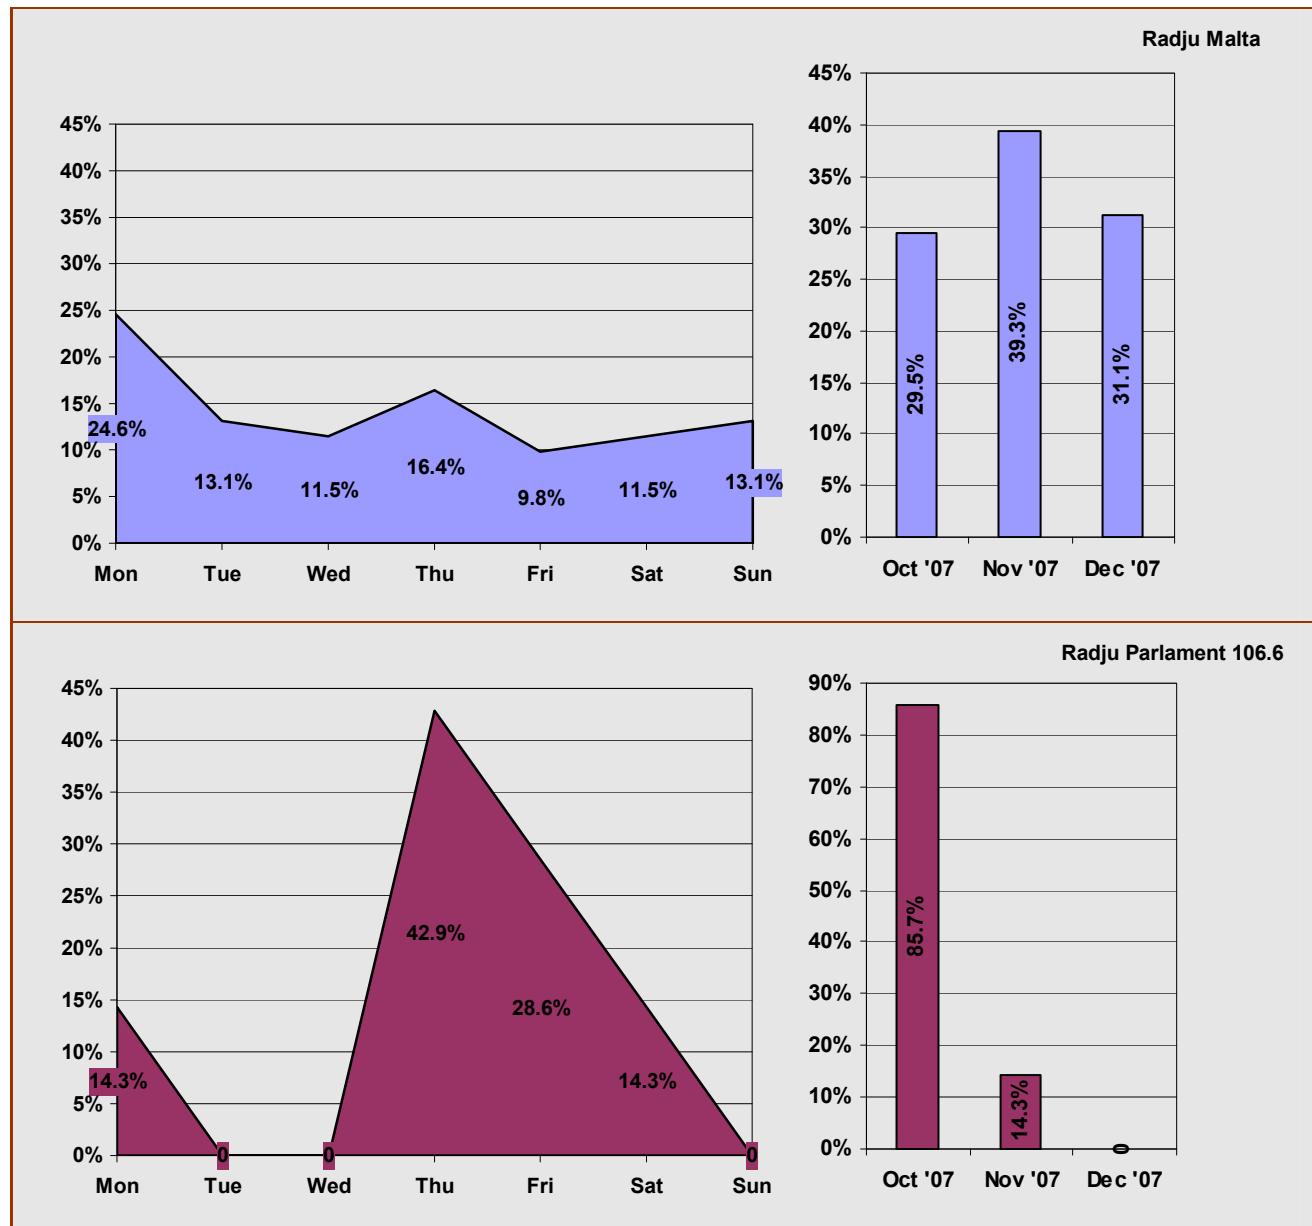

**FIGURE 6.2: TV DAILY CONSUMPTION BY HOURS AND BY STATION**

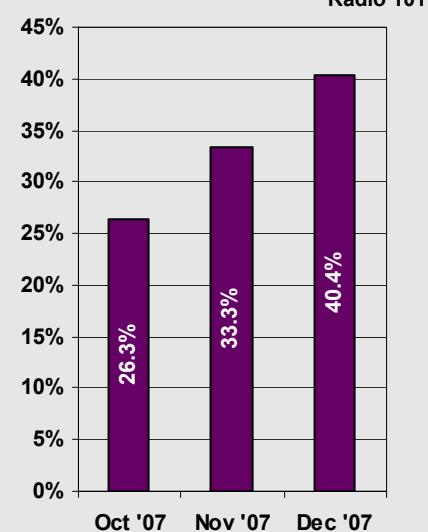

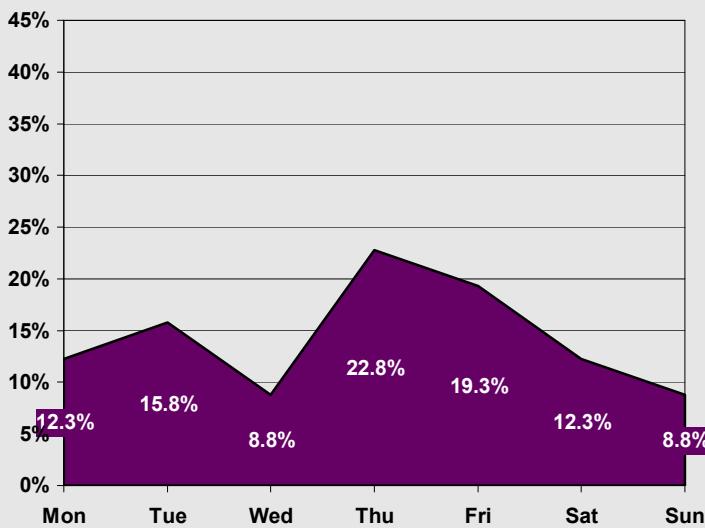

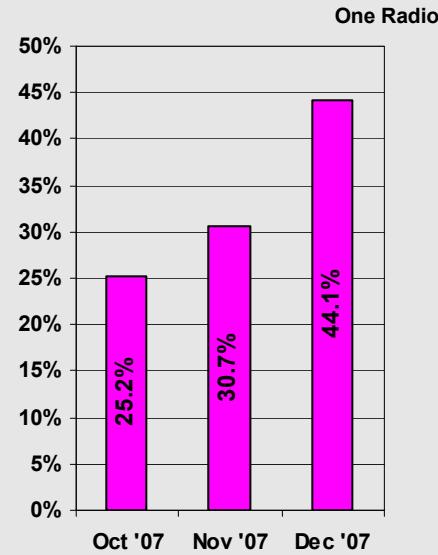

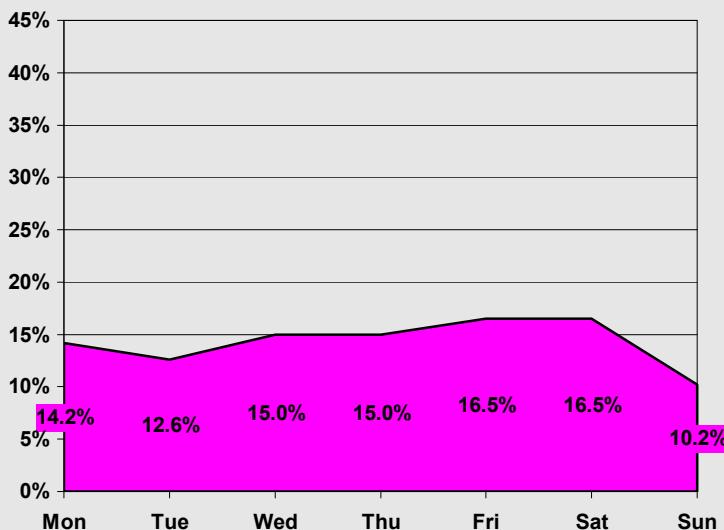

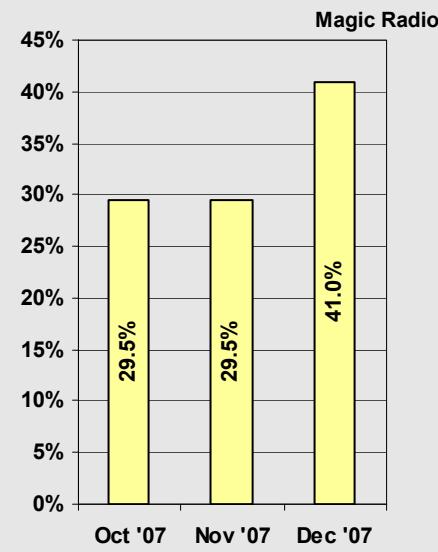

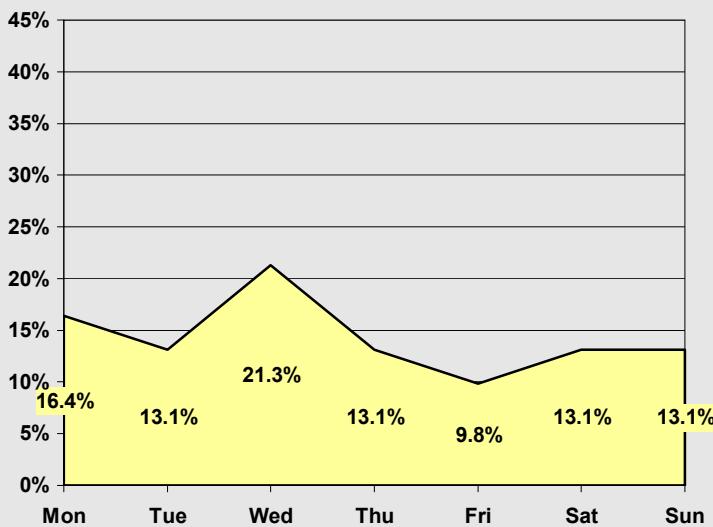

Taking the total number of hours of TV viewing over the total sample of people interviewed, the national average hours of TV viewing spent by consumers stands at: 1.38 hrs every day.

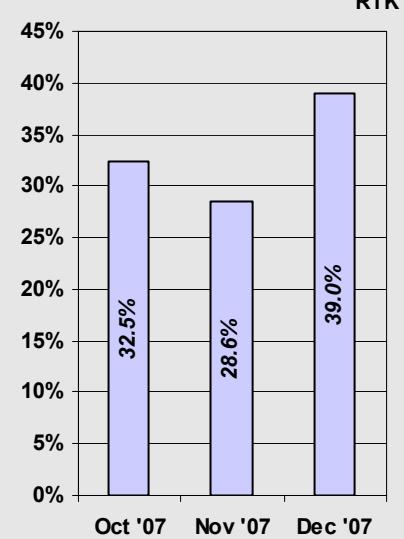

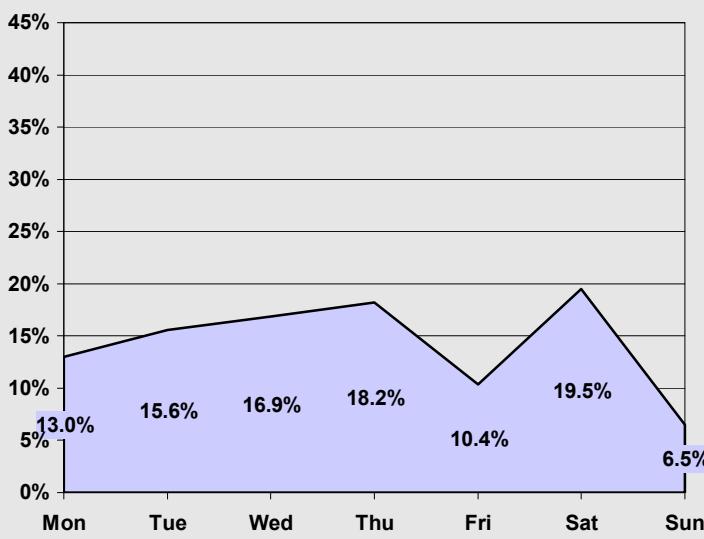

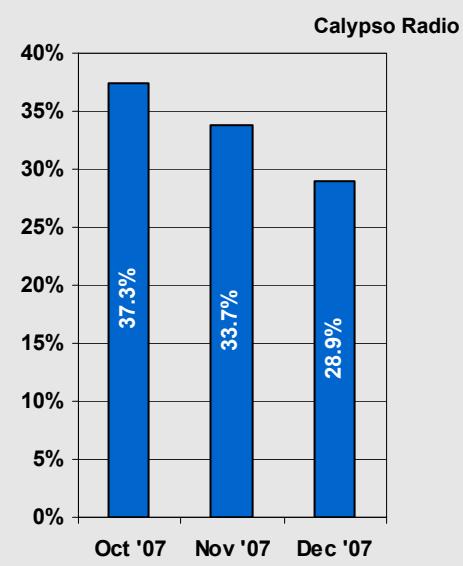

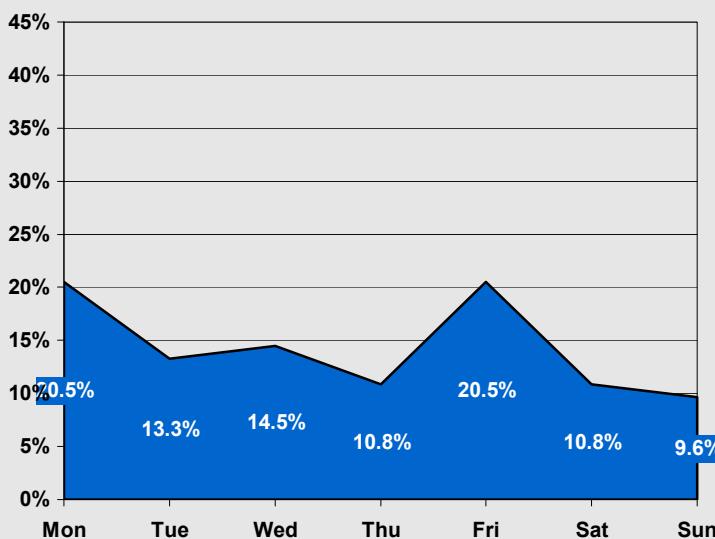

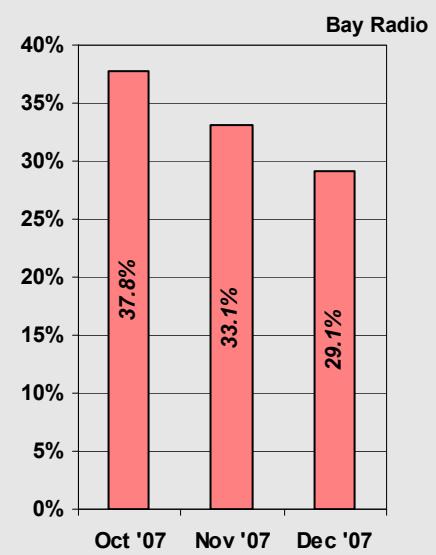

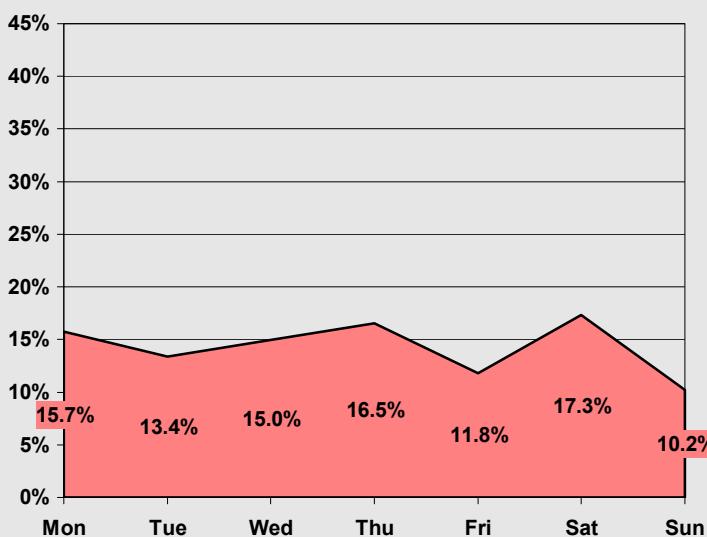

## 7. BROADCASTING STATION ANALYSIS BY WEEKDAY AND BY MONTH

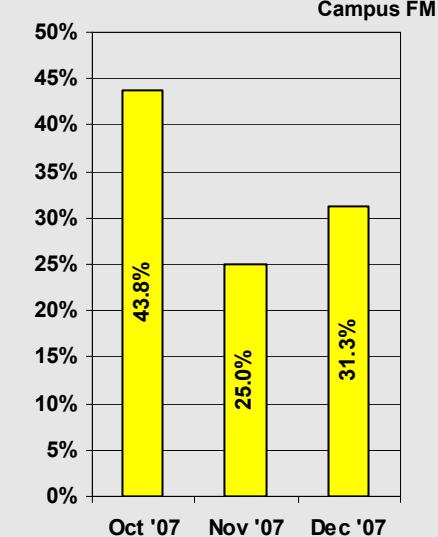

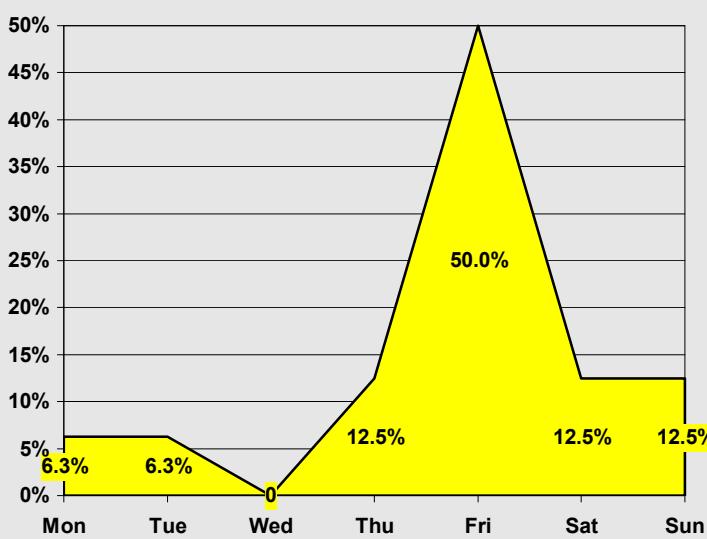

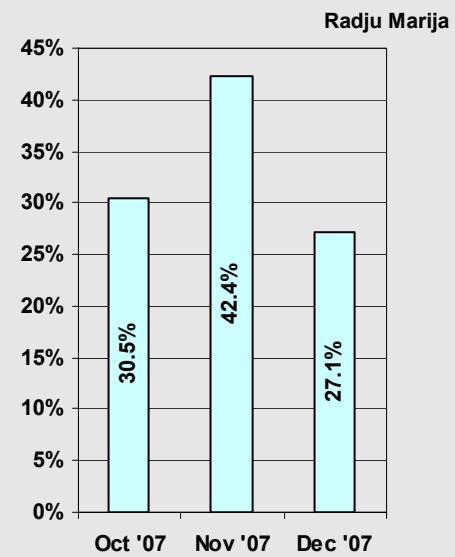

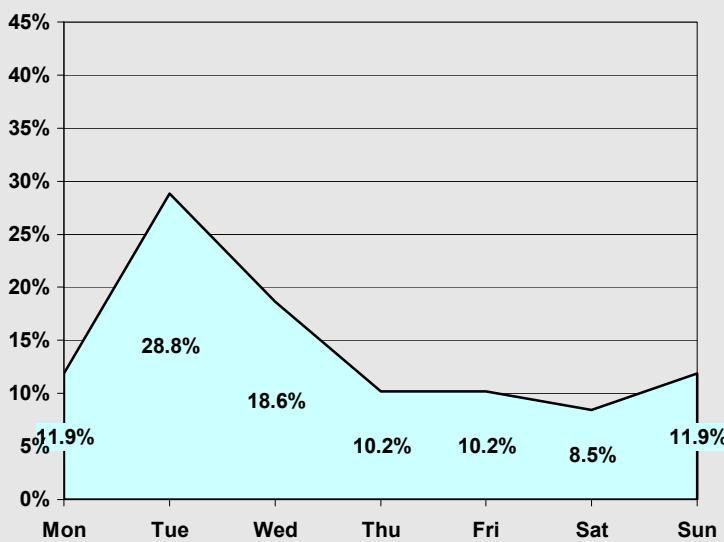

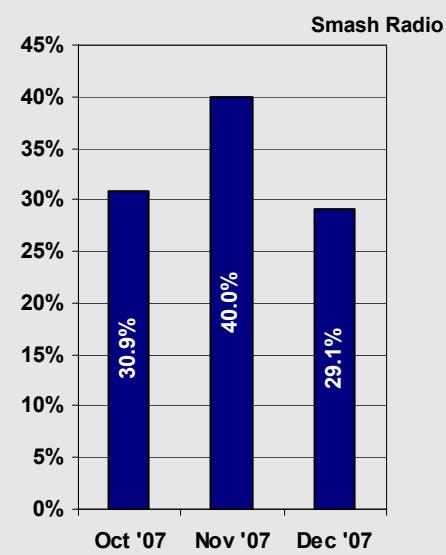

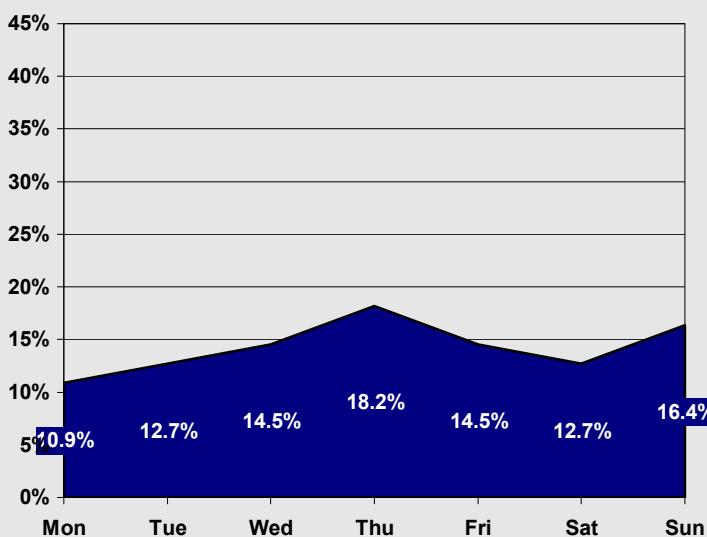

The audiences of each broadcasting station were analysed separately by weekday and by month. Each station's audiences were analysed by week-day and by month and the following figures depict the spread of each station's audiences. These would give an indication of the effectiveness of each station's programme schedules.
