PREFACE

Article 30(2) of the Broadcasting Act, Chapter 350 of the Laws of Malta, requires the Broadcasting Authority to make and transmit to the Prime Minister a report that includes the results of independent audience research which ascertains:

- (a) the state of listenership or viewership of broadcasting services provided in Malta;
- (b) the state of public opinion concerning programmes included in broadcasting services provided in Malta;
- (c) any effects of such programmes on the attitudes or behaviour of those who watch them; and
- (d) the types of programmes that members of the public would like to be included in broadcasting services provided in Malta.

In order to give effect to the above, the Broadcasting Authority has commissioned the National Statistics Office to compile data through telephone interviews during the period April – June 2008 that is representative of the whole population. The analysis of these interviews is contained in this report.

Part One of the report details the analysis of the data collected and includes the questionnaire used, the classification of localities in the Maltese Islands by district as found in this particular work, demographic data of the Maltese population, and a list of nationwide radio and television stations and community radio stations licensed by the Broadcasting Authority during this period.

Part Two of the report details the tables for this period.

1. METHODOLOGY AND SAMPLE COLLECTION

Data was collected by means of telephone interviewing conducted by National Statistics Office interviewers continuously during the period 1st April to 30th June 2008. NSO interviewers are instructed to make interviews between 04:00pm – 08:00pm on weekdays and between 09:00am – 1:00pm on weekends, and are instructed to call-back individuals up to 3 times before interviewing the next person in their list. This is mainly to avoid any bias that could be introduced among gender and age.

Starting from October 2007, the number of interviewees contacted by the National Statistics Office was doubled vis-à-vis the previous year and the desired target of interviewees was now at 20 daily. A stratified random sample based on gender, age and district population distribution was selected by the National Statistics Office allowing for a 50% response rate and amounting to 3640 possible interviewees [91 days by 40 interviewees]. For this period 1790 individuals [57.10% of contacted persons] accepted to participate in the survey and, on average, responses were evenly spread out during the whole period. Below is a breakdown of responses achieved during this period:

The target population for this survey consisted of Maltese residents aged 12 years and over, living within private households. The respondents' households were selected using systematic random sampling from a database containing all individuals maintained and known only to the NSO – respondents' personal data are only known to NSO Officials and such data is not forwarded to the Broadcasting Authority. Each individual has an equal and independent chance of being chosen. All the data that was collected was subject to a series of quality checks by vetters. Apart from this, the data entry programme has a number of in-built validation rules in order to limit the errors of data inputting.

1.1 The Accuracy of the Results

How well the sample represents the population is gauged by two important statistics – the survey's margin of error and the confidence level used. The margin of error is the amount of error inherent in the results due to sampling and depends on the size of the sample – a lower margin of error requires a larger sample size. A common choice as an accepted margin of error is that of **±5%**. The confidence level is the amount of uncertainty that can be tolerated. Typical choices are 90%, 95% and 99% confidence – a higher confidence level requires a larger sample size.

With a response rate of 57.1%; a population size of 359000, and a 95% confidence level; the sample of 1790 interviewees has a margin of error of **± 2.29%**.

The differences by age groups, gender and region between the sample and the population as published by the National Statistics Office are as follows:

^b Percentages are based on Total Population by Region as listed in Table 9 of the Demographic Review 2006 – see also Appendix B

2. SAMPLE PROFILE

For this analysis, the demographics included gender, age and location of households by geographic district. The ages of respondents were grouped according to demographic categories used by NSO for World Population Day 2006 (D.O.I Press Release 153/2006) and for the International Day of Older Persons 2006 (D.O.I Press Release 218/2006). Demographic location of respondents was based on the same distribution as that used for the Population Census 2005 and divided into six districts.

The minimum age of respondents was 12 years old, while the oldest person interviewed during this period was 96 years old.

Table and Figure 2.1 give the profile of the sample by age group and by gender and district. Further details about sample distribution are given in Tables 1.1 to 1.3 in Part 2 of this report.

3. LISTENING AND VIEWING PATTERNS

Participants were asked which station they had watched or listened to for at least ten minutes the day before the interview and from which times they had watched or listened to that particular station. With regard to TV, participants were also asked which reception platform they prefer most to receive television at their household.

3.1 Radio Listening

While 46.5% of those interviewed stated that they do not listen to radio; 7.2% stated that they had listened to radio but to no particular radio station; while 1.1% stated that they do not remember which radio station they had listened to – see Part 2: Tables 3.1 and 3.2, and summary Table & Figure 3.1 below. Compared to the same period of the previous assessment period [April-June 2007], regular radio listening has decreased by 2.3% from 47.5% to 45.2% [as against a reduction of 7.9% from 51.2% to 43.4% for the periods October-December 2006 and 2007].

3.1.1 Radio Listening by Gender and by Age Group

Of the effective listening population [i.e. the total number of listeners but excluding those “who do not listen to radio”, “do not remember”, “did not follow any particular radio station” – and excluding the amount of time followed by each listener], One Radio is the overall most preferred station [20.2%] followed by Bay Radio [17.1%]. While females prefer most One Radio [20.3%] males prefer most Bay Radio [20.6%]. Similar to the previous two assessment periods of October-December 2007 and January-March 2007, Bay Radio is the most listened station for those in the youngest four age groups of 12-14 years [26.3%; Q1_’08: 54.2%; Q4_’07: 46.2%]; 15-24 years [51.7%; Q1_’08: 48.7%; Q4_’07: 57.0%]; 25-29 year olds [32.3%; Q1_’08: 43.9%; Q4_’07: 33.3%]; and 30-49 year olds [17.7%]. Those in the 50-64 [33.5%; Q1_’08: 28.8%; Q4_’07: 24.3%] and 65-79 [33.3%; Q1_’08: 32.6%; Q4_’07: 27.6%] age groups prefer One Radio while those 80 years old and over prefer most Radju Marija [34.6%; Q1_’08: 33.3%; Q4_’07: 28.6%]. See Table 3.2 below.

3.2 Radio Listening by Broadcasting Station

The overall counts of listeners [i.e. the total number of listeners excluding those who “do not listen to radio”; “did not remember”; “did not follow any particular radio station” – and excluding the amount of time followed by each listener] of the replies given by respondents to the question “Which radio station did you listen most yesterday for at least 10 minutes”, are given in Table 3.4 and Figure 3.2 below. This data gives the effective percentage of radio listeners that each radio broadcasting station has attracted.

For the period April-June 2008, One Radio attracted the highest number of radio listeners at 20.2% [Q1_08: 19.5%; Q4_2007: 15.3%]; followed by Bay Radio at 17.1% [Q1_08: 16.2%; Q4_2007: 15.5%] and Calypso Radio at 11.6% [Q1_08: 10.3%; Q4_2007: 10.0%]. Compared to the previous assessment period of January-March 2008 the only marked increase was that of XFM which increased its effective radio listeners over the previous period by more than 210% from 3.2% of total viewers to 6.8% during this period.

3.2.1 Radio Listening by Broadcasting Station – By Gender

In general radio broadcasting stations have a balanced gender audience. Of significance, however, are those listening to Radju Parlament and Campus FM where male following is dominant while Radju Marija, Radju Malta and RTK have the highest percentage of female listeners – see Table 3.5 and Figure 3.3 below.

3.2.2 Radio Listening by Broadcasting Station – by Age Group

Overall, the distribution of radio listeners by each broadcasting station by age group is similar to the national percentage population distribution by age groups. However, analysis of each station's distribution is also dependent on each station's targeted audience and its broadcasting programme schedules; the results of which goes beyond the scope of this work. Of significance is that only One Radio has audiences that cover all the age groups. Exceptions to the national population distribution by age are various and of note are Bay Radio and XFM whose largest audience are in the 15-24 age bracket. Of note are the audiences of the two political party radio stations [One Radio and Radio 101]; one of the Public Service Broadcaster's radio station [Radju Malta]; Calypso Radio; and the University of Malta's radio station [Campus FM]; where their largest audiences are in the 50-64 age group. The highest audience of the Church's station [RTK] attracts most those in the 65-79 age groups – see Table 3.6 and Figure 3.4 below.

3.2.3 Radio Listening by Broadcasting Station – By District

Most broadcasting stations had a nationwide following with the exception of Radju Parlament, Magic Radio, Campus FM, and Capital Radio. Although most stations also follow the national distribution population percentages by district, there are two exceptions: One Radio and Campus FM whose largest percentage of audience were from the Southern Harbour district area – see Table 3.7 and Figure 3.5 below.

3.3 TV Viewing

With regard to TV viewing, 21.2% stated that they do not watch TV; 17.2% stated that they had watched TV but did not remember a particular television station; another 0.5% stated that they do not remember which station they had watched the day before; while 0.4% of those interviewed stated that they do not have a TV-set or gave no reply – see Part 2: Tables 3.3 and 3.4, and summary Table 3.8 and Figure 3.6 below. Compared to the same period of April-June 2008, regular TV viewing increased by 2.5% which is not significant; however regular TV viewing over the previous three months of January-March 2008 has significantly increased by 8.7%.

3.3.1 TV Viewing by Gender and by Age Group

Of the effective viewing population [i.e. the total number of viewers but excluding those who “do not have a TV-set”; “did not watch TV the day before the interview”; “did not remember which station they had followed”; and those who “did not watch a particular station” – and excluding the amount of time followed by each viewer], TVM was the station most followed by gender and by age group. The second most followed station for One TV; while the third most followed station was Rai 1. For the male population, the

second most followed station was Rai 1 followed by One TV while for the female population the second most preferred station was One TV followed by Net TV.

During this period, TVM was the most followed station across all age groups. One TV was the most followed in three age groups from 30 years to 80 year olds and the third most preferred for the 80+ year olds. Net TV was the second most preferred station with those of 80+ years. Rai 1 got the second preference for two age groups [15-24 and 25-29 year olds] and third preference in three age groups [30-49, 50-64, and 65-79 year olds]; while Italia 1 got second preference for the 12-14 year olds and third preference for the 15-24 age group – see Table 3.9 below.

3.4.1 TV Viewing by Broadcasting Station – By Gender

During this period local broadcasting TV stations had a skewed female gender following. Foreign broadcasting stations which were more followed by males are Rai 1, Rai 2, Rai 3, Italia 1, and Discovery Channel – the rest of the foreign broadcasting stations have a skewed female following: see Table 3.12 and Figure 3.8 below:

3.4.2 TV Viewing by Broadcasting Station – By Age Group

Overall, the distribution of TV viewers by each broadcasting station by age group is similar to the national percentage population distribution. However, analysis of each station's distribution is also dependent of each station's targeted audience and its broadcasting programme schedules; the results of which goes beyond the scope of this work. Of significance, however are the viewers of Smash TV, Education 22, ITV, and Family Network TV whose percentages did not cover at least two of the age-groups.

Of the foreign broadcasting stations Rai 1, Rai 2 and Canale 5 have been preferred by all the age groups. Of significance are Rai 2, Italia 1 and the Discovery Channel whose audiences in the 12-14 age group are more than 300% of the total percentage for that same group – see Table 3.13 and Figure 3.9 below.

3.4.3 TV Viewing by Broadcasting Station – By District

The main three local TV broadcasting stations [TVM, One TV and Net TV] have nationwide following while the latest addition to the list of local broadcasting stations, Family Network TV which started regular broadcasts at the start of this broadcasting season, was followed in all the districts – the other three broadcasting stations [Smash TV, Education 22 and ITV] did not have any following in at least three districts out of six.

Nation following by foreign broadcasting stations received locally was also registered in all districts by Rai 1, MediaSet [Rete 4, Canale 5 and Italia 1], and by the Discovery Channel – see Table 3.14 and Figure 3.10 below.

3.5 TV Reception Platform

As yet digital radio broadcasts had not started during this period; however, test transmissions on the DAB+ platform started from 1st July 2008 and by the end of July the Authority had authorized the rebroadcasting of 36 foreign digital radio stations, the simulcasting of 12 nationwide analogue radio stations [only XFM is the sole nationwide radio station which has not yet requested permission from the Authority to simulcast on the DAB+ platform], and of one community radio station on the digital platform which intends to start broadcasting as a nationwide radio station [B.A. Press Release 53/08].

On the other hand, digital television broadcasting is available through various platforms. With this in mind, respondents were asked to indicate on which broadcasting platform they receive their household television broadcasts; namely through roof-top aerial – both analogue and digital, cable system, satellite dish and through the Internet.

The data used in this analysis is derived only from persons living in the archipelago – no institutions, of whatever kind are contacted. It is therefore representative only of household reception platforms used and not of national digital uptake. Table 3.15 and Figure 3.11 and Figure 3.12 detail the percentages registered for the various broadcasting platforms by quarter from October-December 2006 to April-June 2008. Further data is available in Part 2 of this report; Tables 3.5 to 3.7.

3.5.1 TV Reception Platform by District

From the previous section it is evident that digit aerial up-take from January-March to April-June 2008 has maintained the same levels. Analysed by district, this uptake was persistent in all districts; the only marked increase was that of households with satellite receivers in Gozo and Comino which has doubled over the previous period – see Table 3.16 and Figure 3.13 below.

3.6 Teleshopping

Starting from 1st April 2007, the Authority wanted to research Teleshopping originating from the Maltese Islands. Respondents were asked whether they regularly watch teleshopping and on which channel such programmes are followed. Teleshopping programmes are aired on local broadcasting stations, generally during the off-peak hours during the day. There is only one channel completely dedicated to 24/7 Teleshopping.

Of all the interviewees, only 8.8% stated that they regularly watched Teleshopping programmes. Of the effective teleshopping programme viewers, 7.6% stated that they did not know which teleshopping programme they had watched while the most followed teleshopping programme is that broadcast on One TV, followed by Smash TV. The teleshopping dedicated TV station, ITV, ranked fourth with 15.9% - see Figure 3.15 below and Tables 3.8 to 3.11 in Part 2 of this report.

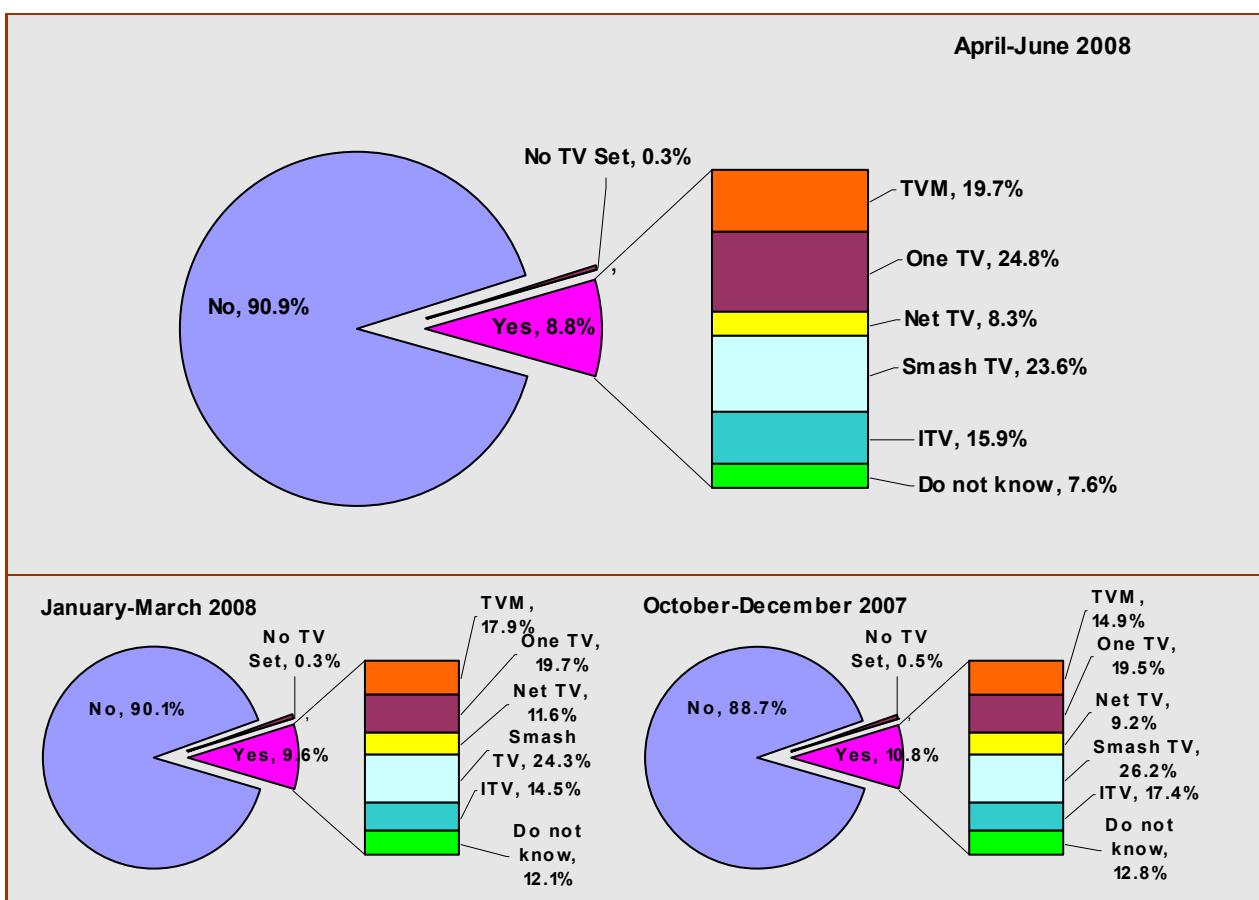

FIGURE 3.15: TELESHOPPING BY BROADCASTING STATION
[APR-JUN 2008, JAN-MAR 2008 AND OCT-DEC 2007]

3.6.1 Teleshopping by Gender and by Age Group

The number of males viewing Teleshopping has increased by 3.6% from 22.5% to 26.1% over the previous period January-March 2008 while female audiences have decreased from 77.5% to 73.9%. During this period the highest percentage of male audiences was reached by ITV with 40.0% while the highest percentage of female audiences was reached by Net TV – see Table 3.18 Figure 3.16 below.

While for this period the effective teleshopping audience by age group was predominantly of those who were in the 50-64 age brackets; for this assessment period a younger age group [15-24 year olds] was attracted to Teleshopping – see Table 3.18 and Figure 3.17 below. What is of concern is that such programmes are also followed by children – see Tables 3.8 and 3.9, Part 2, of this report.

4. RADIO AUDIENCES

Respondents were asked to state at which times they started and stopped listening to their radio. These time brackets were listed by the interviewer as time start-up and time-ending. The 24-hour clock was divided into half-hour brackets and each time-period was recorded separately. Thus, a listener spending two-hours of radio-listening from 08:00am to 10:00am as recorded by the interviewer was counted four times.

These counts were then grouped according to the listening-day of the interviewee, and all the counts for each respective week-day were grouped together, thus forming the basis of radio consumption by week-day. The results given are the totals for each particular sub-sample for that week-day.

4.1 WEEKDAYS-AVERAGE AUDIENCE SHARE

The Weekday-average Audience Share for all the week-days by radio broadcasting stations is presented in Table 4.1 and Figure 4.1 below. Overall, One Radio has attained the highest daily average [1.76%] with its highest average being on Mondays [2.23%]. This was followed by Radio Calypso with the next highest daily average [0.94%] while reaching its highest on Tuesdays [1.32%]; and Bay Radio [0.76%] reaching its highest also on Thursdays [0.99%].

4.3 DAILY AUDIENCE SHARE

The following figures map in detail the daily audience shares for radio broadcasting stations at half-hour intervals. The Figures 4.3.a – 4.3.g below are taken from Tables 4.3.a – 4.3.g in Part Two of this report, which represent the total audience counts as a percentage of the total for each particular week-day. Included in the tables are statistics for (a) the daily average audience; (b) the highest daily peak audience; and (c) the standard deviation – for each particular broadcasting station.

5. TV AUDIENCES

Respondents were asked to state at which times they started and stopped watching their TV-sets. The time brackets were listed by the interviewer. The 24-hour clock was divided into half-hour brackets, with the exception of main news broadcasts where the clock-hour was divided into quarter-hours.

The counts of each half/quarter clock-hour were grouped according to the viewing-day of the interviewee, and all the counts for each respective week-day were grouped together, thus forming the basis of television consumption by week-day. The results given are the total for each particular sub-sample for that week-day.

5.1 WEEKDAYS-AVERAGE AUDIENCE SHARE

The Weekday-average Audience Share for all the week-days by television broadcasting stations is presented in Table 5.1 and Figure 5.1 below. Overall, TVM has attained the highest daily average [1.68%] with its highest average being on Fridays [3.45%]. This was followed by One TV with the next highest daily average [1.00%] and reaching its highest average on Tuesdays [1.35%].

The following figures map in detail the daily audience shares for television broadcasting station by half/quarter-clock hour. The Figures 5.3.a – 53.g below are taken from Tables 5.3.a – 53.g in Part Two of this report, which represent the total audience counts as a percentage of the total week-day audiences. Included in the tables are the same statistics as those calculated for Radio consumption for each particular broadcasting station; i.e. (a) the daily TV average audience; (b) the highest daily peak TV audience; and (c) the standard deviation.

6. RADIO AND TV CONSUMPTION

Calculating the average number of hours that radio listeners and television viewers spend on a daily basis listening/viewing their reception media is another data that has been computed for this period. This would indicate the number of hours that consumers were captured by the respective broadcasting stations; or rather for how long did each broadcasting station manage to maintain, on average, its audiences.

6.1 Daily Hours of Radio Consumption

The total number of hours spent by consumers was analysed by broadcasting station and divided by the total number of consumers per station. The total effective Radio hours spent by consumers for this period stands at 3.63hrs [Jan-Mar 2008: 3.40 hrs; Oct-Dec 2007:3.42 hrs]. The analysis by Radio station is depicted in Table 6.1 and Figure 6.1 below:

TABLE 6.1: RADIO DAILY CONSUMPTION BY HOURS BY STATION [APR-JUN 2008]

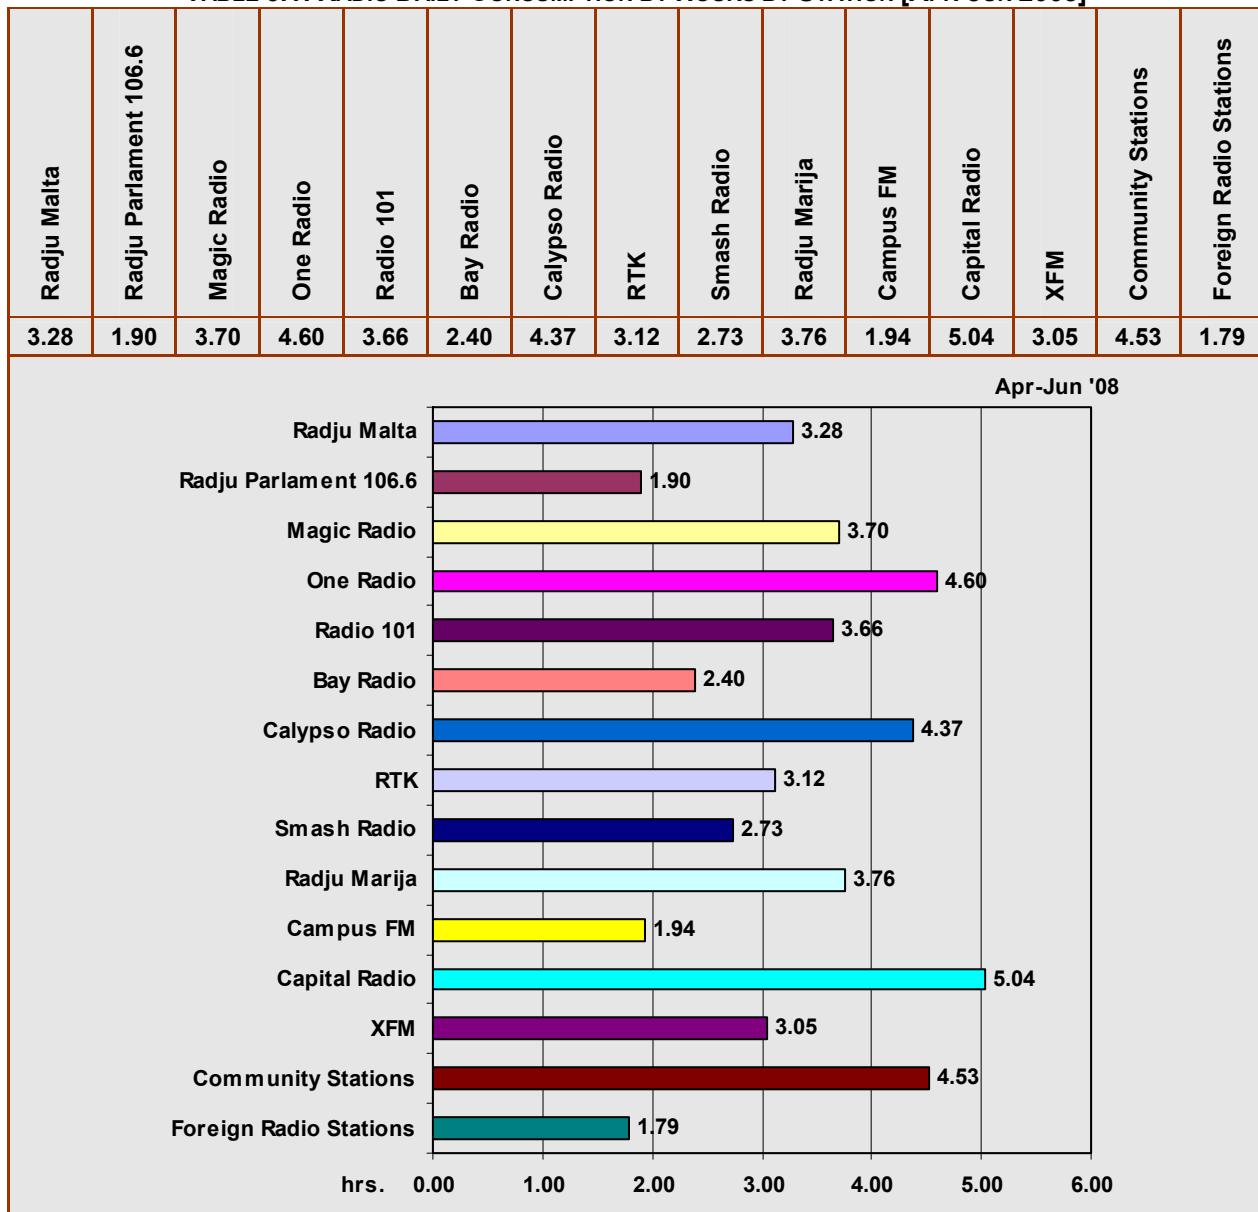

FIGURE 6.1: RADIO DAILY CONSUMPTION BY HOURS AND BY STATION [APR-JUN 2008]

Taking the total number of hours of radio listening over the total sample of people interviewed, the national average hours of radio listening spent by consumers stands at 1.64hrs [Jan-Mar 2008: 1.54hrs; Oct-Dec 2007: 1.53 hrs] every day.

6.2 Daily Hours of TV Consumption

The total number of hours spent by consumers analysed for each TV broadcasting station was again divided by the total number of consumers per station. The total effective TV hours spent by consumers for this period stands at 1.19hrs [Jan-Mar 2008: 2.24hrs; Oct-Dec 2007: 2.33hrs]. The analysis by TV station is depicted in Table 6.2 and Figure 6.2 below:

TABLE 6.2: TV DAILY CONSUMPTION BY HOURS BY STATION [APR-JUN 2008]

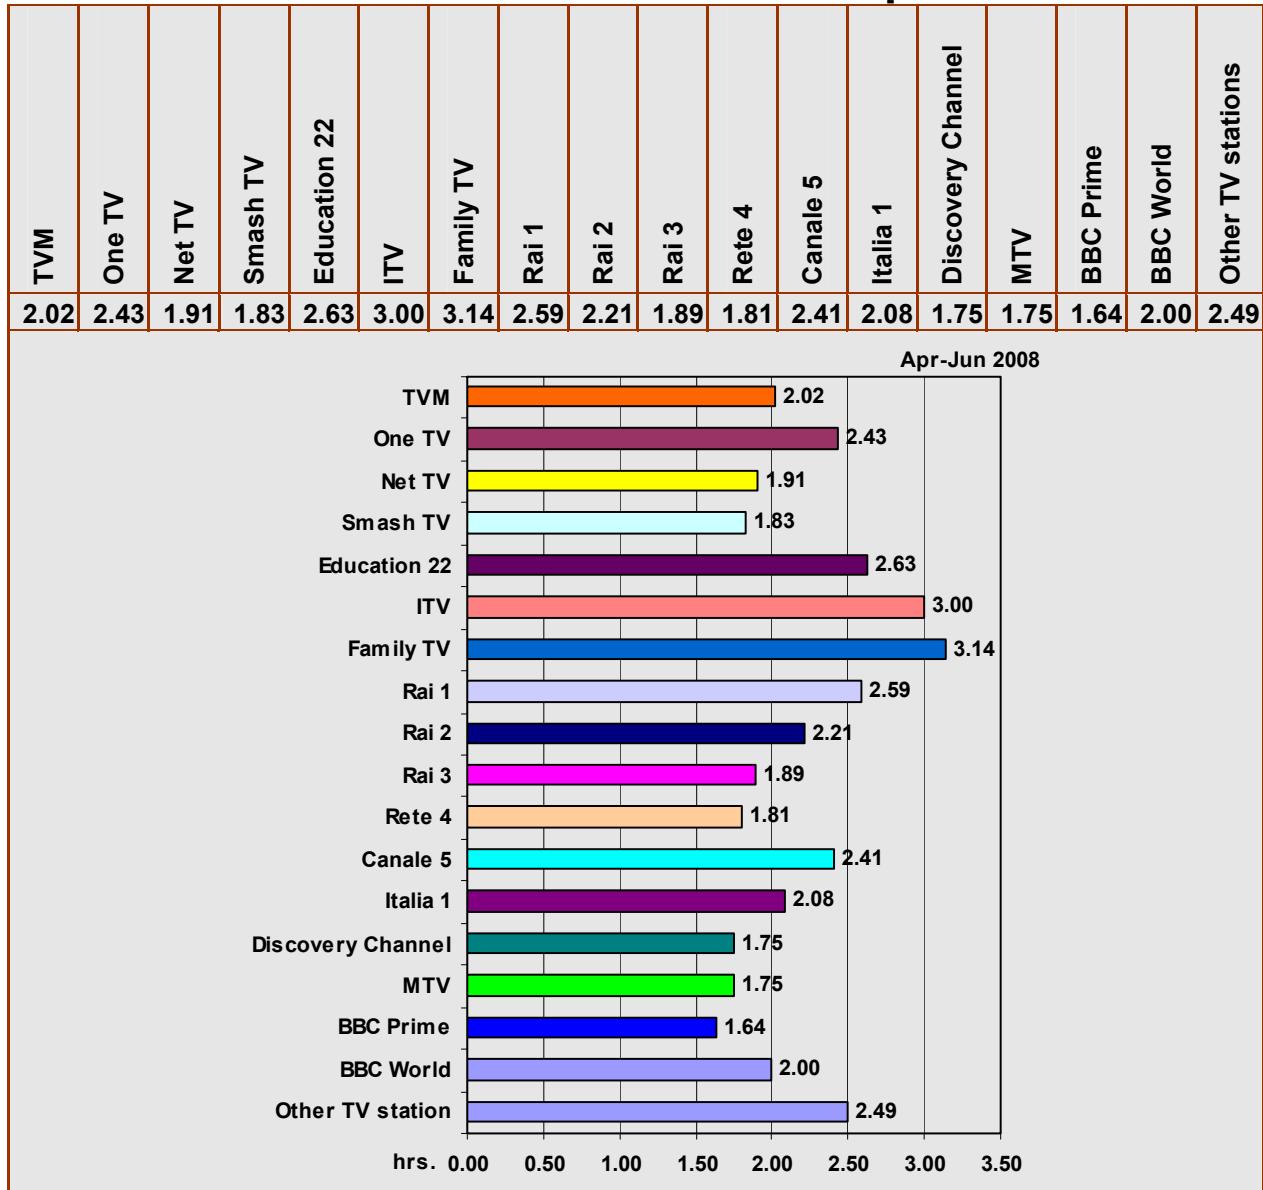

FIGURE 6.2: TV DAILY CONSUMPTION BY HOURS AND BY STATION [APR-JUN 2008]

Taking the total number of hours of TV viewing over the total sample of people interviewed, the national average hours of TV viewing spent by consumers stands at 0.72hrs [Jan-Mar 2008: 1.16hrs; Oct-Dec 2007: 1.38hrs] every day.

7. BROADCASTING STATION ANALYSIS BY WEEKDAY AND BY MONTH

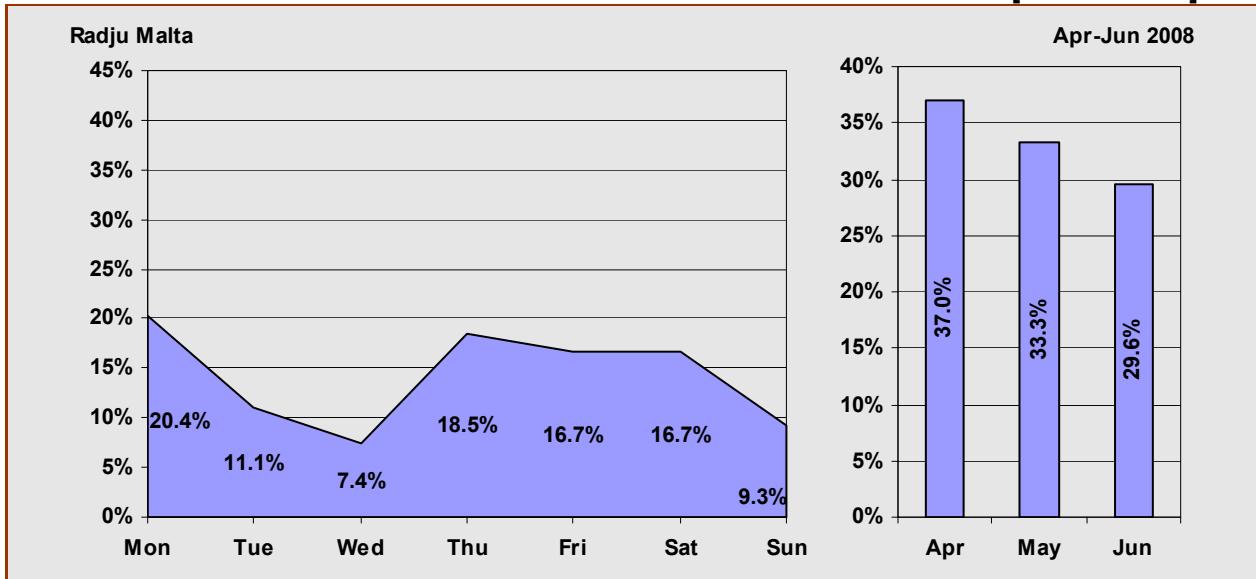

Each station's audiences were analysed by week-day and by month and the following figures depict the spread of each station's audiences. These would give an indication of the effectiveness of each station's programme schedules.
